Contrary to the experience of recent years the proportion of the higher value notes has risen slightly, the reason being probably the issue of high values in March in exchange for gold. Allowing for this it may still be assumed that on the whole low values are being used in larger proportions, and that Paper Currency continues to be used more largely in the smaller transactions of the people.

16. The varying proportions in which notes of each denomination have circulated in the whole of India and in the principal circles during the last two years, are exhibited below :—

| YEARS. |        | CALCUTTA. |          | ALLAHABAD. |          | LAHORE.  |          | BOMBAY.  |          | MADRAS.  |          | TOTAL OF ALL CIRCLES. |          |

| "      | 1,000  | '6        | '7       | 1'3        | 1'3      | 1'5      | 1'5      | '83      | 1'0      | '4       | '3       | '73                   | '8       |
| "      | 10,000 | '04       | '06      | '2         | '2       | '07      | '13      | '04      | '08      | '4       | '14      | '07                   | '03      |
| TOTAL  |        | 100       | 100      | 100        | 100      | 100      | 100      | 100      | 100      | 100      | 100      | 100                   | 100      |

The distribution among the various circles of different denominations of notes has varied but slightly. Each still obstinately adheres to its preference for particular denominations and it is not easy to assign a cause for the variations of taste.

17. The average value during the last four years of the notes in circulation in each circle on the last day of the year is given in the margin, notes of Rs 10,000 being excluded, as their high value and irregular consumption only tend to create mistaken impressions. For several years past the average value shewn in this table has gone on decreasing, but the average on 31st March 1899 shows a small increase for all India, the rise being chiefly at Calcutta and Bombay, where the large tenders of gold were made.

|                 | 1898-99. | 1897-98. | 1896-97. | 1895-96. |

|                                   |             |       | 9,99,99,945  | 10 0  |
| Total                             |             |       | 28,20,32,755 | 0 0   |

19. The gold coin and bullion received against notes issued under the notification of 26th June 1893 and held in the Paper Currency Reserve, became for the first time of considerable value during the past year, having increased by 280 lakhs.

20. The proportion of the Currency Reserve, held in coin and bullion, was on the 31st March about 64 per cent. against 60 per cent. on the same date in the preceding year, the rise being due to the increase in the total circulation, the investment in securities remaining the same.

21. The half-yearly verifications of the Currency balances on the 30th September 1898 and 31st March 1899 were held for all circles and sub-circles, the balances being verified, in accordance with the orders issued on the subject, by a gazetted officer unconnected with the Currency Department.

22. Investments.—The nominal value of the investment stood, as at the close of the previous year, at Rs 10,20,81,500, which is held at a book-value of Rs 9,99,99,945.10.0. Of the nominal value, Rs 8,15,95,000 consist of 3½ per cent. and Rs 2,04,86,500 of 3 per cent. securities. The interest realised and credited under the head "Profits on Note Circulation" during the year is Rs 34,70,420, of which Rs 28,55,825 is the amount realised on 3½ per cent. investments and Rs 6,14,595 on the 3 per cent. portion.

23. *Issue and receipt of notes.*—The following are the issues and receipts of the year, the detail by Circles being shown in Statement VI:—

| ISSUES.                            |                | RECEIPTS.  |                |
|------------------------------------|----------------|--|----------------|
|                                    | R              |  | R              |
| Circulation 1st April 1898         | 25,42,98,905   | Over the counter                                   | 79,68,34,360   |
| Over the counter                   | 88,43,22,420   | At Agencies  | 25,63,620      |
| At Agencies                        | 1,12,32,800    | From other Currency Circles                        | 9,19,98,035    |
| <i>In remittance Transactions—</i> |                | <i>In Remittance Transactions—</i>                 |                |
| Between Head Offices and Agencies  | 11,79,09,630   | Between Head Offices and Agencies                  | 11,90,26,395   |
| Between Circles                    | 18,28,64,000   | Between Circles                                    | 14,97,90,030   |
| In payment of melting fees         | 60             |  | 1,16,22,12,440 |
|                                    | 1,19,63,28,910 | Balance, being circulation on the March 31st, 1899 | 28,84,15,375   |
| TOTAL                              | 1,45,06,27,815 | TOTAL  | 1,45,06,27,815 |

24. The transactions between Head Offices and Agencies were less than in the previous year by 449 lakhs in the case of issues, and by 610 lakhs in that of receipts. This is due to the fact that in 1897-98 treasury balances were extremely low owing to the famine, and it was necessary to resort to transfers through the Currency Department in order to move them rapidly. In making the most economical use of the balances transfers made at one time had to be reversed on a later date, thus increasing the magnitude of the transactions. During 1898-99, on the contrary, the treasury balances were generally high and Currency transfers were largely reduced both in number and amount.

25. The total issues and receipts for the last three years are as follows:—

|         | Issues.<br>R   | Receipts.<br>R |
|---------|----------------|----------------|
| 1896-97 | 1,22,64,01,040 | 1,24,98,63,505 |
| 1897-98 | 1,28,35,72,115 | 1,27,28,82,795 |
| 1898-99 | 1,19,63,28,910 | 1,16,22,12,440 |

The issues have decreased by about 872 lakhs, and the receipts by 1,107 lakhs, as compared with the previous year, the difference being made up as follows:—

|                             | Issues. | Receipts. |
|-----------------------------|---------|-----------|
| Over the counter            | —5,67   | —6        |
| Remittance transactions     | —2,89   | —8,84     |
| From other Currency Circles | ...     | —2,12     |
| Other heads                 | —16     | —5        |
|                             | —8,72   | —11,07    |

26. The Issues and Receipts in the various Circles bear no fixed proportion to the circulation. This is brought out in the following table, which gives for each of the larger circles the value of the circulation, the mean value of the receipts and issues, and the percentage of the former on the latter, the last information being given for the last three years:—

| NAME OF CIRCLE. | IN LAKHS OF RUPEES.                       |                                    | PERCENTAGE OF AMOUNT IN COLUMN 2 ON THAT IN COLUMN 3. |          |          |
|-----------------|---|------------------------------------|---|----------|----------|
|                 | Average circulation of last day of month. | Mean value of Receipts and Issues. | 1898-99.  | 1897-98. | 1896-97. |
|                 |   |                                    | 4   | 5        | 6        |
| Calcutta        | 10,92                                     | 46,36                              | 23  | 20       | 20       |
| Allahabad       | 1,18                                      | 4,58                               | 26  | 18       | 23       |
| Lahore          | 2,21                                      | 11,08                              | 20  | 15       | 20       |
| Bombay          | 6,90                                      | 24,15                              | 28  | 24       | 29       |
| Madras          | 2,89                                      | 16,58                              | 17  | 16       | 17       |
| Rangoon         | 74  | 12,99                              | 6   | 6        | 5        |

From this it will be seen that the transactions in Rangoon are usually very heavy in proportion to the total circulation, while the reverse is the case in Calcutta, Allahabad, and Bombay. In Rangoon, the large proportion of Receipts and Issues is due to the large operations there connected with the financing of the export trade in rice.

27. The aggregate Issues and Receipts of the several denominations of notes at both Offices of Issue and Agencies during the year were as follows :—

|                 | NUMBER OF NOTES FOR RUPEES. |           |         |         |           |         |         |        | TOTAL.     |                |
|-----------------|-----------------------------|-----------|---------|---------|-----------|---------|---------|--------|------------|----------------|
|                 | 5                           | 10        | 20      | 50      | 100       | 500     | 1,000   | 10,000 | Number.    | Value.         |
| Issues . . .    | 1,247,546                   | 6,223,818 | 685,695 | 440,970 | 1,531,671 | 175,180 | 298,619 | 55,271 | 10,658,770 | 1,19,63,28,910 |
| Receipts . . .  | 1,175,856                   | 6,034,512 | 651,427 | 419,544 | 1,437,673 | 169,486 | 290,402 | 54,307 | 10,233,207 | 1,16,22,12,440 |
| More Issues . . | 71,690                      | 1,89,306  | 34,268  | 21,426  | 93,998    | 5,703   | 8,217   | 964    | 425,572    | 3,41,16,470    |

The Issues exceeded the Receipts in all values.

28. The average number of notes that passed over the counters at each Head Office on each working day during the past three years, and the daily average of cancellations, are given in the following table :—

|                   | NOTES CASHED. |          |          | NOTES ISSUED. |          |          | NOTES CANCELLED. |          |          |
|-------------------|---------------|----------|----------|---------------|----------|----------|------------------|----------|----------|

29. The proportion of cancellations continues high, the withdrawals of notes which have been at all soiled being regarded as an important safeguard against forgery. The high figure for Calcutta is mainly due to arrears of uncanceled notes having been taken in hand and disposed of in 1898-99. The numbers of the total issues and cancellations for the year, in thousands of pieces is given below :—

| Circle.             | Issues. | Cancellations. |
|---------------------|---------|----------------|
| Calcutta . . . . .  | 4,491   | 3,661          |
| Allahabad . . . . . | 220     | 208            |
| Lahore . . . . .    | 635     | 542            |
| Bombay . . . . .    | 2,824   | 1,498          |
| Karachi . . . . .   | 178     | 149            |
| Madras . . . . .    | 1,586   | 1,529          |
| Calicut . . . . .   | 52      | 56             |
| Rangoon . . . . .   | 673     | 650            |
| TOTAL . . . . .     | 10,659  | 8,293          |

30. The following table shows in continuation of that given last year, what proportion of the first issues still remain in circulation. This information is given for all India (except Burma). The first issues were made in 1862 in Calcutta, Bombay, and Madras; in 1864 in Allahabad and Lahore; and not until 1883 in Burma:—

| DENOMINATION. |       |   |   | FIRST YEAR. |              | SECOND YEAR. |              |
|---------------|-------|---|---|-------------|--------------|--------------|--------------|
|               |       |   |   | Issued.     | Outstanding. | Issued.      | Outstanding. |
|               |       |   |   | <i>R</i>    | <i>R</i>     | <i>R</i>     | <i>R</i>     |
| Rupee         | 10    | . | . | 21,90,320   | 20,590       | 12,75,000    | 9,700        |
| "             | 20    | . | . | 20,22,000   | 14,140       | 12,62,000    | 6,600        |
| "             | 50    | . | . | 39,30,000   | 16,850       | 17,27,500    | 5,850        |
| "             | 100   | . | . | 89,28,500   | 31,300       | 35,15,000    | 7,600        |
| "             | 500   | . | . | 56,00,000   | 17,500       | 39,97,000    | 2,500        |
| "             | 1,000 | . | . | 2,77,50,000 | 29,000       | 2,66,98,000  | 9,000        |
| TOTAL         |       |   |   | 5,04,20,820 | 1,29,380     | 3,84,74,500  | 41,250       |

The outstandings of the issues of the first year have been reduced during 1898-99 only by the presentation of two notes of *R*10 and one of *R*100, while those of the second year have not been reduced at all.

31. The first year's outstandings are proportionately about twice as large as those of the second year, possibly because Paper Currency, when quite a novelty, was not preserved so carefully as when its value became better known. These old notes are still coming in, though slowly. The cancellations of the issues of the first year, 1862, during the last ten years are shown below:—

| DENOMINATION. |       |   |   | Originally issued in 1862. | Cancelled since 1889. | Still out-standing. |
|---------------|-------|---|---|----------------------------|-----------------------|---------------------|
| Rupees        | 10    | . | . | 219,032 pieces.            | 29 pieces.            | 2,059 pieces.       |
| "             | 20    | . | . | 101,100 "                  | 9 "                   | 707 "               |
| "             | 50    | . | . | 78,600 "                   | 9 "                   | 337 "               |
| "             | 100   | . | . | 89,285 "                   | 9 "                   | 313 "               |
| "             | 500   | . | . | 11,200 "                   | 7 "                   | 35 "                |
| "             | 1,000 | . | . | 27,750 "                   | 11 "                  | 29 "                |

32. It seems evident, therefore, that many of these notes must have been lost and will never be presented. The practice in England is to write off the

value of all notes outstanding for more than forty years. No Indian notes are yet of that age, but Statement X annexed to this report shows the issues, the cancellations in the last ten years, and the outstandings of all notes issued prior to the year 1868 and consequently more than thirty years old.

33. *Encashment of Foreign Notes.*—The following is the Foreign Note account of the Circles in aggregate :—

|  | R                  | R                   |
|--|--------------------|---------------------|

35. What is striking in the above statement is the decrease in the encashments of Foreign Circle Notes at Calcutta and Bombay as compared with 1897-98, the falling off being 193 and 79 lakhs respectively. The encashment of Foreign Circle Notes represents a transfer of funds by the public from one Circle to another, and the following statement compares, in lakhs of rupees, the net transfers thus made between each of the Circles during the last two years. The

plus figures indicate that transfers *to* the Circle exceeded those *from* it, and the minus figures represent an opposite movement :—

|                     | 1897-98. | 1898-99. | Difference. |
|---------------------|----------|----------|-------------|
| Calcutta . . . . .  | +469     | +236     | —233        |
| Allahabad . . . . . | —204     | —2       | +202        |
| Lahore . . . . .    | —261     | —256     | + 5         |
| Rangoon . . . . .   | — 6      | — 27     | — 21        |
| Bombay . . . . .    | +215     | +164     | — 51        |
| Karachi . . . . .   | — 84     | + 13     | + 97        |
| Madras . . . . .    | —107     | —111     | — 4         |
| Calicut . . . . .   | — 21     | — 17     | + 4         |

36. The explanation of the differences may be found in the peculiar circumstances of 1897-98. The sales of Council bills were greatly reduced, a large Rupee loan was taken up and there was great stringency in the markets of Calcutta and Bombay. At the same time owing to famine there was less demand for capital in the interior and more could therefore be spared to relieve the tight markets of Calcutta and Bombay. In 1898-99 normal conditions prevailed and the movement of funds was towards the interior.

37. *The Issue and Receipt of Coin.*—The transactions in coin are as follow (for details by Circles see Statement VII) :—

| Receipts.                          |              |       | Issues.                            |              |       |

| 1898-99 . . . . . | 43,05,34,183 1 5 |         | 39,63,41,918 1 5  |

39. The net result was an increase in the coin reserve of 342 lakhs. This increase, after adding two lakhs paid at Allahabad and Rangoon for an equivalent received at Calcutta in 1897-98, exactly corresponds with the increase in the

circulation, there having been no addition to the investment of the Reserve during the year. The receipts and issues were less than those of the previous year by 9,63 lakhs and 12,02 lakhs, respectively, the differences being made up as follows:—

|                                   |  | Lakhs of Rupees. |         |

| TOTAL . . . . .                            | 14,92               | 4,69            | 31,50                  |

are shown in the margin in thousands of rupees. Almost the whole of the shroff-marked coin has, as usual, been found in the Punjab and the North-Western Provinces, where alone the practice of shroff-marking seems to be common. Since 1893, the Rupee circulation has lost, through the withdrawal of shroff-marked coin 77½ lakhs, of uncurrent coin 18½ lakhs, and of 1835 rupees 150 lakhs, making a total reduction through these means of

246 lakhs of rupees. Nearly the whole of this, *vis.*, 240 lakhs, has during this time been converted into small silver coin, the demand during the famine having been very large. The withdrawals of light weight coins may be expected to increase considerably in future in consequence of the orders of Government issued last March regarding their treatment. There has always been a difficulty in declaring what signs indicate that a coin has been sweated and has not lost weight by ordinary wear. The experience of the Mints has been that a rupee will ordinarily continue of legal weight, that is, will not have lost 2 per cent. for 55 years, and that it may therefore be confidently assumed that any rupee which has lost 6 per cent. of its weight has been fraudulently reduced, and should therefore be cut and returned to the presenter. As long as the exchange value of the rupee differed but slightly from its bullion value the loss to the presenter of a light weight coin was inconsiderable, but when exchange approached the rate of 1s. 4d., much discontent prevailed, for the last holder was generally innocent of the fraud. To remedy this it has been ordered that rupees and half rupees which have lost not more than 1½th of their original weight shall be accepted at all treasuries at their nominal value, and that others which have been reduced to 1½ths, 7⁄8ths or 1⁄8ths of their proper weight shall be cut, but bought if the presenter desires it, at the rate of 14, 13, and 12 annas, respectively, in the case of rupees, and at half those rates for half rupees. Rupees which have lost more than 25 per cent. will be cut and returned, as the tenderer must have been culpably negligent in accepting them. This concession will probably lead to the cutting and withdrawal of light weight coins which would otherwise have been often allowed to continue in circulation, because the penalty of cutting and returning them was so severe.

41. The following statement shows the number of coins cut and broken under the Coinage Act during the calendar year :—

| NAME OF PROVINCE.                 | Number of treasuries in which coins were cut. | Believed to have lost by reasonable wear more than 2 per cent. in weight. |       |     |       | Believed to be counterfeit. |       |       |       | Believed to have been reduced in weight otherwise than by reasonable wear. |       |       |       |

42. That counterfeiting has to some extent increased of late years appears

| Year.             | Rupees. | ½ Rupees. | ¼ Rupees. | ⅛ Rupees. |
|-------------------|---------|-----------|-----------|-----------|
| 1893-94 . . . . . | 8,320   | 358       | 331       | 243       |
| 1894-95 . . . . . | 10,112  | 436       | 438       | 148       |
| 1895-96 . . . . . | 10,759  | 355       | 382       | 185       |
| 1896-97 . . . . . | 11,431  | 410       | 368       | 292       |
| 1897-98 . . . . . | 15,843  | 578       | 548       | 270       |
| 1898-99 . . . . . | 23,966  | 1,056     | 1,547     | 1,529     |

probable from a consideration of the marginal statement which gives the values of coins that have been cut as counterfeit since 1893-94. But the increase in the numbers of detected coin is undoubtedly due in part to the unusually careful scrutiny to which coins, which would in ordinary times have been passed on

without suspicion have been recently subjected. One rather curious case illustrates this. A rupee bearing the date 1839 was last year sent to the Calcutta Mint for examination because we have no coinage of that date. It was however a genuine coin, the explanation being that in 1839 a new die was designed, to supersede that of the William IV pattern, but it failed to give satisfaction. A new design was accordingly prepared which is that of the first issue of 1840. A few specimen rupees were struck from the rejected die, and one, at least, of these got into circulation, but its peculiarity attracted no attention until our coinage came under suspicion 60 years later. The prevalence of illicit coinage has been asserted with much perseverance by the advocates of open Mints. One witness, for instance, holding those views, deposed before the Currency Committee that a certain English firm in India had ascertained that about half per cent. of the rupees in circulation was spurious and that every Indian banker knew of the prevalence of illicit currency. A partner, in the firm referred to, when examined as a witness on a later date admitted that he had no proof whatever that illicit coinage had increased, and no idea of what proportion of the circulation was counterfeit, and the only Indian banker who gave evidence deposed that there had been, in his experience, no illicit coinage attributable to the closing of the Mints. Several witnesses stated that counterfeits had become of such good workmanship as not to be easily detected, but this has not been the experience of the Mints. The

Calcutta Mint, during 1898-99, received for examination from various sources, 253 rupees which were considered unusually good imitations. Of these, 232 came from Bengal: 229 of them were castings, and only 200 of the castings were good specimens. The remaining three rupees had been struck between dies, which were evidently not of steel but cast from a hard alloy, and the rupees struck from them had spread, and were larger than genuine rupees. From the North-Western Provinces came eleven castings, five of them good and four remarkably good specimens, but remarkably good castings have always appeared occasionally in the circulation. The Punjab sent ten, all ordinary castings, except one which was a very good specimen and had evidently been in circulation for a long time. A portion only of these spurious rupees were assayed, and it was found that several contained from 27 to 90 per cent. of pure silver. Where silver of a high touch has been used, there can be no doubt that the fraud is due to the Mints being closed: had they been open the coiner would have used less silver.

43. The rupees sent to the Bombay Mint for special examination were only thirty-four in number, of which thirty-two were rough castings of low touch silver or of base metal. One was also a rough casting but of silver of practically standard fineness, and one was a well made coin struck between dies but of low touch silver.

44. There seems therefore to be no reason to suppose that false coining has increased to any serious extent, or that stamped coin is likely to appear in appreciable quantities. Even in England false coining is practised without creating alarm, and in India the importation and working of machinery must be specially difficult. To turn out rupees on a really large scale would require not only good machinery but also a constant supply of new dies, for our Mints, using dies as hard as they can safely be made, employ three new sets for every lakh of rupees turned out.

45. The new rupees coined during 1898-99 amounted to rather less than 42 lakhs, all made at Bombay from coined silver to complete the requirements for the Bhopal and Kashmir States which have recalled their own rupees and adopted Indian coinage in their place. The usual statements of whole rupees coined and issued from the Indian Mints from 1835 to 1898, inclusive, is shown below:—

(a) Includes Rs. 90,000 coined in 1893 for the Bikanir State.

(b) On account of Kashmir and Bhopal re-coinage.

46. *Rupee Circulation.*—For many years past an annual examination of the composition of the rupee circulation has been made in the month of May at each of the 264 treasuries of Government that are scattered over India. Up to 1894, only Rs. 2,000 were examined at each Treasury, but since that year the number has been increased to Rs. 10,000, so that for the last six years upwards of 26 lakhs of rupees, or about 2 per mille of the supposed total circulation, have annually been classified according to mintages with more or less accuracy. The returns cannot be accepted with implicit confidence, for every now and then evidence appears of neglect of duty. Thus, in May 1894 two Bengal Treasuries reported the existence of coin dated 1894, though there is no such coinage, and it was afterwards acknowledged that the entries were mistakes. The same happened in 1898, and again in the present year, the Amritsar Treasury has returned 87 rupees of 1894, 100 of 1895 and 116 of 1896, while Sealkote has reported 129 of 1894, 165 of 1895 and 116 of 1896, though there is no genuine coin of those dates. None of the neighbouring treasuries found rupees of those years and it must be concluded, not that there are perfectly made counterfeits in the Punjab bearing those dates, but that there was no real examination of coin made at those treasuries, and that other treasuries may possibly have submitted

reports equally fictitious. After amending these obvious errors, the results of this year's coin census appears below. Details by Provinces are given in Statement XI of the Appendix.

47. From 1894 to 1897, Mr. F. C. Harrison, lately Accountant General of Madras, annually contributed to this report a note upon the volume of the rupee circulation in India as deduced from the above table. Last year, however, and again this year, none is forthcoming owing to his absence from India. Mr. Harrison's method of dealing with the problem is an extremely ingenious one, adapted from Jevons. Let it be supposed that the fluid contents of some vessel need to be measured, and that the shape of the vessel is such that no ordinary method of measurement can be applied to it. In such a case let there be added to its contents, which are known to include no alcohol, some determined quantity of that spirit, and after the mixture has been well stirred let a sample be taken and analysed. Then, if one part of alcohol be found to be present in the sample, together with ninety-nine parts of the original mixture, and if the amount of alcohol added were one gallon, obviously, the vessel must, after the addition was made, contain just 100 gallons. In Mr. Harrison's method some recent year's coinage of rupees took the place of the added alcohol and the coinages of all other years represented the liquid free from that spirit. He assumed that a recent coinage will have been fully issued and well mixed with previous coinages in that year in which it contributed its largest percentage to the general circulation, and he calculated the volume of the total circulation in that year, from the number of rupees minted of the recent coinage which he used and the percentage which it contributed to the circulation. He had however to make certain allowances, because the problem is not so simple as the illustration has so far made it appear to be. Reverting to the illustration, it is evident that alcohol being a volatile spirit, if added very slowly to the contents of the vessel, some portion of it will evaporate before the whole has been poured out and before the analysis is made, so that, although a whole gallon may have

been added, less than a gallon will be present in the mixture when its composition is examined. Mr. Harrison had therefore to take into consideration that wastage of a coinage which sets in as soon as any portion of it is issued to the public, and he calculated by a method, which is explained in his note appended to the Currency Report of 1894, that the annual rate of disappearance through exportation, hoarding and melting was 6.77 per cent. of the coin in circulation. This very precise figure can hardly be admitted to be correct for all years, but, even assuming that it is approximately correct, it may be doubted whether, in the year of examination, the recent coinage has been sufficiently diffused to yield reliable results, for newly coined rupees are not issued rapidly to the public and some few lakhs of the coinage of 1893 have even up to the present time never left the currency vaults. In the case of sixteen coinages between the year 1876 and 1892 (that of 1881 being omitted as it was very small) Mr. Harrison's examination was made in nine cases in the year immediately following the year of coinage, in six cases in the second year, and in one case in the third year. It seems very unlikely that equal diffusion can have taken place within one or even two years, and the results arrived at were certainly irregular for they represented the circulation, in successive years to be 98, 110, 113, 142, 110, 107, 104, 108, 118, 143, 137, 157, and 133 crores. The largest of these estimates was that based upon the analysis made in the third year, when diffusion ought to have been more complete than at an earlier time, and it ought for that reason to be the most accurate, if 6.77 correctly represents the rate of wastage. Mr. Harrison's general conclusion, drawn in 1894 from the above rather divergent results, was that the circulation had from 1876 to 1886 been approximately constant at 115 crores, that it then gradually expanded to 120 crores in 1889-90, and had risen to about 125 crores in 1892-93. It may be reasonably doubted whether, with a population increasing at the rate of one per cent. a year and with the issue between the years 1876 and 1886, of upwards of 70 crores of new rupees, the circulation can have remained during eleven years even approximately constant.

48. In 1897 Mr. Harrison, eager to solve more satisfactorily this interesting problem, attacked it by another method, perhaps even more ingenious than that suggested by Jevons' work. It may be described as being exactly the reverse of that previously used, for it depends not on the issue of a recent coinage but upon the withdrawal of a very old one. Since February 1896 rupees which were coined between 1835 and 1840 and bearing the former date, though accepted by Government have not been re-issued to the public, because that coinage is generally below current weight. It cannot be doubted that these old coins, at any rate, have been thoroughly mixed with the general circulation and, from this point of view, Mr. Harrison's second method ought to give results more reliable than those obtained by the first. The census of 1895 showed that 1835 rupees formed 1.55 per cent. of the circulation, and that of 1897 gave a percentage of .5. In the interval, 86½ lakhs of the 1835 coinage had been withdrawn. If therefore the percentages 1.55 and .5 are correct, 86½ lakhs must be 1.55—.5, or 1.05 per cent. of the circulation, and the circulation must be about 82½ crores. It was obvious that this amount was too low, and one or both of the percentages wrong. An inspection of the returns showed that the figure for 1897 was certainly incorrect, because several treasuries showed a total absence of 1835 rupees, and had no doubt, contrary to orders, examined bags from which all those rupees had been

withdrawn. A fresh examination was ordered at all such treasuries, and the reports then received raised the percentage to '7. This rate yielded a circulation of 102 crores which still seemed too low, and Mr. Harrison made, for various reasons which he explained, additions which increased the circulation to 115 crores. Mr. Harrison, when examined last year as a witness before the Currency Committee, stated that he would not be surprised if the circulation, instead of being 128 crores (his latest estimate), were found to be 140 crores on the one side or 90 crores on the other. We may, therefore, take it that, owing to the untrustworthiness of our treasury establishments and probably also of a too small proportion of the circulation being examined, we cannot yet tell with anything like accuracy what is the amount of the active rupee circulation. If we could trust the census returns, Mr. Harrison's second method ought to give accurate results, but we cannot do this, for in the last census 43 out of the 264 treasuries each reported that, among 10,000 rupees, they had found none of 1835. The returns from the other 221 treasuries make it practically certain that in all these cases bags from which 1835 rupees had been removed were alone examined, and it is therefore impossible to feel sure what the percentage for all India may be. The percentage given from the reports is '4; and it ought perhaps to be raised to '5, which was the rate given for last year, and that perhaps ought to have been higher. The percentage of 1835 rupees in May 1895 was '35, which may also be incorrect, and if that for 1899 be '5 the difference '85 should represent the percentage which withdrawals since 1896 form of the total circulation. The withdrawals have been 150 lakhs and the total circulation would be 176 crores, which is a high estimate and probably excessive.

49. Another question which might be settled from these returns, if they could be relied on, is the number of rupees that have emerged from hoards since the mints were closed. The percentage of rupees older than 1874 excluding those of the 1835 mintage which is being withdrawn, fell regularly year by year, as it was natural that it should, until in 1893 it became 34'6. If hoards had not released rupees, the number of these old coins ought to have still decreased slightly, because the yearly withdrawals of shroff marked and light coins come almost entirely from the older mintages. Instead of decreasing they increased, and have been in successive years 34'6, 35'5, 35'7, 38'6, and 38'55 per cent. of the circulation. The rise last year was sudden and was attributed to the effect of famine. If 38'6 and 38'55 be nearly correct percentages for 1898 and 1899, and 34'6 for 1894, the increase of coins which are older than 1874 has been 4 per cent. of the circulation, or 5 crores if the circulation be taken at 125 crores. During these six years nearly a crore shroff-marked and light coins, mostly of the old mintages, have been withdrawn and sent to the mints for the purpose of small coinage, so that the quantity of the older rupees that have appeared from hoards would be about 6 crores. But this estimate must be regarded as only approximate, and we can say no more than that hoarded coin of old mintages may have entered the circulation to the extent of, perhaps, 6 crores. Rupees of later date than 1874 may have also emerged from hoards, but their quantity must be much less because they have been liable to hoarding for a shorter time.

50. *Exchange of small coin.*—The receipts and issues of small change at the Currency Offices during the year were as follows:—

|                             | Receipts. |       | Issues.   |       | Net Issues. |       |
|-----------------------------|-----------|-------|-----------|-------|-------------|-------|
|                             | R         | a. p. | R         | a. p. | R           | a. p. |
| Half Rupees . . . . .       | 11,02,517 | 8 0   | 17,45,834 | 0 0   | 6,43,316    | 8 0   |
| Quarter Rupees . . . . .    | 17,80,063 | 12 0  | 22,93,688 | 12 0  | 5,13,625    | 0 0   |
| One-eighth Rupees . . . . . | 11,23,030 | 10 0  | 14,10,378 | 12 0  | 2,87,348    | 2 0   |
| TOTAL . . . . .             | 40,05,611 | 14 0  | 51,49,901 | 8 0   | 14,44,289   | 10 0  |
| TOTAL 1897-98 . . . . .     | 62,08,778 | 10 0  | 59,49,856 | 8 0   | -2,58,922   | 2 0   |

The net receipt of small coin in 1897-98 was quite exceptional and due to large returns from circulation after the famine had ended. The transactions of 1898-99 were quite normal, as the net issues have generally been between ten and twenty lakhs.

51. *Agencies.*—The object of Currency Agencies proper is to afford facilities to the public for exchanging coin for notes and notes for coin, but it is only in the Punjab that they have ever been worked to any considerable extent. There are busy Agencies at Simla, Rawal Pindi, Umballa and Peshawar which issued in 1898-99 altogether 311 lakhs of notes or 27 per cent. of the total issues of that circle. The other so called Agencies should strictly be described as Currency chests and are intended for an entirely different purpose with which the public are not concerned. Their object is to prevent unnecessary transfers of coin from one part of the country to another. Thus if at any time a head-quarter treasury may be in need of funds, it can be rapidly and economically supplied from the Currency Reserve coin, after an equivalent sum has been set aside at some other treasury out of a surplus which has accumulated there. During 1896-97 and 1897-98 when the balances of Government fell to unprecedentedly low figures, treasury transactions could only be carried on by a very extended use of Currency chests which at the close of those years were 148 and 208 in number. At the end of 1898-99, with easy balances, their number was only 85. The total balance of coin deposited in them was 617 lakhs against 751 lakhs in the preceding year, distributed as follows:—

|                           | 1897-98.    |       | 1898-99.    |       |
|---------------------------|-------------|-------|-------------|-------|
|                           | R           | a. p. | R           | a. p. |
| Calcutta Circle . . . . . | 1,59,54,688 | 8 0   | 1,85,38,983 | 2 0   |

|                           | 7,50,60,974 | 10 0  | 6,17,06,543 | 6 0   |

52. *Claims on lost notes.*—The following is a statement of lost and mutilated notes paid during the year on bonds of indemnity :—

| Nature of loss.                 | Number of notes for Rupees |     |     |     |     |     |       |        | TOTAL.  |          |
|---------------------------------|----------------------------|-----|-----|-----|-----|-----|-------|--------|---------|----------|
|                                 | 5                          | 10  | 20  | 50  | 100 | 500 | 1,000 | 10,000 | Number. | Value.   |
| Whole notes, lost or destroyed  | 2                          | 2   | ... | 12  | 19  | 4   |       | ...    | 42      | 7,530    |
| Half notes, { lost by post      | 30                         | 210 | 57  | 88  | 317 | 22  | 11    | ...    | 735     | 61,490   |
| Half notes, { lost accidentally | 11                         | 175 | 31  | 58  | 260 | 29  | 5     | ...    | 569     | 50,825   |
| Mutilated notes                 | 11                         | 220 | 11  | 10  | 37  | 6   | 6     | ...    | 301     | 15,675   |
| 1898-99                         | 54                         | 607 | 99  | 168 | 633 | 61  | 25    | ...    | 1,647   | 1,35,520 |
| 1897-98                         | 51                         | 534 | 103 | 161 | 640 | 44  | 25    | ...    | 1,558   | 1,26,705 |
| 1896-97                         | 42                         | 471 | 88  | 124 | 485 | 34  | 12    | ...    | 1,256   | 90,830   |

Both the number and the value of these claims increased during the past year, the most noticeable increase being in the case of half notes lost in the post, the number of which was unusually large. The figures for the past six years have been, 395, 359, 285, 486, 619 and 735 respectively. Notes lost by theft are not included in the above statement, as no claim lies on their account against the Department. The names and addresses of presenters of stolen notes are ascertained and communicated to the Police, but these proceedings do not often lead to the recovery of the value of the notes by the rightful owners. Payments on notes wholly lost or destroyed are not made until after 20 years have passed, but their values are invested and the accumulated interest is paid to the claimants together with the value of the note. The number and amounts of such investments made during the last three years is given below. They were unusually numerous in 1898-99.

|           | R5. | R10. | R20. | R50. | R100. | R500. | R1,000. | R10,000. | Total Pieces. | Value. |

53. *Fraud and Forgery.*—The forged notes presented during the year have been the following :—

| Circle in which presented. | R5  | R10. | R20 | R50. | R100. | R500. | R1,000. | TOTAL. |
|----------------------------|-----|------|-----|------|-------|-------|---------|--------|
| Calcutta . . . .           | 2   | 508  | ... | ...  | 1     | ...   | 11      | 522    |
| Bombay . . . .             | 2   | 2    | ... | ...  | ...   | ...   | ...     | 4      |
| Madras . . . .             | ..  | ...  | ... | ...  | ...   | ...   | ...     | ...    |
| Allahabad . . . .          | ... | 3    | ... | ...  | ...   | ...   | 3       | 6      |
| Lahore . . . .             | ... | ...  | ... | ...  | ...   | ...   | ...     | ...    |
| Rangoon . . . .            | 1   | ...  | ... | ...  | ...   | ...   | ...     | 1      |
| TOTAL . . . .              | 5   | 513  | ... | ...  | 1     | ...   | 14      | 533    |

The forged notes presented during 1896-97 and 1897-98 numbered only 62 and 166, so that at first sight it looks as though there had been an enormous increase of forgery during the past year. The increase is however entirely due to a single forgery of R10 notes of the  $\frac{x}{81}$  series which was first noticed in 1897-98. From the same plate have been produced notes marked  $\frac{v}{17}$  and  $\frac{v}{71}$ . During the year Calcutta received 486 false notes of the  $\frac{x}{81}$  series, 18 of the  $\frac{v}{17}$  series and one of the  $\frac{v}{71}$  series. While Allahabad received two of the  $\frac{v}{17}$  series and one of the  $\frac{x}{81}$  series and Bombay one of the latter. Thus of the 533 forged notes presented in all circles during the year no less than 509 represented the work of a single gang which has happily been discovered and the chief members of which have been convicted in the course of the last two years. Of the 508 R10 notes entered against Calcutta, 421 really belong to cases of the previous year: if they be deducted the false notes presented in all circles in 1898-99, amount to only 112 which is not an extraordinarily high record.

54. As usual there was in most cases no evidence on which to prosecute. Thus in the Calcutta Circle there were 73 distinct cases, in 65 of which there was no evidence, and in the 8 cases that were prosecuted there were convictions in only four, and in one of these the sentence was reversed on appeal. The best chance of obtaining evidence naturally arises when the forgeries are of high value notes and there were therefore prosecutions in all but one of the six cases of R1,000 note forgeries. Convictions were obtained in all of these cases except one which is still under trial and may end successfully. In the unprosecuted case the note was the subject of a Civil suit in which the plaintiff

alleged that the defendant had defrauded him by selling to him a clever pen-and-ink drawing of a R1,000 note. The Court found that the claim was false, but there was no sufficient evidence on which to prosecute either for making a false claim or for forging the note.

55. The new forgeries that appeared during the year were five in number of which those marked  $\frac{x}{21}$ ,  $\frac{x}{22}$ , and  $\frac{9}{2}$ , of R10, R100 and R1,000 denominations, were only pen-and-ink drawings, one of them done upon tracing paper, and afterwards gummed upon ordinary paper. The other two new forgeries were both of R1,000 notes from the North-Western Provinces, one marked  $\frac{9}{24}$ , a poor production, and the other marked  $\frac{x}{41}$ , good, as Indian forgeries go. These two new forgeries originated, it is believed, in Benares, the moral atmosphere of that sacred place being apparently favourable to fraud of this kind, for where pilgrims largely congregate sharpers generally abound.

56. The most extraordinary case of the year is one which occurred in so unlikely a place as the Central Jail at Agra, where the Jailor, in consequence of information received, examined the ground under the sleeping place of a Madras life-convict named Rami Chetty. This man was under sentence for life for having forged the signature of the Maharajah of Travancore and his moral obliquity was so confirmed, even at his early age of 22, that when tried at Agra he seems from the record, to have passed himself off as a Brahman though his name indicates that he was only of the trader caste. Under his bed were discovered leaden plates, roughly engraved for the production of R5 notes, and in his bedding were found an impression from these plates, and a letter addressed to some European asking for printing ink and paper. Rami Chetty named another prisoner Chunni as his accomplice, and Chunni made statements exculpating himself and throwing suspicion upon a European mechanic employed in the jail who has since been dismissed. There was no evidence against Chunni except that of Rami Chetty, who at Chunni's trial obstinately refused to make any statement whatever, feeling, apparently, that refusal would do him, a life-convict, no harm, and compliance no good. He was probably rather disappointed when he was himself tried and convicted and sentenced to 7 years imprisonment to commence at the end of the 20 years, which usually represent the term of a life sentence. No forged notes seem to have been produced from Rami Chetty's plates.

57. Just before the year closed the *Currency Note Forgery Act* (XII of 1899) was passed as it was thought that the Indian Penal Code, which did not provide specially for Currency note cases, was an insufficient protection to the public. In England there is a special law for this class of offences and the Bill was originally drafted on the lines of the English statute, but was modified in Committee by putting on the prosecution the burden of proving that the holder of a forged note intended to use it as genuine, while in England the accused person has to prove lawful intention.

58. The year produced a few cases of the usual kind of fraud not amounting to forgery, presenters of half notes falsely alleging that they had quite recently lost the corresponding halves, which however have been found to have been long previously deposited with the Currency Department by other claimants. This kind of attempted imposture can generally be established by reliable evidence.

59. *Remittances of silver.*—The following is the detail of the silver remittances sent during the year:—

*Through Circle Offices—*

|                      |   |   |   |   |           |
|----------------------|---|---|---|---|-----------|
| Allahabad to Rangoon | . | . | . | . | 5,00,000  |
| Madras to Lahore     | . | . | . | . | 55,00,000 |
| Calicut to Bombay    | . | . | . | . | 20,00,000 |
| Bombay to Allahabad  | . | . | . | . | 10,00,000 |
| " to Lahore          | . | . | . | . | 20,00,000 |
| " to Karachi         | . | . | . | . | 2,75,000  |

*Uncurrent Coin—*

|                     |   |   |   |   |           |
|---------------------|---|---|---|---|-----------|
| Rangoon to Calcutta | . | . | . | . | 1,00,420  |
| Allahabad to "      | . | . | . | . | 4,93,788  |
| Lahore to "         | . | . | . | . | 15,79,960 |
| Bombay to "         | . | . | . | . | 1,75,654  |
| Karachi to Bombay   | . | . | . | . | 14,000    |

*Through Agencies—*

|                                |   |   |   |             |
|--------------------------------|---|---|---|-------------|
| Allahabad Agencies to Calcutta | . | . | . | 50,00,000   |
| " (Cawnpore) to Rangoon        | . | . | . | 35,00,000   |
| Lahore (Umballa) to Bombay     | . | . | . | 25,00,000   |
| Madras Agencies to Calcutta    | . | . | . | 50,00,000   |
| " " to " Agency (Cuttack)      | . | . | . | 13,00,000   |
| " " to Rangoon                 | . | . | . | 40,00,000   |
| " " to Lahore Agency (Delhi)   | . | . | . | 15,00,000   |
| " " to Bombay                  | . | . | . | 1,35,00,000 |
| Bombay " to Calcutta           | . | . | . | 8,50,000    |
| " (Raipore) to Lahore          | . | . | . | 10,00,000   |
| Karachi to Quetta              | . | . | . | 37,98,000   |

*Treasury Remittances—*

|                         | To + From—  |
|-------------------------|-------------|
| India                   | + 10,00,000 |
| Central Provinces       | — 38,00,000 |
| Burma                   | + 3,00,000  |
| Assam                   | + 5,00,000  |
| Bengal                  | — 78,00,000 |
| North-Western Provinces | + 71,00,000 |
| Punjab                  | + 40,00,000 |
| Madras                  | — 18,00,000 |
| Bombay                  | + 5,00,000  |

60. The course of silver movements has undergone considerable changes during the last few years. Prior to the closure of the Mints in 1893-94, most of the silver imported into India was coined at the Bombay Mint, and the movements having their starting point at Bombay were directed to Karachi and Quetta on the north, to Madras and Rangoon on the east and Calcutta on the north-east. For nearly two years after the closure of the Mints the direction of the movements practically remained the same as before, but the large accumulations of silver about June 1893 having been dispersed, the Government operations

were directed mainly to removing coin from the important revenue-collecting centres to head-quarters of Presidencies and Provinces to meet trade requirements. The tendency of trade is to transfer coin from head-quarters to mofussil districts to finance the exports of the country, and as Government revenue is generally paid with money obtained by the sale of produce, the coin withdrawn for trade ultimately finds its way into district treasuries. Thus the ordinary course of trade moves coin—(a) from Bombay to the cotton districts, the western districts of Madras and to Rajputana, (b) from Calcutta to the jute, rice and indigo districts in Bengal, and (c) from Allahabad and Lahore to districts in Northern India, which are important centres of trade in wheat and seeds. The largest collections of Land Revenue are also made in the North-Western Provinces and Oudh and Madras. Accordingly in 1895-96 and 1896-97, the normal operations of Government were confined to remitting the large accumulations of coin in Northern India and Madras to Bombay, Calcutta, and Rangoon.

61. Towards the end of 1896-97 the ordinary course of the movements was interrupted by the famine: the revenue collections fell off, and large remittances of silver were made to the North-Western Provinces and Central Provinces to meet the famine relief expenditure. These remittances continued during the first half of 1897-98, and during the second half of that year heavy coin remittances to the Punjab were necessary in connection with the war on the North-Western Frontier.

62. In the beginning of 1898-99, provision for the continuance of the war expenditure was made by the remittance of one crore to the Punjab through the Currency Department, namely, 70 lakhs from Madras and 30 lakhs from Bombay. A remittance of 43 lakhs, of which 10 lakhs only were from the Currency Department, Bombay, was also made to the North-Western Provinces and Oudh to meet payments to opium cultivators. Owing to the early cessation of the war on the frontier and the prompt collection of revenue in the North-Western Provinces and Oudh, a considerable accumulation of coin took place in the North-Western Provinces and Oudh and the Punjab, with the result that towards the end of 1898-99, Allahabad and its Agencies were able to remit 50 lakhs to Calcutta and 40 lakhs to Rangoon, and a remittance of 25 lakhs was also made from the Umballa Currency Agency to Bombay. Burma being a new province, annually absorbs a considerable amount of coin, and the total remittance made to Rangoon in the year 1898-99 was 80 lakhs, made up of 40 lakhs sent from Allahabad and its Agencies, and 40 lakhs from the Madras Agencies. Bombay required large supplies of silver against the increase in note circulation partly caused by the receipts of gold into the Currency Reserve through the Reserve Treasury and the Mint, and a remittance of 155 lakhs was made from Madras and its Agencies. Madras also sent 50 lakhs to Calcutta to meet the ordinary trade demands in August and September.

63. The important treasury remittances during the year were—60 lakhs Ajmere and Sambhur surplus sent to the North-Western Provinces and Oudh and 33 lakhs to the Punjab, 90 lakhs withdrawn from the Bengal district treasuries to the Reserve Treasury, Calcutta, and 34 lakhs treasury surplus in the Central Provinces remitted elsewhere. Like the North-Western Provinces and Oudh, the Central Provinces are now giving back some of the coins absorbed during the famine of 1896-97 and 1897-98.

64. *Distribution and Absorption of Silver.*—The absorption of whole and half rupees during the year, as compared with the previous year, is shown below:—

In Lakhs of Rupees.

|  | 1897-98.       |               |                 |                   |                       | 1898-99.       |                  |              |                   |                       |

The large amounts of coin absorbed in 1895-96 and 1896-97 have partly returned from circulation in 1897-98 and 1898-99. In spite of an excellent export trade in 1898-99 and an absolute addition to the currency of the country of Rs. 2.78 lakhs on account of gold received into the Currency Reserve, there has been a net reduction in the absorption of coin during the year of 1.61 lakhs. This is due mainly to the cessation of famine and the collection of arrears of Revenue, which had the effect of bringing back the coin issued in famine years into the ordinary trade centres. There was a total absorption of 3.26 lakhs in Bombay, while in every other Province there was an withdrawal from, instead

of an addition to, the circulation of coins, due to some extent to the general tendency of trade to move coin from the Presidency Towns to the revenue districts.

The net exports in each of the four quarters of the year were considerably in excess of the corresponding figures in 1897-98. During the first quarter, there was a large absorption in the Punjab on account of war expenditure and the very active export trade led to considerable issues in Bombay, but these were more than counterbalanced by large receipts into treasuries in other Provinces in payment of Government Revenue. In the second and third quarters the jute and rice trade in Bengal created heavy demands for coin, and Bombay continued to make considerable issues, but at the same time Burma, Punjab, and the North-Western Provinces and Oudh gave up large amounts. The noticeable feature in the transactions of the last quarter was the demand for coin in Burma to finance the rice trade in addition to the usual drain on Bombay through Council Bill payments; but more than half the total Land Revenue for all India is collected during the last three months of the year, and these collections brought back a considerable amount of coin from circulation in the Bengal and Madras Presidencies.

66. The following statement compares the distribution of whole and half rupees at the end of 1898-99, with that at the end of the two previous years:—

In Lakhs of Rupees.

67. The statement shows that on the 31st March 1899 there was a deficiency of coin in Bombay against some surplus in the North-Western Provinces and the Punjab. Remittances have already been made from the North-Western Provinces and the Punjab to Bombay to recoup the coin balance, and though the Madras balances were lower than usual, it has been possible to send a remittance also from Madras to Bombay. The Assam balances show a tendency to increase. Ordinarily the Treasury surplus coin is utilised to finance the tea industry and no withdrawal of whole rupees is made from Assam. The opening of the Assam Bengal Railway may lead to larger imports of coin into Assam through private agency, and if this is the case, the question of the withdrawal of silver from Assam may have to be considered. The accumulations in Burma were also much in excess of the normal, and it may be possible to supply funds for the rice trade of 1900 without any special remittance from Continental India.

68. *Treasury Statistics.*—The transactions in notes at the several Treasuries in India during 1896-97, 1897-98, and 1898-99 have been as follows:—

|  | 1896-97.            | 1897-98.            | 1898-99.            |
|--|---------------------|---------------------|---------------------|

| <b>TOTAL ISSUES</b> . . . . .                                    | <b>12,31,46,260</b> | <b>12,87,98,020</b> | <b>12,76,26,323</b> |

There has been a considerable increase in receipts, especially in those given in payment of Government dues, and a decrease of almost an equal amount in the issues in exchange for silver.

69. The total Treasury transactions in notes during the last three years have been as follows (in lakhs of rupees):—

|  | 1896-97.     | 1897-98.     | 1898-99.     |
|--|--------------|--------------|--------------|
| Government of India . . . . .              | 302          | 323          | 338          |
| Central Provinces . . . . .                | 66           | 39           | 52           |
| Burma . . . . .                            | 65           | 67           | 79           |
| Assam . . . . .                            | 90           | 91           | 99           |

70. The following statement gives details regarding the encashment of notes by Treasuries :—

|  | 1896-97.              | 1897-98. | 1898-99. |
|--|-----------------------|----------|----------|
|  | Number of Treasuries. |          |          |
| Where notes were cashed throughout the year to the extent of the public demand . . . . . | 186                   | 174      | 175      |
| Where notes were ordinarily, but not always cashed . . . . .                             | 41                    | 55       | 52       |
| Where notes were not usually cashed . . . . .  | 16                    | 15       | 17       |
| TOTAL . . . . .  | 243                   | 244      | 244      |

There has been but little variation in these figures during many years.

71. Statement V in the Appendix shows the proportion of Treasury and Bank balances which in each province were held in the form of currency notes. Excluding Reserve Treasuries, the percentage of balances held in notes was—

|                           | 1897.<br>Balance in     |       | 1898.<br>Balance in |         | Percentage of<br>Notes. |       |
|---------------------------|-------------------------|-------|---------------------|---------|-------------------------|-------|
|                           | Notes.                  | Cash. | Notes.              | Cash.   | 1897.                   | 1898. |
|                           | In thousands of rupees. |       |                     |         | Per                     | Cent. |
| Calcutta Circle . . . . . | 43,69                   | 84,25 | 47,97               | 2,01,94 | 33                      | 19    |
| Bombay " . . . . .        | 16,43                   | 55,00 | 23,84               | 75,94   | 22                      | 24    |
| Madras " . . . . .        | 11,46                   | 65,00 | 10,22               | 74,96   | 14                      | 12    |

72. *Receipts and Expenditure.*—The figures of receipts and expenditure given in Statement III of the Appendix are only approximate, as the accounts for 1898-99 are not yet closed. There was an increase of Rs 50 in the actual receipts in 1897-98 over the approximate figures given in last year's report, and the expenditure was greater by Rs 209-1-4 than the approximate figures. Details of the differences are given in the foot-note to Statement III. The charges for 1898-99 were more than in the previous year by Rs 1,38,000, mainly owing to increase in the charges for note forms.

## Statement of the value of Government Currency Notes in

So shown in the returns, which must, however, be erroneous, as no rupees were coined in 1894. The error was confined to a single treasury.

In what year examined.

### Weather Review of India for the Week ending at 8 a.m. on Saturday, August 12th, 1899.

Important changes have taken place in the weather conditions during the past week. On Sunday pressure gave way rapidly in North Bombay, the area in which pressure has for so long been in persistent large excess, and for the first time for weeks pressure over this region was normal. At the same time the barometer began to fall in Lower Burma, and winds commenced to show signs of a cyclonic circulation in the Bay. On Monday the barometer continued falling over Burma and the Andaman Sea, and rain began decreasing in Bengal owing to the indraught into the area of low pressure in the Bay. On Tuesday a further fall of the barometer took place in Lower Burma, and a depression was shown in the Andaman Sea, south of Diamond Island, which began to advance in a north-westerly direction during the next twenty-four hours. On Thursday morning the storm had recurved to a certain extent, and travelling in a west-north-westerly direction was approaching the Orissa Coast between False Point and Gopalpore. The storm probably crossed the Coast near Puri on Thursday afternoon, and on Friday morning was shown lying over the eastern districts of the Central Provinces, but it had filled up to a great extent and was only a large area of nearly uniform pressure covering the whole of the Central Provinces. The Arabian Sea monsoon current, which, since the disappearance of the abnormally high pressure over the head of the Peninsula, had steadily been increasing in strength, had given increasing rain to the West Coast districts and the Deccan up to Thursday, the day on which the depression from the Andaman Sea had crossed the Orissa Coast; but on Friday it suddenly fell off in strength and failed to feed into the depression in the Central Provinces. The depression thus deprived of the indraught of humid winds from the Arabian Sea rapidly filled up, and by Saturday morning was only a feeble diffused depression of no importance. It had, however, given favourable, but not heavy, rain over the greater part of the Central Provinces, and had caused a strong inrush of monsoon winds into Bengal, which by Saturday had extended up the Gangetic Plain as far as the western districts of the North-Western Provinces.

The Arabian Sea monsoon current during the short period, for which it regained its normal strength, gave moderate to heavy rain in the West Coast districts,—Mercara on the 10th receiving seven inches,—and much needed showers in the Deccan. Thundershowers were also received in the Punjab plains on the 8th, but practically no rain has fallen in Gujarat and Kathiawar during the week, and only a few light showers in Rajputana.

Unusually high temperatures have been registered over the greater part of India during the week, the area of largest excess being Rajputana and the South Punjab.

**Daily Summary.**—*Sunday, August 6th.*—Pressure had given way everywhere, the largest fall occurring in North Bombay and Rajputana. The abnormally high pressure over this region, which had for so long been a persistent feature in the pressure conditions, had disappeared, and pressure was now normal. Pressure was in moderate to large defect in the Punjab, normal or in slight defect in Bengal and in considerable to large defect in Burma and over the east of the Bay. Temperature was in excess over the whole country, with the exception of Bengal, Assam, Upper Burma and Sind. Light to moderate rain had fallen in Burma and Bengal, and showers in the Upper India hill districts and on the West Coast. Some heavy falls were reported from North and East Bengal.

*Monday, August 7th.*—The barometer had fallen briskly in Burma, the north-east of the Bay and the Andaman Sea, and a depression was in course of

formation in the Andaman Sea where pressure was in very large defect. Pressure was very uniform over North-Eastern India and the head of the Bay. Pressure had increased briskly to rapidly in the North and Central Punjab and the Upper India low pressure area had been transferred southwards to Upper Sind. Temperature had fallen slightly over the greater part of the country. It was in defect in Assam, but averaged more than  $5^{\circ}$  in excess in the provinces of Berar, Rajputana and Madras Deccan. Showers had fallen in the Konkan, parts of Gujarat and the West Bombay Deccan, and in the East Punjab and Upper India Hills. Rain had fallen in smaller amounts in Burma and North-Eastern India.

*Tuesday, August 8th.*—Pressure had fallen slightly to briskly in Bengal, the northern half of the Bay and Lower Burma, and the depression had continued to develop in the Andaman Sea. Pressure had risen briskly to rapidly in Upper India and slightly to briskly on the Bombay and Kathiawar Coasts. Temperature had increased in Bengal, Assam, Mysore and Gujarat and had fallen in the Punjab. Mean temperatures averaged  $5\frac{1}{2}^{\circ}$  above the normal in Rajputana, and  $5^{\circ}$  in Berar and Orissa. Moderate to heavy rain had fallen in Tenasserim and Burma, but practically no rain had fallen in Bengal and Assam. Light to moderate rain had been received in the West Coast districts, and thundershowers over a considerable part of the Punjab and Kashmir.

*Wednesday, August 9th.*—Pressure had risen briskly in Lower Burma, Tenasserim and the Andaman Sea and had fallen slightly to briskly in Bengal and the Madras Coast districts. The storm in the Bay had moved in a north-westerly direction. Pressure had risen slightly to briskly in North Bombay and was in considerable excess over Sind, Kathiawar and South-West Rajputana. Temperature had fallen more or less over nearly the whole of the Peninsula and was most largely in excess of the normal in Northern India. Moderate to heavy rain had fallen in Burma and light to moderate rain in the West Coast districts, Mysore and the greater part of the Deccan. Showers had been received in the Bengal Coast districts.

*Thursday, August 10th.*—Pressure had increased rapidly in Burma and briskly in Bengal. It had fallen over the whole of the Peninsula and in North-Western and Central India, the fall being largest in Orissa, North Madras and the Central Provinces. The storm had advanced in a west-north-westerly direction and was approaching the coast between False Point and Gopalpore. It had apparently filled up slightly, but was a fairly well marked cyclonic storm of moderate intensity. Fairly general but moderate rain had fallen in Burma, South and East Bengal and Orissa, and general and moderately heavy rain in the West Coast districts, where Mercara had received 7.2 inches, Ratnagiri 2.83 inches and Karwar 2.7 inches. Showers had fallen over a considerable portion of the interior of the Peninsula and in North Madras. Temperature had fallen largely in the areas of rainfall in the Peninsula and slightly in North-Eastern India, but had risen considerably in North-Western and Central India.

*Friday, August 11th.*—Pressure had again increased in Burma and Bengal and had given way in the Peninsula and North-Western India. The depression had passed into the eastern districts of the Central Provinces and was central near Sambalpur. It had filled up to some extent and was a large area of nearly uniform pressure covering the whole of the Central Provinces. Temperature averaged from  $5^{\circ}$  to  $11\frac{1}{2}^{\circ}$  above the normal in the provinces of Rajputana, Central India, North-Western Provinces, Punjab, Central Provinces, Berar and Gujarat. Light to moderate rain had been received in Burma, the greater part of Bengal, Orissa, Chota Nagpur, Bihar and the West Coast districts, and moderate to heavy rain over a considerable portion of the Deccan and Berar.

*Saturday, August 12th.*—The barometer had risen briskly in the Central Provinces and on the Madras Coast. The depression had moved in a north-westerly direction to the northern districts of the Central Provinces, but had almost filled up. Mean temperatures were in excess of the normal over the whole of Northern India and in defect in Burma, Berar, Mysore and the Madras Deccan. Rainfall had increased in Bengal, and moderately heavy general rain had fallen in Burma. Showers had been received in the Central Provinces, Berar, on the West Coast, in Rajputana and parts of Madras.

**Temperature.**—The week has been marked by unusually high temperature. On Sunday the only province in which temperature was in defect was Assam. As rainfall ceased in North-Eastern India, while the cyclonic storm was in course of formation in the Bay, temperature rose in Assam, and by Tuesday was in slight excess of the normal. Showers in the Punjab had caused a very rapid fall of temperature in that province on the same day, but temperature quickly rose again, and on Friday day temperatures in the Punjab averaged  $9.6^{\circ}$  in excess of the normal. In the Peninsula large changes in temperature occurred, due to the rainfall given by the Arabian Sea monsoon current to the West Coast districts and the Deccan. Mean temperatures on Sunday were  $6.0^{\circ}$  in excess in the Madras Deccan, but on Friday they had fallen to  $7.2^{\circ}$  in defect. The areas in which temperature was persistently in excess throughout the week were Rajputana, the central districts and the North-Western Provinces. In Rajputana temperatures were most largely in excess of the normal, the excess ranging from  $4.8^{\circ}$  on Sunday to  $11.6^{\circ}$  on Saturday. Maximum temperatures reported on Saturday were, on an average of all stations in that province,  $14.3^{\circ}$  above the normal, and at individual stations the excess amounted to as much as  $16.0^{\circ}$ .

The mean temperature of the week was normal in only Mysore and the Madras Deccan and was in excess in all other provinces, the excess being largest in Rajputana ( $7.7^{\circ}$ ), Central India ( $5.4^{\circ}$ ), Central Provinces ( $5.1^{\circ}$ ), Berar ( $4.6^{\circ}$ ) and the North-Western Provinces ( $4.5^{\circ}$ ).

The following table gives the mean temperature variation data for the week :

| PROVINCE.                         | AUGUST 1899. |      |      |      |      |       |       | Mean variation of week. |

| " 12th . . . . .     | 111.4° | " Khushab.    |

**Rain.**—The indraught into the area of the depression in the Andaman Sea caused a partial break in the rains in Bengal and to a smaller extent in Burma, and it was not till the end of the week when the cyclonic storm had crossed the Orissa Coast that rainfall again commenced heavily in North-East India. The rainfall of the week has hence been in defect of the normal over nearly the whole of Burma, Bengal, Assam and the North-Western Provinces. The only division which received rain in excess of the normal was Upper Burma. The cyclonic storm gave light to moderate rain to the Central Provinces and Berar at the end of the week, but the amounts received did not equal the normal rainfall for the whole week, and thus the rainfall of the week in the central districts of the country was also in defect of the normal.

Practically no rain has fallen in Rajputana, Kathiawar and Sind, and the rainfall of the Punjab was in all divisions in defect of the normal, though exceedingly heavy rain fell in the Kangra Valley during the week. Light rain was received in Gujarat, the largest total amount received being 2.55 inches at Chikli in the Surat division, and during the short period of its temporary renewed activity the Arabian Sea monsoon current gave favourable rain to the West Coast, the Deccan and the central and coast divisions of Madras. The week's rainfall at several stations in these areas exceeded 3 inches in amount, the principal amounts reported being: Karwar, Mandagad, Pen and Thana in the Konkan, Karkal (Mangalore) and Mercara, from 4 to 14 inches each; Bavda (Kolhapur), 10.06 inches; Chandgad (Belgaum), 3.10 inches; Hyderabad (Deccan), 3.65 inches; and Kurnool, Nandyal (Kurnool), Gooty (Anantapur), Yemmiganur (Bellary) and Ramagiri (Ganjam), amounts ranging from 3 to 4 inches. In only the following divisions, however, did the average actual rainfall of the week exceed the normal: Coorg, Khandesh, East Coast (North), Madras (Central) and East Coast (Central).

The last three columns of the table at the end show that the rainfall of the period June 4th to August 12th was normal or in excess in Tenasserim, Central Burma, Arakan, the whole of Bengal and the North-West Provinces, the Punjab Hills, North Punjab and the East Coast (north). In Lower and Upper Burma, the remaining divisions of the Punjab and Madras and the whole of the Bombay and Malabar Coast districts, Central Provinces, Berar, North Bombay, Rajputana and Central India rainfall of the period has been in defect by more than 20 per cent. of the normal rainfall.

The following were the principal large totals received at individual stations during the week :

|                            |                               |               |
|----------------------------|-------------------------------|---------------|
| Burma . . . . .            | Bilin (Thaton) . . . . .      | 13.43 inches. |

for Meteorological Reporter to the  
Government of India.

SIMLA, 17th August, 1899.

T. W. HOLDERNESS,  
Secretary to the Government of India.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 12th August.*—The rainfall of the week in the Circars, the northern portion of the Nellore district, the greater part of the Deccan and the West Coast districts was good. In the remainder of the Presidency it was light or *nil*. The water-supply has improved where rain has fallen, but the want of water in the Cauvery is much felt. In consequence of the recent rain agricultural operations have been actively resumed in the Deccan, the Circars and the West Coast districts, where the standing crops have improved; but more rain is much wanted everywhere and urgently in the southern half of the Presidency. Sowings up to July show a decrease on the average of half a million acres in the Deccan; but the rainfall of the 9th and 10th instant has improved prospects there. Some small harvests are in progress generally and the first crop on the West Coast districts is yielding a fair outturn. Pasturage is improving in parts and fodder is generally sufficient. Cattle are in fair condition. Prices are generally easier in the Circars and the Deccan, but have an upward tendency elsewhere.

**Bombay.**—*For week ending 16th August.*—Rain has fallen in all districts of the Presidency Proper; the fall was good in the Konkan and moderate or slight elsewhere, except in Baroda territory where there was no rain and very little in Kathiawar. Transplanting has been resumed and prospects have considerably improved in the Konkan. Elsewhere the rainfall has been sufficient to benefit the standing crops. In the greater part of Surat and Khandesh, in parts of Nasik and Satara, and in isolated talukas of Ahmedabad, Bijapur, Sholapur, and Ahmednagar more rain is urgently wanted to save the withering crops and to start agricultural operations afresh. Preparations for the late crops are in progress in two talukas of Sholapur. The river has slightly risen in Sind, but there is still a moderate deficiency of water. Fodder is scarce in parts of Sind, Guzerat, Kathiawar, Khandesh, and Nasik and is getting dearer in Sholapur, Satara, and Bijapur. Agricultural stock are in fair condition. Prices have fallen in six districts, are stationary in three, and have risen elsewhere. Test works are being opened in parts of Guzerat.

**Bengal.**—*For week ending 14th August.*—Rain fell in every district during the week, though the amounts were generally moderate. More rain is needed in Orissa and one or two districts in Chota Nagpur. The rice crop throughout the Province is doing well, the only unfavourable report of any importance coming from the 24-Parganas. The autumn rice crop has improved owing to the diminution in the rainfall, but it is feared that there is no chance of a good outturn. Other crops, jute and sugarcane especially, appear to be doing well. Prices show a tendency to rise.

**North-Western Provinces and Oudh.**—*For week ending 16th August.*—The rainfall during the week has been general. The falls have been good in the Himalayan, Central, Submontane, South Oudh, and South-Eastern districts, but slight elsewhere. More rain is badly needed in several districts, especially in

those of the Upper and Central Doab, where the crops are suffering. The crops generally have benefited by the recent rain, but maize and rice in Etah are said to be withering, and the condition of sugarcane in Benares is reported to be bad. Prospects are fair on the whole. Markets are well-stocked and fodder is abundant. Prices have risen generally, except in Lucknow, Cawnpore, and the Northern and Central districts, where they show a tendency to fall.

**Punjab.**—*For week ending 16th August.*—Rain has fallen in all districts, except Amritsar and Peshawar. Sowings of the autumn crops continue and ploughings for the coming spring crops have commenced in Jullundur. The condition of the standing crops is generally reported good to average, but crops dependent on rain are mostly suffering from long drought, and rain is urgently wanted. The Bara stream, in the Peshawar district, is reported to be in flood, but not sufficiently for irrigation purposes. The recent rain has benefited the standing crops to a certain extent in some districts. Fodder is sufficient in all districts, except Hissar, Sialkot, Shahpur, and Dera Ismail Khan. Prices, especially of wheat, the staple food-grain, are rising in Mooltan, Lahore, Amritsar, and Shahpur, falling in Umballa, Jullundur, Peshawar, and Dera Ismail Khan, and are unchanged elsewhere. Wheat is selling from 15 to 21, barley 26 to 27, gram 16 to 21, maize 24 to 27, great millet 18, bulrush-millet 15 to 23, and rice  $12\frac{1}{2}$  to 13 seers per rupee.

**Central Provinces.**—*For week ending 15th August.*—There has been general rain during the latter part of the week. Chanda received 7 inches, Bilaspur 5, Jubbulpore, Mandla, Narsinghpur, Wardha, Bhandara, and Balaghat, each about 4, Sambalpur  $3\frac{1}{2}$ , Saugor  $2\frac{1}{2}$ , and Nimar, Betul, Chhindwara, and Raipur, each over an inch. The remaining four districts received  $\frac{3}{4}$  of an inch. Prospects of the autumn crops have improved everywhere; they are now generally good in the Jubbulpore division and in Chhindwara, and except on the lighter soils, fair to good in the Nerbudda Valley and Betul. In the cotton and *juar* country the standing crops have been much benefited. Re-sowing is proceeding vigorously in Wardha, and germination so far has been good. More rain, however, is still required and much more in the rice tracts where transplantation and *biasi* (thinning operations) are still very backward. Heavy rain before the 25th instant would probably save the greater part of the crop. Sambalpur continues to do well. Fodder and water are reported scarce in Nimar, Betul, Chhindwara, and the Nagpur division. Government forests have been opened to grazing where necessary. The numbers in receipt of village relief are—Saugor 5,414, Damoh 2,228, and Bilaspur 1,651. Labour is again available in Nimar, Betul, and Raipur, and to a small extent, for transplantation, in the Wainganga rice tracts. Prices fluctuate from day to day with the rainfall. *Juar* is generally cheaper and in Chattisgarh, probably in consequence of the cessation of abnormal export, wheat and rice have both fallen in price. The cheapest prices are—wheat 16, gram 26, rice 17, and *juar* 24 seers per rupee; the dearest prices are—wheat 11, gram  $15\frac{1}{2}$ , rice  $9\frac{1}{2}$ , and *juar*  $16\frac{1}{2}$  seers per rupee. The highest price of the cheapest staple in any district is 12 seers (rice) in Bhandara.

**Burma.**—*For week ending 12th August.*—In Lower Burma ploughing has been completed. In Akyab, Thongwa, Thaton and Tavoy sowing and transplanting continue. The crop promises well. In Upper Burma reaping of early sesamum has commenced in Thayetmyo, Sagaing, and Myingyan and is progressing elsewhere. Sowing and transplanting of the wet weather paddy crop continue.

Ploughing for and sowing of *juar*, late sesamum or peas continue in Sagaing, parts of the Lower Chindwin, Meiktila, and Myingyan. Timely rain has fallen and crop prospects have improved. Damage by flood is reported in the Bhamo sub-division of Bhamo and the riverain tract of the Ruby Mines district. Early sesamum and maize in the Minhla township of Thayetmyo are withering for want of rain, also early sesamum in parts of Sagaing. Elsewhere the standing crops are fair, except in the Myedu township of Shwebo and the Kyoukpadoung township of Myingyan. Early sesamum has almost entirely failed in the Pagan sub-division of Myingyan and partial remission of *thathameda* will be necessary there. The price of paddy has risen in Pegu, Prome, Amherst, Thayetmyo, and Myingyan and has fallen slightly in Rangoon.

**Assam.**—*For week ending 15th August.*—The weather is hot and rainy. Ploughing for and transplanting of late rice, reaping of early rice, and plucking and manufacture of tea are in progress. Prospects of tea are generally good. Cutting of jute continues in Sylhet, where the condition of the crop is good. Fodder is scarce in Cachar, Nowgong, and in parts of Sylhet, Goalpara, and Kamrup owing to floods. Prices—common rice—Silchar, Dhubri, and Gauhati 16; Sylhet 24; Tezpur 12½; Nowgong 12; Sibsagar 11; and Dibrugarh 13 seers per rupee.

**Mysore and Coorg.**—*For week ending 15th August.*—**MYSORE:** Rainfall—1 inch 33 cents in the Civil and Military station and good rain in parts of the Province. Prospects are fair. Prices have risen in Tumkur, Kolar, Kadur, and Shimoga. *Ragi (Eleusine coracana)* has been sown in Tumkur.

**COORG:** Rainfall—14 inches 33 cents. Transplanting of rice continues. *Ragi (Eleusine coracana)* has been damaged by the long break. Prices of food-grains are rising. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 16th August.*—**BERAR:** Average rainfall during the week 1 inch 16 cents. The weather is cloudy. There is a general improvement in the state of the crops, but more rain is needed. Preparation of land for the ensuing winter crop continues. Sowing and weeding have recommenced. The fodder and water-supply is insufficient throughout the Province. The price of *jowar* has fallen slightly.

**HYDERABAD:** Rainfall during the week—1 inch 72 cents. Agricultural prospects have improved since the submission of the last report. Sowings for the autumn crop and of rice have been resumed. The standing crops have been much benefited by timely rain. Prices of grain have risen slightly. Prices—wheat 8½, coarse rice 9, and *jowari* 18 seers per current sicca rupee.

**Central India.**—*For week ending 16th August.*—The rainfall has been general in Gwalior and Baghelkhand and partial in the Bhopal, Malwa, and Bhopawar Agencies, where more rain is badly wanted. Agricultural operations are in progress. Crops have been damaged in parts of the Bhopawar and Malwa Agencies, but are fairly good elsewhere. Pasturage is fair in Bhopal, bad in Malwa, withering in Bhopawar, and good elsewhere. Prices are normal in Bhopal and Baghelkhand and are rising in other Agencies.

**Rajputana.**—*For week ending 16th August.*—The rainfall has been practically *nil* throughout the Rajputana Agency, though a few cents have fallen in

isolated tracts. Agricultural operations are at a standstill and certain crops are withering for want of rain in most States. Cattle are generally deteriorating and fodder is very scarce. Prices are rising in twelve States and are steady elsewhere. 750 persons emigrated from Marwar, 2 from Ajmere, and 1,052 from Merwara during the week. The total emigration from Ajmere-Merwara to date numbers—6,696. The numbers employed on relief works were—Marwar 7,962 and Merwara 15,860. On ordinary works—Merwara 61 and on gratuitous relief 378. Prices—Marwar  $11\frac{1}{2}$  and Ajmere  $15\frac{1}{2}$  seers per rupee. Prospects are generally most discouraging, more particularly in Sirohi, Jodhpur, Jesulmere, Bikanir, Merwara, and parts of Udaipur and Tonk. These States cover by far the larger part of the Province. The situation is still fair, though daily growing less favourable in Kotah, Bundi, Jeypore, and the small North-Eastern States.

**Kashmir.**—*For week ending 15th August.*—Rain fell during the week. The weather is now fine. Prospects of the autumn crops are excellent. Prices continue below normal. Rice—27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 16th August.*—Slight rain fell during the week. Prices are generally stationary. Prices—wheat from 16 to 20 and maize 23 to 29 seers per rupee. The condition of the standing crops is fair. Fodder is sufficient.

**Nepal.**—*For week ending 12th August.*—Rainfall 5.05 inches. The weather has been dull and wet. The rice crop is progressing well, but Indian-corn requires some sunshine. Rice— $8\frac{1}{2}$  seers per rupee.

T. W. HOLDERNESS,  
*Secretary to the Government of India.*

SUPPLEMENT TO  
**The Gazette of India.**

---

No. 34. } CALCUTTA, SATURDAY, AUGUST 26, 1899.

---

**OFFICIAL PAPERS.**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

GOVERNMENT OF INDIA.  
HOME DEPARTMENT.

ACCEPTANCE BY MEDICAL OFFICERS OF A PECUNIARY OR OTHER GIFT IN  
RECOGNITION OF THEIR SERVICES.

No. 1812—36.

*Extract from the Proceedings of the Government of India in the Home Department (Public),—under date Simla, the 19th August, 1899.*

Read again—

Despatch from Her Majesty's Secretary of State for India, No. 32, dated the 4th June 1873.

Read also—

Home Department Resolution No. 729—53, dated the 6th May 1898, republishing the rules prohibiting the receipt of testimonials and addresses by servants of Government.

RESOLUTION.

In the Despatch of June 1873, read in the preamble, the Secretary of State ruled that a Medical Officer may, as an exception to the general rule, receive purses and other such testimonials from communities, but may not receive an address unless the Government under which he serves has previously permitted its presentation. These orders are embodied in Rule 5 of the rules republished with the Resolution of May 1898 read in the preamble. The rule mentions pecuniary recognition only, and the point has been raised whether it should also be made to cover cases in which either the donors or the Medical Officer himself prefer that the presentation should take some other form than a gift of money. The Governor General in Council is of opinion that the exception is meant to apply to such cases and is therefore pleased to direct that Rule 5 shall be altered as follows:

Medical Officers are not prohibited from receiving a pecuniary or other gift in recognition of their services from a community or body of persons which may desire to acknowledge these; but the previous sanction of the Local Government or Administration must be obtained by Medical Officers before receiving any public complimentary address.

- (a) Government of Madras.  
Government of Bombay.  
Government of Bengal.  
Government of the North-Western Provinces and Oudh.  
Government of the Punjab.  
Government of Burma.  
Chief Commissioner of the Central Provinces.  
Chief Commissioner of Assam.  
Chief Commissioner of Coorg.  
Resident at Hyderabad.
- (b) Foreign Department.  
Financial Department.  
Military Department.  
Public Works Department.  
Legislative Department.

- Department of Revenue and Agriculture.  
(c) Superintendent of Port Blair.  
Director General of the Indian Medical Service.  
Sanitary Commissioner with the Government of India.  
Secretary to the Board of Examiners.  
Registrar of the Calcutta University.  
Bishop's Chaplain.  
Registrar, High Court, Calcutta.  
Officer in charge of the Records of the Government of India.

ORDER.—Ordered, that a copy of this Resolution be forwarded to (a) all Local Governments and Administrations, (b) all Departments of the Government of India, and (c) all Heads of Departments subordinate to the Home Department, and that the Resolution be published in the *Gazette of India* for general information.

[True Extract.]

A. H. L. FRASER,

*Offg. Secy. to the Govt. of India.*

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on  
Saturday, August 19th, 1899.

The shallow depression, which, on Saturday, the 12th August, was lying over the northern districts of the Central Provinces, had by Sunday morning practically filled up, only a small residual depression being shown near Agra. On Monday pressure had risen briskly in the Punjab and had fallen in Sind and Cutch. It was lowest in Upper Sind and was in considerable defect in Sind and moderate defect in Baluchistan and was normal in the Peninsula and in slight to moderate defect in the Gangetic Plain. Conditions had thus been rendered favourable for increasing rain in the Punjab and Rajputana, and the pressure distribution was such as usually accompanies fairly well distributed rain. General rain was received in Burma, Bengal, the North-Western and Central Provinces and Central India, and showers fell in Khandesh, Berar and the submontane districts of the Punjab. The improvement in the weather conditions, however, did not last long, for, by Tuesday morning, a brisk rise of pressure had taken place in Sind and West Rajputana and a fall in the submontane districts of Northern India. The area of lowest pressure was thus again transferred northwards, and westerly winds commenced blowing in the Gangetic Plain. The barometer had also risen in North Bombay and over the head of the Peninsula, and the high pressure conditions, which had for so long been persistent over the head of the Peninsula, showed a tendency to re-appear. Pressure continued in excess of the normal in Gujarat and the Central Provinces to the end of the week.

In Bengal a shallow depression was formed on Wednesday and remained unchanged in position till it filled up on Saturday. It caused moderate to heavy rain in Assam, Bengal and Bihar, and some very heavy falls were recorded at stations in North Bengal and Bihar. Darbhanga received 5.59 inches on Wednesday, Purnea a total of 13.35 inches on Wednesday, Thursday and Friday, and Dinajpur a total of 9.95 inches on Friday and Saturday.

During the first three days of the week showers were reported from the Gangetic Plain, the Punjab submontane districts, the Central Provinces and Central India; but from Wednesday to the end of the week rainfall was restricted almost entirely to Burma and Bengal. This was in great measure directly due to the depression in Bengal, which determined dry westerly winds in the Gangetic Plain instead of the humid easterly winds which had prevailed at the commencement of the week.

Temperature has again been in general excess of the normal, but the excess has not been so strongly marked as in the previous week, and on the 15th the mean temperature for the whole of India closely approached the normal, being only 0.2° above.

**Daily Summary.**—*Sunday, August 13th.*—Pressure had risen briskly in the west and centre of the Peninsula, and the shallow depression in the Central Provinces on Saturday had practically filled up. Temperature was in defect in Assam and Bihar, normal in Burma, Bengal, Orissa, the West Coast districts and the Bombay Deccan, but was in excess over the greater part of the country. Light to moderate rain had fallen in Burma, Bengal, the eastern submontane districts of the North-Western Provinces, Central India and the Central Provinces, and showers had been received in the Punjab, Upper India Hills, on the West Coast and in parts of the East Peninsula.

*Monday, August 14th.*—Pressure had increased briskly in the Punjab and fallen slightly to briskly in Sind and Cutch. The distribution of pressure was less abnormal than it had been for some time. Temperature had fallen very rapidly in the areas of rainfall in Northern and Central India and the North Deccan, and temperature was in large excess only in Rajputana and the South Punjab. General rain had fallen in Burma, Bengal, the greater part of the North-Western Provinces, the Central Provinces and Central India; and showers had

been received in the West Coast districts, Khandesh, Berar, the Upper India hills and the submontane districts of the Punjab.

*Tuesday, August 15th.*—The barometer had fallen slightly in Bengal and in the submontane districts of Northern India, and a shallow low pressure area was shown lying close to the hills in the North-Western Provinces and Bihar. Temperature had decreased generally over the whole country, but was still in large excess in Rajputana and the South Punjab. Moderately heavy rain had been received in Burma and Bengal and light to moderate rain in the North-Western Provinces, the Central Provinces and Central India. Light showers had fallen in the West Coast districts, the Bombay Deccan, Gujarat and in parts of Madras.

*Wednesday, August 16th.*—Pressure had risen generally, except in Bengal and Burma, where it had fallen slightly to briskly. A shallow depression had formed in Central Bengal. Temperature had fallen rapidly in Bihar and Chota Nagpur and had risen rapidly in Central India, the Central Provinces, Berar and Mysore. It was in excess of the normal over the greater part of the Peninsula and the whole of North-Western India, with the exception of the West Punjab. Moderate to heavy rain had fallen in Burma and Bengal, but rainfall had decreased in the North-Western Provinces. Light showers had fallen in the submontane districts of the Punjab, the West Coast districts, the Central Provinces and parts of the Deccan.

*Thursday, August 17th.*—The barometer had again fallen in East Bengal and Burma, and the depression in Bengal, though unchanged in position, had intensified slightly. Temperature had risen in most provinces and was in excess of the normal in all, except Burma, Bengal, Assam and Bihar. Rain had decreased in Burma and Bengal, and only very light showers had been received in the West Coast districts and in parts of the Central Provinces and Madras.

*Friday, August 18th.*—The barometer was steady in Burma, had changed irregularly in Bengal, where the depression had remained unchanged in position and character, and had fallen elsewhere. Unusually high temperature had prevailed, except in East and Central Bengal, Assam and parts of Burma. Heavy rain had fallen in parts of Bengal and light to moderate rain in Burma. Light showers had fallen in the West Coast districts, the Central Provinces, on the North Madras Coast and in parts of the Deccan.

*Saturday, August 19th.*—Pressure had risen briskly to rapidly in North-Eastern India and Upper Burma, and the depression in Bengal had practically filled up. Temperature had fallen briskly to rapidly in North-Eastern India and had risen in the Punjab and Mysore. It was above the normal in all provinces, except Burma, Assam, Bengal and Bihar, the excess being most marked in the North Punjab. Rain had fallen in Burma, Assam, Bengal and Bihar; and light showers had been received in the West Coast districts and on the North Madras Coast.

**Temperature.**—In consequence of the shortness of rainfall, temperature was in excess in most provinces at the beginning of the week. Temperature fell briskly on Monday and Tuesday, and on Tuesday was in large excess only in Rajputana. The mean temperature for the whole of India was practically normal. Temperature then commenced to rise and was again in general excess on Thursday, Friday and Saturday, the days on which rainfall was restricted almost entirely to Burma and Bengal.

Temperature was normal on every day of the week in Burma and for the greater part of the week in Bengal. It was normal or in slight defect in Assam, but in most of the remaining provinces the variations from the normal were large and generally in excess. The changes were largest in the Punjab, where, from being  $7.6^{\circ}$  in excess on Sunday, it fell to  $0.3^{\circ}$  in defect on Wednesday and rose again to  $6.1^{\circ}$  in excess on Saturday. In Rajputana temperature was in large excess throughout the week, the excess on an average of all stations being nearly  $11^{\circ}$  on Sunday.

The mean temperature of the whole week was normal in Burma, Bengal, Bihar, the Central Provinces and Berar, in slight defect in Assam, and in excess in all the other parts of the country, the excess being largest in Rajputana ( $6.2^{\circ}$ ) and the Punjab ( $3.6^{\circ}$ ).

The following table gives the mean temperature variation data for the week :

| PROVINCE.                         | August 1899. |      |      |      |      |      |      | Mean variation of week. |

| Bombay Deccan . . . . .           | +1·1         | +0·5 | —0·1 | +0·4 | +1·8 | +2·2 | +1·6 | +1·1                    |
| Mysore . . . . .                  | +2·2         | +1·7 | —2·0 | +1·4 | +2·4 | +1·4 | +3·0 | +1·4                    |
| Madras Coast . . . . .            | +3·1         | +1·9 | +1·7 | +3·4 | +2·3 | +3·5 | +3·1 | +2·7                    |
| Madras Deccan . . . . .           | +1·3         | +1·0 | +2·6 | +3·9 | +3·9 | +4·3 | +4·0 | +3·0                    |
| South India . . . . .             | +3·0         | +3·2 | +1·3 | +2·4 | +2·9 | +2·7 | +3·2 | +2·7                    |
| Mean for whole of India . . . . . | +2·3         | +1·3 | +0·2 | +0·9 | +1·9 | +2·5 | +2·2 | +1·6                    |

The mean temperature for the whole of India was practically normal on the 15th and 16th and in excess on all other days of the week, the excess exceeding 2° on the 13th, 18th and 19th. For the whole week the variation from the normal was +1·6°.

**Rain.**—There was practically no rain during the week in North Bombay, Rajputana, Central India (West) and Madras (Central). In Burma, rainfall was in defect in Tenasserim and Upper Burma; and in Bengal, in Orissa and Chota Nagpur. All other divisions in these two provinces received amounts in excess of the normal. North and South Oudh and the eastern and east submontane divisions of the North-Western Provinces also received rain in excess of the normal, but in all the remaining divisions of the North-Western Provinces and in all the divisions of the Punjab, North Bombay, Rajputana and Central India rainfall was in defect. Rain fell in slight excess of the normal in the central division of the Central Provinces, but was in defect in the remaining divisions of the Central Provinces and over the whole of the Peninsula.

The only areas in which the week's rainfall was generally normal or in excess were Burma and North-Eastern India.

The last three columns of the table at the end show that the rainfall of the period June 4th to August 19th was normal or in excess of the normal in Tenasserim, Central Burma, Arakan, the whole of Bengal, Assam and the North-Western Provinces, the hills and north divisions of the Punjab and the East Coast (North). In all the remaining parts of India, which are those usually dependent on the Arabian Sea monsoon current for their rainfall, the amount of rain received up to date is below the normal. The largest deficiency, expressed as a percentage of the normal, occurs in Sind, Baluchistan, West Rajputana, Kathiawar and Gujarat. The largest absolute deficiency is that in the Konkan, where rainfall is short by 44·30 inches.

The following were the principal large totals received at individual stations during the week :

|                  |                                |               |
|------------------|--------------------------------|---------------|
| Burma . . . . .  | Sandoway . . . . .             | 19·63 inches. |
| Assam . . . . .  | Cherra Poonjee . . . . .       | 40·76 "       |
| Bengal . . . . . | Sunderganj (Rangpur) . . . . . | 17·07 "       |
|                  | Dinajpur . . . . .             | 18·21 "       |

Government of India.

SIMLA, 24th August, 1899.

T. W. HOLDERNESS,  
Secretary to the Government of India.

B

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 19th August.*—The rainfall of the week was moderate in South Canara and parts of the Circars, but elsewhere there were only light or scattered showers. The water-supply is fair under large irrigation works, but insufficient in the Cauvery. Extensive sowings have been made during the last ten days in the Deccan, where some useful showers fell in parts on the 21st instant. Some sowings have also been made in the Circars, but elsewhere cultivation is much retarded. The standing crops in the Circars are generally fair, they have improved in the Deccan, but are fading in many places elsewhere. Good rain is urgently required everywhere both for sowing and the standing crops. Harvesting of crops in small areas continues with a moderate outturn. Pasturage is generally scanty, but fodder is available in most places. Prices generally show an upward tendency.

**Bombay.**—*For week ending 23rd August.*—Rain fell in all districts of the Presidency Proper, excepting Kathiawar. The fall was moderate in the Konkan, but insufficient in parts for furthering transplanting operations. Over an inch was recorded in parts of Surat, Khandesh, Sholapur, Satara, and Belgaum, which has proved beneficial to the crops. Elsewhere the rainfall was slight. More rain is urgently wanted everywhere to save the withering crops or to renew agricultural operations. The standing crops have been injured by insects or dust-storms in three talukas of Karachi and by rats in one of Dharwar. Preparations for the late crops are in progress in three talukas of Sholapur. The river is low in Sind and crops are suffering in parts of Hyderabad from a deficiency of water. Fodder is scarce in parts of Sind, Gujarat, Khandesh, and Nasik and is getting dearer in Sholapur, Satara, and Belgaum. Agricultural stock is in fair condition. Prices have risen in twelve districts, fallen in three, and are stationary elsewhere.

**Bengal.**—*For week ending 21st August.*—During the last week rain has fallen in every district, but, while it has been excessive in Bihar and North and East Bengal, it has been scanty in Orissa and the Chota Nagpur division. In Bihar all chance of a fair autumn harvest has disappeared. The rice crop is progressing well everywhere, save in Orissa, and the report from the 24-Parganas is more favourable than that for last week. In the Khondmals the deficiency in the rainfall has caused serious anxiety. Early rice is being harvested and jute is being cut. The price of rice has not materially changed since last week.

**North-Western Provinces and Oudh.**—*For week ending 23rd August.*—Rain fell throughout the Provinces during the week. The falls were heavy in the Himalayan, North, Central, Central-Submontane, South Oudh, South-Eastern and Eastern-Submontane districts, being somewhat excessive in the latter. Elsewhere the falls have been light, especially in the Western-Submontane and Doab districts, where more rain is much needed. The crops have been benefited generally by the rain, but have suffered in many districts from the long

break. In Muttra the maize crop is reported to have been lost, in Azamgarh the prospects of the early autumn crops are said to be gloomy, and in Gorakhpur continued damage, from excessive rain, is reported in low lying lands. Generally prospects have greatly improved. The standing crops are doing fairly, and irrigation is being resorted to where practicable. Transplantation of rice is in progress and early crops are being reaped in places. Supplies and fodder are abundant. With few exceptions prices are stationary or falling.

**Punjab.**—*For week ending 23rd August.*—Rain fell all over the Province during the week. Sowing of the autumn crops is still going on, and ploughing for the spring crops continues in Jullundur. The condition of the standing crops is generally reported average, but crops have commenced to suffer in several districts for want of sufficient rain. Prospects are not favourable in Delhi and some other districts. Water is insufficient in the Gajuhatta canal of the Mooltan district. The recent rain has benefited the standing crops and allowed further sowings of autumn crops in certain districts, but more rain is still urgently wanted. Cattle are reported to be in poor condition in Delhi, Lahore, Sialkot, and Dera Ismail Khan. Fodder is sufficient in all districts, except Delhi, Jullundur, Lahore, Sialkot, Shahpur, and Dera Ismail Khan, and sugarcane is being used as fodder in Sialkot. Prices—especially of wheat—are falling in Sialkot, are unchanged in Ferozepore, Shahpur and Rawalpindi, and are rising elsewhere. Wheat is selling from 14 to 10½, barley 25 to 26, gram 15½ to 21, maize 20 to 27, great millet 18, bulrush-millet 14 to 23, and rice 12 to 12½ seers per rupee.

**Central Provinces.**—*For week ending 22nd August.*—The rainfall of the week has been very scanty, except in Damoh, where 3 inches were recorded. Narsinghpur, Raipur and Balaghat received about half-an-inch each, but elsewhere the rainfall has been insufficient or *nil*. Since the close of the week nearly 6½ inches of rain fell at Bilaspur and general rain varying from ½ to 1½ inches in Chanda. The autumn crops, other than rice, are generally in fair to good condition, but will deteriorate soon unless good rain is received. Of the rice districts, in Sambalpur prospects are good and the rainfall since the end of the week in Bilaspur should, if general, assure a fair crop. In Raipur there has been considerable deterioration of the crop, and the outlook is very gloomy in three tahsils. In Chanda, Bhandara and Balaghat, where rice is largely transplanted, about half the rice crop may be saved by early and heavy rain. Village relief will be required very soon in the affected districts and is already being organised. Preparation of land for the spring crops is being vigorously carried on and in parts of Raipur land, on which rice has already failed, is also being ploughed up for this purpose. Further sowings, where not completed in Betul and Wardha, are retarded for want of rain. The numbers in receipt of village relief are—Saugor 5,369, Damoh 2,183, and Bilaspur 1,780, but this relief is unconnected with the present drought. Fodder and water are reported to be scarce in Nimar, Chhindwara, the Nagpur country, and Hoshangabad. Government forests have been opened to free grazing where necessary. Prices are rising rapidly and the rise is very marked in Mandla, Seoni, Betul, and Nimar. In the last-named district *juar*, of which the price has risen at a bound from 20 to 13½ seers, is being largely exported to Rajputana and Guzerat. The cheapest prices are—wheat 15, gram 22, rice 17½, and *juar* 20 seers per rupee; the

dearest prices are—wheat 10, gram 13, rice 9, and *juar*  $13\frac{1}{2}$  seers per rupee. The highest price of the cheapest staple in any district is  $11\frac{1}{2}$  seers (rice) in Bhandara and Chanda.

**Burma.**—*For week ending 19th August.*—In Lower Burma ploughing and sowing are almost completed, but transplanting operations are still going on. Prospects are good. In Upper Burma sowing and transplanting of the wet weather paddy crop continue. Early paddy is being reaped in Kyaukse and the Southern Shan States. Reaping of early sesamum and sowing of the later upland crops are in progress. The standing crops are fair to good. The yield of the early sesamum crop has been very poor in the Mahlaing township of the Meiktila district. More rain is wanted in the Tagoung sub-division of the Ruby Mines district and very urgently in parts of the Shwebo and Yeu sub-divisions of Shwebo. The withering crops in Myingyan have revived in parts. The price of paddy has risen in Amherst, Pakòkku, and Myingyan and fallen in Pegu, Prome, and Thongwa.

**Assam.**—*For week ending 22nd August.*—The weather is hot and rainy. Transplanting of late and reaping of early rice and plucking and manufacture of tea are in progress. Prospects of tea are generally good; but more sun is needed in Sylhet. Late rice has been damaged by floods in parts of Sylhet and Sibsagar. Cutting of jute has commenced in Goalpara. Prospects are fair. Fodder is scarce in places owing to floods. Prices—common rice—Silchar, Dhubri, and Gauhati 16; Sylhet 24; Tezpur, Nowgong, Sibsagar, and Dibrugarh 12 seers per rupee.

**Mysore and Coorg.**—*For week ending 22nd August.*—**MYSORE:** Rainfall—11 cents in the Civil and Military station and fair rain in parts of Kadur and Shimoga. The standing crops in all districts are withering for want of rain. Prices have risen slightly in the Mysore district. *Ragi* (*Eleusine coracana*) has been sown in parts of Tumkur and Chitaldroog. Fodder is reported scarce in Hassan, Mysore, and parts of Kadur.

**COORG:** Rainfall during the week—47 cents. Transplanting of rice continues. More rain is much required. The prices of food-grains are rising. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 23rd August.*—**BERAR:** Average rainfall during the week—66 cents. The weather is warm and cloudy. Crops are reported to be in a better condition, but the want of rain is being keenly felt. Preparation of land for the winter crop is in progress. Sowings are withheld in places. Weeding continues. Fodder and water are deficient. The price of *jowar* shows a tendency to rise.

**HYDERABAD:** Rainfall during the week—50 cents. The sowing of the autumn crop continues in parts, but more rain is urgently wanted. Hot weather rice sowings have been suspended for want of water in tanks. Fields are being prepared for spring sowings. Pasturage and water for cattle are getting scarce. Prices of grain are steady. Prices—wheat  $8\frac{1}{2}$ , coarse rice  $8\frac{1}{2}$ , and *jowari* 18 seers per current sicca rupee.

**Central India.**—*For week ending 23rd August.*—Good rain fell during the week in Bundelkhand and Baghelkhand, partial to slight in other Agencies, and none in Gwalior. The amount received has been insufficient in most Agencies, especially in Bhopawar. The standing crops are in bad condition in Gwalior and Malwa; they are withering in Bhopawar, but are fair to good elsewhere. Pasturage is bad in Malwa, withering in Bhopawar, and fair to good in other Agencies. Prices are rising in all Agencies.

**Rajputana.**—*For week ending 23rd August.*—No rain fell during the week. Throughout Rajputana agricultural operations are at a standstill and *barant* crops are withering for want of rain. Cattle are generally deteriorating. Fodder is very scarce. Prices are rising in twelve States and are steady elsewhere. 3,643 persons emigrated from Marwar, 82 from Ajmere, and 1,007 from Merwara during the week. The total emigration from Ajmere-Merwara to date numbers—7,785. The numbers employed on relief works were—Marwar 8,566 and Merwara 20,856. On ordinary works—Merwara 85 and on gratuitous relief 481. Prices—Marwar 11½, Ajmere 13½, and Beawar 14½ seers per rupee. Prospects are generally the same as reported last week.

**Kashmir.**—*For week ending 22nd August.*—Rain fell during the week. The weather is now fine. Prospects of the autumn crops are excellent. Prices continue below normal. Rice—27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 23rd August.*—No rain fell during the week. Prices are rising. Prices—wheat from 16 to 19 and maize 23 to 27 seers per rupee. The condition of the standing crops is fair. Fodder is sufficient.

**Nepal.**—*For week ending 19th August.*—Rainfall—4·27 inches. The weather is wet and gloomy. Some sunshine would benefit the upland crops. Indian-corn is being gathered. The price of rice is 8½ seers per rupee.

T. W. HOLDERNESS,

*Secretary to the Government of India.*

GOVERNMENT OF INDIA.  
PUBLIC WORKS DEPARTMENT.  
RAILWAY STATISTICS.

**STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JULY TO 13TH AUGUST 1898, AND FROM 1ST JULY TO 12TH AUGUST 1899.**

N.B.—As regards the figures in column Total earnings from 1st July 1899, audited figures have been used, as far as possible.

(f) Closed for traffic.

(g) From 1st to 28th June 1899.

(h) From 15th June to 12th August 1899.

(i) From 1st June to 13th August 1899.

W. J. McELHINNY, Captain, R.E.,

Offg. Under Secy. to the Govt. of India.

SIMLA, the 24th August, 1899.

---

*Printed and published for the GOVERNMENT OF INDIA at the GOVERNMENT CENTRAL PRINTING OFFICE, Simla.*

---

SUPPLEMENT TO  
**The Gazette of India.**

---

No. 35.} CALCUTTA, SATURDAY, SEPTEMBER 2, 1899.

---

**OFFICIAL PAPERS.**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully or make known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

GOVERNMENT OF INDIA.  
HOME DEPARTMENT.

EXECUTION OF CONTRACTS FOR THE COMMISSARIAT DEPARTMENT.

NOS. 1222—1238.

*Extract from the Proceedings of the Government of India in the Home Department (Judicial),—under date Simla, the 25th August, 1899.*

Read again—

Resolution of the Government of India in the Home Department, No. <sup>2-Judicial</sup><sub>485-501</sub>, dated the 28th March 1895, on the subject of the execution of deeds, contracts and other instruments on behalf of Her Majesty's Secretary of State for India in Council.

Read also—

Memorandum from the Military Department, No. 1585-F., dated the 23rd June 1899, and enclosures, regarding the amendment of the above-mentioned Resolution so far as it relates to Commissariat Contracts.

RESOLUTION.

In exercise of the power conferred by section 2 of the East India Contracts Act, 1870 (33 and 34 Vict., Cap. 59), and of all other powers enabling him in this behalf, the Governor General in Council is pleased, in supersession of the orders contained in Part B-III of the Resolution cited in the preamble, to declare that the undermentioned classes of deeds, contracts and other instruments referred to in section 1 of the Government of India Act, 1859 (22 and 23 Vict., Cap. 41), may be executed as follows :

“ III.—Contracts for the Commissariat Department as detailed below :

[*Note.*—When tenders are expressly declared to be intended to take effect as contracts, they will not be executed on behalf of the Secretary of State.]

- |  |   |   |
|--|---|---|
| I. Articles of Agreement with Government servants, whom the officers specified have power to appoint.  | { | By the Secretary to the Government of India, Military Department, and, subject to any limits for the time being fixed in Army Regulations, India, Volume V (Commissariat-Transport), Commissaries General, Chief Commissariat Officers, Commissariat Storekeepers-General and Executive Commissariat Officers.” |
| II. Contracts for supplies and services to, and purchases from, the Commissariat-Transport Department. |   |   |

ORDER.—Ordered that the above Resolution be communicated to Local Governments and Administrations and the several Departments of the Government of India for information ; and that it be also published in the Supplement to the *Gazette of India*.

### Weather Review of India for the Week ending at 8 a.m. on Saturday, August 26th, 1899.

No change of any importance has occurred in the general weather conditions during the past week. Both monsoon currents have continued unusually feeble, and the only areas in which rain has been fairly general are Burma and North-East India. Showers have, however, occurred in the Central Provinces and in parts of the Madras Deccan, and rain has been more general and slightly heavier than in the previous week on the West Coast. Practically no rain has fallen in Rajputana, Gujarat and Sind and very little in the Punjab and the western districts of the North-Western Provinces.

Another shallow depression appeared on Sunday off the Orissa Coast, but, like last week's depression in Bengal, it failed to intensify and, after remaining practically unchanged in position for the greater part of the week, finally filled up on Thursday, only to be followed by another shallow storm formed in practically the same area on Friday morning. The winds in the northern quadrant of these depressions were feeble and irregular, and the only effect the depressions had on the weather was to decrease the rainfall in Bengal to some extent.

On Thursday rain increased slightly on the West Coast and on Friday showed a marked increase in both the West Coast districts and in Tenasserim. As a rough sea and a slight increase in the winds accompanied these changes, it appeared possible that they were the first signs of a fresh advance of the monsoon, but by Saturday morning rain had again decreased, the sea had gone down, and winds showed no further signs of strengthening.

Temperature has again been in excess in most parts of the country. The area, in which the largest excess occurred, comprised Rajputana, the South Punjab and the adjacent districts of the North-Western Provinces and Central India. Temperature has, as last week, closely followed the distribution of rainfall, and while temperatures were most largely in excess in the above mentioned districts where rain has been altogether wanting, it has been fairly normal in Burma and North-East India, the only areas in which rain has been continuous and general.

**Daily Summary.**—*Sunday, August 20th.*—The barometer had fallen slightly over the head of the Bay, was steady in Lower Burma and the southern half of the Peninsula, and had risen elsewhere. A shallow depression was shown over the Orissa Coast and an equally shallow one over the North-Western Provinces. The low pressure area in North-West India had shifted slightly to the south. Temperature was normal in Bengal, Chota Nagpur and Sind, in defect in Assam and Bihar and in excess in other provinces. Rain had decreased in Burma and Bengal. Moderate to heavy rain had fallen in the Upper India Himalayas, and showers in the North-Western Provinces, the Punjab and on the West Coast.

*Monday, August 21st.*—Pressure had changed by small amounts, and the depression off the Orissa Coast was apparently unchanged in position and character. Temperature had risen rapidly in Bihar and Chota Nagpur. It was above the normal in all parts of the country, except in Burma, Bihar and Sind, where it was normal and in Assam where it was in slight defect. Rain had increased in Burma, but continued light in Bengal. Light to moderate rain had fallen in the Upper India Hills, and light showers had fallen in the North-Western and Central Provinces, on the Madras Coast and in the Madras Deccan.

*Tuesday, August 22nd.*—The barometer had risen slightly in Burma and was steady or had fallen slightly in India. The depression off the Orissa Coast was in the same position and had intensified only very slightly. Temperature was normal in Burma and Bengal, in defect in Assam and in excess in other parts of the country. Light to moderate rain had been received in Burma and North-East India, and showers had fallen in the submontane districts of the Punjab, on the Upper India Hills, the West Coast and in the Central Provinces and the east of Central India. Fairly general but very light rain had fallen in Madras.

*Wednesday, August 23rd.*—Pressure had changed by small amounts, and its distribution was practically the same. The depression off the Orissa Coast was in the same position and had not intensified. Temperature was in excess of the normal in all provinces, except Burma, Bengal, Assam, Bihar and Mysore. Light to moderate rain had fallen in Burma and North-East India, except Chota Nagpur. Showers had been received in the Upper India Himalayas, on the West Coast, and in Berar, the Central Provinces, the Madras Deccan and the West Punjab.

*Thursday, August 24th.*—The barometer had fallen generally over the whole of India. It was steady or had risen slightly in Orissa, the Circars and the south of the Peninsula, and the depression off the Orissa Coast had filled up. Mean temperatures were in general excess, the excess being most marked in the maximum or day temperatures which averaged  $9.3^{\circ}$  above the normal in Rajputana and  $7.9^{\circ}$  in the Central Provinces. Light to moderate rain had been received in Burma and North-East India; and showers in the West Coast districts, Berar, the eastern districts of the Central Provinces and the East Peninsula.

*Friday, August 25th.*—The barometer was steady or had risen slightly in all parts of the country, except in Central and Lower Burma and over the head of the Bay, where it showed a tendency to fall. Another shallow depression had formed over the north-west angle of the Bay. Temperatures were again in excess in most parts of the country and were normal only in Burma, Assam, Bengal, Bihar and on the West Coast. Rain had decreased in Upper and Central Burma and in North-East India and had increased in Tenasserim and on the West Coast. Showers had been received in the Upper India Himalayas, the Central Provinces, the eastern states of Central India and Madras.

*Saturday, August 26th.*—Pressure was steady over the Bay, in Burma and the south of the Peninsula and had risen by small amounts elsewhere. The depression in the north-west of the Bay had increased in size and covered a large area, but had not intensified. Temperatures were normal in Burma and North-East India and in excess in other parts of the country. Moderately heavy rain continued in Lower Burma and Tenasserim, but only light rain had fallen in Upper and Central Burma and over the greater part of North-East India. Rain had again decreased in the West Coast districts. Moderate rain had been received in the eastern districts of the Central Provinces, and showers had fallen in the Upper India hill districts and parts of Madras.

**Temperature.**—Excessive temperature has again prevailed in all parts of the country, except Burma, North-East India and Sind. Temperature for the whole week was in slight defect in Assam. The largest excess on an average of all stations occurred in Rajputana ( $+7.0^{\circ}$ ), Berar ( $+5.8^{\circ}$ ) and Central India ( $+4.4^{\circ}$ ). In the Punjab, Gujarat, Central Provinces, Bombay Deccan, Mysore, Madras Deccan and South India the excess ranged between  $3^{\circ}$  and  $4^{\circ}$ ; and in Orissa, Chota Nagpur, the North-Western Provinces and the Madras Coast districts between  $2^{\circ}$  and  $3^{\circ}$ .

The largest changes in temperature occurred in the Madras Deccan, where, from being  $+5.1^{\circ}$  on Sunday, temperature fell to  $+0.7^{\circ}$  on Thursday and again rose to  $+5.5^{\circ}$  on Saturday. In all other provinces temperature was comparatively uniform, and the changes during the week small in amount.

The following table gives the mean temperature variation data for the week :

| PROVINCE.                         | August 1899. |      |      |      |      |      |      | Mean variation of week. |

| Mean for whole of India . . . . . | +2.4         | +2.6 | +3.0 | +2.4 | +2.2 | +2.7 | +2.9 | +2.6                    |

The mean temperature for the whole of India was in moderate excess throughout the week, the variation from the normal ranging from  $+2.2^{\circ}$  on the 24th to  $+3.0^{\circ}$  on the 22nd. For the whole week the mean temperature was  $2.6^{\circ}$  above the normal.

**Rain.**—The rainfall of the week has been fairly normal in Burma, Upper Burma being the only division in which it was in defect; but rain has decreased during the past week in Bengal and Assam, and the only divisions where it was practically normal or in excess were the valleys of the Surma and Brahmaputra, Orissa and Bihar. In the North-Western Provinces rain was also in general defect, North Oudh, the eastern and east submontane divisions being the only ones in which the normal amount was received.

Normal rainfall has been received in the North Punjab and the Punjab Hills, but these are the only divisions in the whole of North-Western India where rainfall has not been in defect. Fairly normal rain has been received over the whole of Madras (including the south central division in the Malabar Coast districts), with the exception of the Jeypore hill tracts on the North Madras Coast. In the central parts of the country the eastern division of the Central Provinces is the only division in which rain has been received in excess of the usual amount.

Practically no rain has fallen during the week in the South-East Punjab, North Hyderabad, Khandesh, Gujarat, Kathiawar, Sind, Baluchistan Hills, Rajputana and the western division of Central India. The deficiency in the remaining areas of defective rainfall exceeds 50 per cent. of the normal in the South, Central and West Punjab, Coorg, Mysore, the Konkan, the Bombay Deccan, Berar, the west and central divisions of the Central Provinces and the eastern division of Central India.

The last three columns of the table at the end show that the rainfall of the period June 4th to August 26th was normal or in excess of the normal in

Tenasserim, Central Burma, Arakan, the whole of Bengal, Assam and the North-Western Provinces, the Punjab Hills and North Punjab, the eastern division of the Central Provinces and the North Madras Coast.

Thus, with the exception of Upper and Lower Burma, the whole of Burma and North-Eastern India has received normal or excessive rain during the season. In North-Western India (excluding the western districts of the North-Western Provinces) rainfall has been in defect in all divisions, except the Punjab Hills and North Punjab. In the central parts of the country it has been in defect in all but the eastern division of the Central Provinces; and in the Peninsula in all except the North Madras Coast.

The following were the principal large totals received at individual stations during the week:

|                           |                                  |               |
|---------------------------|----------------------------------|---------------|
| Burma . . . . .           | Kyaikto (Thaton) . . . . .       | 18.11 inches. |
|                           | Pegu . . . . .                   | 14.05 "       |
| Chota Nagpur . . . . .    | Monoharpur (Singhbhum) . . . . . | 12.23 "       |

W. A. BION,  
for Meteorological Reporter to the  
Government of India.

SIMLA, 31st August, 1899.

T. W. HOLDERNESS,  
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 26th August.*—The rainfall of the week has been generally irregularly distributed. It has been fair in South Canara, the greater part of the Circars, the Carnatic, and parts of the Central districts, but light elsewhere. The water-supply is insufficient almost everywhere—even under the largest irrigation works, and owing to the continued deficiency of the rainfall the Cauvery is very low. Sowings continue owing to rain in the Circars, the Deccan, Carnatic, and West Coast districts, but are much retarded in many places. Good rain is urgently required to expedite sowings and save the standing crops, which are generally in fair condition, but are failing in parts. Pasturage has improved slightly in parts, but is generally scanty, and the fodder-supply is decreasing everywhere. Prices are fluctuating, but generally show a slight upward tendency.

**Bombay.**—*For week ending 30th August.*—Rain fell in parts of Karachi and in all districts of the Presidency Proper, except in Kaira, Ahmedabad, the Panch Mahals, Kathiawar, and Baroda territory. Moderate rain was also recorded below the Ghât tracts of Kanara, but elsewhere the falls have been slight. More rain is urgently wanted everywhere to save the remaining early crops and for the late sowings. The standing crops are in fairly good condition in parts of the Konkan, Surat, Khandesh, Nasik, and Dharwar districts, but elsewhere they have withered or are withering. Preparations for the late crops are in progress in Sholapur. A deficiency of water continues in parts of Sind, but the river is now rising. The water-supply is also failing in parts of Sholapur and Belgaum. Fodder is scarce in parts of Sind, Gujerat, Kathiawar, Belgaum, and Baroda territory and is getting dearer in Sholapur and Satara. Agricultural stock is generally in fair condition. Prices have risen in sixteen districts, fallen in one, but are stationary elsewhere. Relief works are about to be opened in Ahmedabad, and some relief is being given in the Sind desert.

**Bengal.**—*For week ending 28th August.*—The rainfall during the week has been general but moderate; the reports from Chota Nagpur being more favourable than those for last week. The winter rice crop is generally doing well, but in Orissa more rain is still wanted, and conditions in Angul, though somewhat improved, are still threatening. The harvesting of the early rice and jute crops continues. The price of common rice shows no material change during the week. Fodder is generally sufficient, and cattle are for the most part in good condition.

**North-Western Provinces and Oudh.**—*For week ending 30th August.*—Good rain fell during the week in the Himalayan, Central-Submontane, North-Central, South Oudh, Lower Doab, South-Eastern, and Eastern-Submontane districts, where the crops have benefited and prospects are at present favourable.

Elsewhere the rainfall has been light and more rain is badly wanted, especially in the Western-Submontane, Upper Doab, Central Doab, and some of the Bundelkhand districts. Insects are reported to be causing damage in Bareilly, Pilibhit, Jaunpur, and Ballia. The condition of the standing crops is said to be bad in the Aligarh, Muttra, and Jalaun districts, and prospects are becoming worse there. Irrigation is being resorted to wherever practicable. Harvesting of the early autumn crops has begun, but so far the outturn is reported as only moderate owing to excessive rain at the outset or to the break which occurred subsequently. The later sown crops are being weeded, and ploughings for the spring crops have begun in many places. Supplies and fodder continue to be abundant. Prices are rising generally.

**Punjab.**—*For week ending 30th August.*—The rainfall during the week in the Sialkot, Rawalpindi, Peshawar, Dera Ismail Khan, and Lahore districts was fair. Slight showers also fell in Hissar, Delhi, Umballa, and Shahpur. No rain is reported from the Jullundur, Ferozepur, Multan, and Amritsar districts. Sowing of the autumn crops is progressing in Lahore and Dera Ismail Khan, and land is being prepared for the spring crops in Lahore. The prospects of the irrigated crops are reported good from Multan, Amritsar, and Peshawar; fair in Hissar; and average in Lahore, Sialkot, and Rawalpindi. The unirrigated crops have nearly failed in Delhi for want of rain; they are withering in Hissar, Umballa, Jullundur, and Sialkot and are said to be poor in Multan and Amritsar. The condition of the crops in Ferozepur is also reported to be bad. Recent rain has benefited the standing crops in Peshawar and Dera Ismail Khan, but more rain is badly wanted almost all over the Province and especially in the Hissar, Umballa, Amritsar, Sialkot, and Shahpur districts. The condition of cattle is reported to be good, except in a few districts. Fodder is insufficient in Hissar, Delhi, Jullundur, and parts of Lahore and Sialkot; and also in Shahpur and Dera Ismail Khan. The deteriorated rice crop is being used as fodder in Sialkot. Prices—especially of wheat—have risen in all districts, except Multan, where they have fallen one seer per rupee. The price of wheat in Ferozepur was 13 seers per rupee against 18 seers last week. Wheat is selling from 13 to 18 seers, barley 16 to 18, gram  $13\frac{1}{2}$  to 15, maize 16 to 21, rice 12 to  $12\frac{1}{2}$ , great millet 13 to 20, and bulrush-millet 16 to 20 seers per rupee.

**Central Provinces.**—*For week ending 29th August.*—General rain fell during the week. Bilaspur has received  $10\frac{1}{2}$  inches, Raipur  $6\frac{1}{2}$  inches, Sambalpur 5 inches, Bhandara  $4\frac{1}{2}$  inches, Narsinghpur 4 inches, Chanda and Mandla about  $3\frac{1}{2}$  inches each, Damoh, Jubbulpore, and Hoshangabad 3 inches each, Seoni 2 inches, Nagpur  $1\frac{1}{2}$  inches, and from 1 inch to 28 cents has been recorded elsewhere. Heavy rain is also reported from Balaghat, but the quantity is not stated. No rain fell at the head-quarters of Nimar, but some showers were received in parts of the Khandwa and Harsud tahsils, and Burhanpur received 1 inch. The rain has materially improved prospects, and the condition of the Chhattisgarh rice crop is much better than reported last week, and, with a favourable September, fair crops may now be expected in the Waingunga districts, except in parts of Balaghat. Transplantation has been resumed, and half or nearly half the crop may be saved. In parts of Balaghat and in the rice-growing area of Nagpur the damage done is, however, greater than this. The prospects

of the other autumn crops are fair or good, and *juar* everywhere promises well, but small millets have suffered in Saugor and Chhindwara and more rain is urgently needed in those districts and in Nagpur, Nimar, Jubbulpur, and Betul. The numbers in receipt of village relief on account of previous failures are in Saugor 5,544, Damoh 1,982, and Bilaspur 1,943. Village relief is now being stopped in the plains tracts of Damoh. The first relief necessitated by the effect of the drought is being started in Balaghat, the only district in which general distress has declared itself; but relief has also been sanctioned in local areas in Hoshangabad and Betul. Fodder and water are reported to be scarce in Nimar, Chhindwara, the Nagpur country, and Hoshangabad. Cattle are reported to have sufficient fodder and water since the throwing open of the Government forests, which measure has been adopted wherever necessary. The recent rain has steadied prices in the rice districts and has caused a slight fall in Seoni and Betul, but in Saugor and Chhindwara they are rising. The price of *juar* continues high in Nimar and has risen in Hoshangabad, Nagpur, and Wardha on account of exports. The cheapest prices are—wheat 15, gram 20, rice 17, and *juar* 18½ seers per rupee; the dearest prices are—wheat 10, gram 13, rice 9, and *juar* 13½ seers per rupee. The highest price of the cheapest staple in any district is 11 seers (rice) in Bhandara.

**Burma.**—*For week ending 26th August.*—In Lower Burma ploughing has been completed in Amherst. Sowing and transplanting continue in most districts, but the want of rain retards operations in parts of the Kanoung township of Henzada. Replanting of the areas destroyed by floods is reported from the central township of Tavoy. The standing crops are in good condition. In Upper Burma reaping of sesamum has commenced in Sagaing and the Pale sub-division of the Lower Chindwin, and continues elsewhere. Sowing and transplanting of wet weather paddy continue and reaping of the early paddy crop is in progress in the Shan States and Kyaukse. Ploughing for, and sowing of, the later upland crops continue. The standing crops are in fair condition. More rain is wanted in the Salwin township of Minbu, the Pagan sub-division of Myingyan, the Sagaing sub-division of Sagaing, and in parts, previously reported, of Shwebo and the Ruby Mines districts. Withering crops have revived in parts of the Myingyan sub-division. The price of paddy has risen in Rangoon and seven other districts and fallen in Minbu and the Southern Shan States.

**Assam.**—*For week ending 29th August.*—The weather is hot. Transplanting of late and reaping of early rice and plucking and manufacture of tea are in progress. Prospects of tea are generally good. Cutting of jute continues in Goalpara and Sylhet: the early rice and jute crops have been partly damaged by floods in the former district. Fodder is scarce in places owing to floods. Prices—common rice—Silchar 15 to 16, Sylhet 20½, Dhubri 16, Gauhati 14½, Tezpur 12½, Nowgong 11½, and Sibsagar and Dibrugarh 12 seers per rupee.

**Mysore and Coorg.**—*For week ending 29th August.*—**MYSORE:** Rain-fall—25 cents in the Civil and Military Station and slight showers throughout the rest of the State. The fall has been sufficient for sowing operations, except in the greater portion of Kadur, Chitaldrug, and Shimoga. The standing crops are withering everywhere for want of rain. The price of *ragi* (*Eleusine coracana*)

has risen in Bangalore, Kolar, Hassan, Chitaldrug, and Shimoga. Fodder is reported scarce in Bangalore, Tumkur, Hassan, and Chitaldrug.

**COORG:** Rainfall—4 inches, 25 cents. The transplanting of rice continues, but more rain is required. Prices of food-grains are rising. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 30th August.*—**BERAR:** The average rainfall during the week was 35 cents. The weather is warm and cloudy. The prospects of crops are reported to be fair in parts of the Amraot, Basim, and Wun districts, but are poor elsewhere. More rain is anxiously looked for. Land is being prepared for the winter crop, and sowings are in progress in parts of the Province. Prices are rising. Fodder and water are insufficient.

**HYDERABAD:** Rainfall during the week—67 cents, but this is insufficient to do any material good to the standing autumn and hot weather crops. The rain has, however, saved the crops from withering at present in the Warangal and Bidar divisions. Agricultural prospects are gloomy in the Gulburga division, and rain is urgently wanted to improve the present condition. Cattle are getting lean for want of pasturage and water. Prices of grain are rising. Prices—wheat 8, coarse rice  $8\frac{1}{4}$ , and *jowari*  $17\frac{3}{8}$  seers per current sicca rupee.

**Central India.**—*For week ending 30th August.*—Good rain fell during the week in Bundelkhand and Baghelkhand, none in Bhopawar, and slight to partial in other Agencies. Agricultural operations are in progress in all Agencies, except in Bhopawar. The condition of the standing crops is bad in Malwa and Bhopawar and not good in Gwalior. Pasturage is bad in Malwa and Bhopawar and fair to good in other Agencies. Prices are normal in Bhopal and Bhaghelkhand, but are rising in other Agencies.

**Rajputana.**—*For week ending 30th August.*—Rainfall—77 cents in Meywar, 45 in Abu, 25 in Bundi, 30 in Bikanir, slight in Dholepur and Ulwar, and *nil* elsewhere. Agricultural operations are at a standstill, and *barani* crops are withering for want of rain. Cattle are generally deteriorating, fodder being very scarce. Prices are rising in fifteen States and are steady elsewhere. During the week 223 persons emigrated from Ajmere and 749 from Merwara. The total emigration from Ajmere-Merwara to date numbers 8,757. The numbers employed on relief works were—Marwar 7,261 and the Beawar tahsil 15,249. On ordinary works—Merwara 100 and on gratuitous relief—Beawar 261 and Todgarh 399. Prices—Marwar  $8\frac{3}{4}$ , Ajmere 11 to  $13\frac{1}{2}$ , and Beawar 12 to 15 seers per rupee. Prospects are generally the same as previously reported.

**Kashmir.**—*For week ending 29th August.*—Some rain fell during the week, but the weather is now fine and the prospects of the autumn crops are excellent. Prices continue below normal. The price of rice is 27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 30th August.*—Slight rain fell during the week. Prices are rising. Prices—wheat from 15 to 18 and maize 23 to 29 seers per rupee. The condition of the standing crops is fair. Fodder is sufficient.

**Nepal.**—*For week ending 26th August.*—Rainfall—1·15 inches. The weather has been cold and cloudy. Indian corn has been gathered, but the outturn is poor. The rice crops are doing well. The price of rice is 8½ seers per rupee.

T. W. HOLDERNESS,  
*Secretary to the Government of India.*

*Rainfall summary for past seven days, based on the India Daily Weather Reports.*

Rain has fallen daily in Burma, Assam, and Bengal, though it has been lighter than usual in the first named Province. Between the 25th and 27th there was little rain over the Central Provinces or the North-Western Provinces, but on the 28th a storm crossed the Orissa Coast and a fair burst of rain was received over these regions, which, however, has now completely ceased. Showers, daily becoming lighter, have been received along the West Coast during the week, and the East Coast had showers on the 25th. The interior of the Peninsula, Gujarat, Sind, Rajputana, and the Punjab have received practically no rain, though showers are reported at Verawal and Bhuj this morning.

SIMLA;  
The 31st August, 1899.

SUPPLEMENT TO

# The Gazette of India.

---

No. 36. } CALCUTTA, SATURDAY, SEPTEMBER 9, 1899.

---

## OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

---

GOVERNMENT OF INDIA.  
DEPARTMENT OF REVENUE AND AGRICULTURE.

IMPORTS OF COTTON, WHEAT, LINSEED, INDIGO, JUTE, TEA, AND RICE.

Quantity (in hundredweight) of COTTON imported by rail and river and by sea into Calcutta, the City of Bombay, and Karachi, in June 1899, and from 1st January to 30th June 1899, and in the corresponding periods of 1897 and 1898.

J. E. O'CONOR,  
Director-General of Statistics.

T. W. HOLDERNESS,  
Secretary to the Government of India.

Calcutta, the 8th September 1899.

GOVERNMENT OF INDIA.  
HOME DEPARTMENT.

CHANGE IN THE DESIGNATIONS OF CHAPLAINS ON THE ESTABLISHMENT OF THE  
CHURCH OF SCOTLAND SERVING IN INDIA.

NOS. 386—401.

*Extract from the Proceedings of the Government of India in the Home Department (Ecclesiastical),—under date Simla, the 8th September, 1899.*

Read—

Despatch from the Secretary of State to the Government of India, No. 89 (Public—Ecclesiastical), dated the 20th July 1899, and enclosures, on the subject of the nomenclature of Chaplains on the Establishment of the Church of Scotland in India.

RESOLUTION.

The designations of Chaplains on the Establishment of the Church of Scotland serving in India are at present:

1. *Chaplains on probation*—for the first three years;
2. *Assistant Chaplains*—for the next ten years;
3. *Chaplains*—after thirteen years; and
4. *Senior Chaplains*—one for each Presidency.

The Government of India desire to give effect to a suggestion made by the General Assembly of the Church of Scotland that the nomenclature of the Scottish Chaplains on the Indian Establishment should be assimilated, as far as possible, to that of the Chaplains of the Church of England, and they are accordingly pleased to direct that the following designations for Chaplains of the Church of Scotland shall be adopted in future:

1. *Chaplains on probation*—for the first three years, as at present;
2. *Junior Chaplains*—for the next ten years;
3. *Senior Chaplains*—after thirteen years; and
4. *Presidency Senior Chaplains*.

[True Extract.]

A. H. L. FRASER,

*Offg. Secretary to the Government of India.*

ORDER.—Ordered, that a copy of this Resolution be forwarded to all Local Governments and Administrations, to the Military Department, to the Metropolitan, and to the Senior Chaplain, Church of Scotland, <sup>Calcutta</sup><sub>Madras</sub><sub>Bombay</sub>, for information.

Ordered, also, that the Resolution be published in the Supplement to the *Gazette of India*.

By order,

R. NATHAN,

*Under Secy. to the Govt. of India,*

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on  
Saturday, September 2nd, 1899.

The chief feature in the meteorology of the past week was the rainfall given by the shallow depression, which had formed off the Orissa Coast on Friday of the preceding week. It remained unchanged in position till Monday morning, when it commenced to move in a west-north-westerly direction, and crossed the coast near Puri. It had apparently filled up slightly during the preceding twenty-four hours, and on Monday morning was a shallow depression of feeble intensity with pressure only about a tenth of an inch in defect in its central area. After crossing the coast it advanced in a north-westerly direction, and on Tuesday morning was central to the north-west of Sambalpur. It was unchanged in character and covered a large tract of country. It had given light to moderate general rain in the Central Provinces, Central India and the adjacent districts of the North-Western Provinces. Cawnpore had received 4.33 inches, Sutna 2.51 inches, Nowgong 1.96 inches, Hoshangabad 1.80 inches and Jubbulpore 1.31 inches. The storm took an unusual course during the next twenty-four hours, and travelled in a north-easterly direction into Bihar, and on Wednesday morning was central to the east of Gaya. It had again given light to moderate rain to the Central Provinces, Central India and also to the greater part of the North-Western Provinces. The amounts received were, however, not so large as on the preceding day, the only stations at which falls exceeding an inch had been registered being Nowgong 2.19 inches, Raipur 1.96 inches, Benares 1.17 inches and Allahabad 1.10 inches. On Thursday morning only a shallow residual depression remained lying over Central Bengal, the storm having moved in an easterly direction and having practically filled up. Moderately heavy rain had fallen in Bengal, the principal amounts reported being Jalpaiguri 2.36 inches, Dinajpur 1.87 inches and Chaibassa 1.81 inches. This storm was remarkable for the unusual course it followed, as storms of the monsoon period do not move in a north-easterly direction except occasionally at the end of the rains. The Arabian Sea monsoon current failed to feed into the depression, and it was hence sustained almost entirely by the Bay current, which would account for its failure to advance in the usual westerly or north-westerly direction.

After the storm had filled up the break in the rains was more pronounced than it had yet been. Rain decreased in Burma and Bengal, and on Friday and Saturday all other parts of the country were practically rainless, no rain whatever being reported from Malabar and the Konkan on Friday, and only 0.02 inch from Mangalore on Saturday. A few light showers were received in Gujarat and Mysore.

The mean temperature for the whole of India has again been steadily in excess throughout the week, but the excess has not been so large this week in the North-Western and Central Provinces. In Gujarat the showers received at the end of the week reduced temperature to below the normal on Friday and Saturday.

**Daily Summary.**—*Sunday, August 27th.*—The barometer had fallen briskly over the North Circars and eastern districts of the Central Provinces, and the depression shown lying off the Circars and Orissa Coasts on Saturday morning had intensified slightly. Mean temperatures were in excess in all parts of the country, except Burma and Orissa, where they were normal. Light to moderate general rain had fallen in Burma and North-East India, with the exception of Assam and North Bengal, and showers had been received on the Mussooree Hills, the West Coast and in the Central Provinces and East Peninsula.

*Monday, August 28<sup>th</sup>.*—Pressure had risen briskly in Bengal and over the east of the Bay, and the depression over the Orissa and Circars Coasts had advanced in a west-north-westerly direction, and the centre was crossing the coast near Puri. Temperatures were normal in Burma, Assam, Orissa, Chota Nagpur, the Central Provinces, Mysore and on the Madras Coast; and in excess elsewhere. Light to moderate rain had fallen in Burma, Bengal, the Central Provinces and Central India, and rain was extending up the Gangetic Plain. Showers had been received on the Mussooree Hills, the West Coast and in South Rajputana and the East Peninsula.

*Tuesday, August 29<sup>th</sup>.*—The shallow depression crossing the Orissa Coast the day before had advanced in a north-westerly direction and was central to the north-west of Sambalpur. Baric gradients were steeper over the Peninsula and the south of the Bay. Temperature was in considerable to large excess in Rajputana, Gujarat, the Punjab and Central India, but was normal in the North-Western Provinces, Central Provinces, Burma, Assam, Bengal, Chota Nagpur, Sind, Mysore and on the Madras Coast. Light to moderate rain had fallen in Burma, the Central Provinces, Central India and the adjacent districts of the North-Western Provinces and light rain over the greater part of Bengal.

*Wednesday, August 30<sup>th</sup>.*—The depression in the Central Provinces had advanced in a north-easterly direction into Bihar and was central to the east of Gaya. It was filling up slowly. Temperature was normal in Burma, Bengal, Orissa, Chota Nagpur, the North-Western Provinces, Sind and the Central Provinces and in excess in other provinces. Light rain had fallen in Burma and Bengal, and light to moderate rain in the Central Provinces, Central India and the greater part of the North-Western Provinces.

*Thursday, August 31<sup>st</sup>.*—The depression in Bihar had moved in an easterly direction and had practically filled up, only a shallow residual depression being shown lying over Central Bengal. Temperature had risen in several provinces and was in excess in all except Bengal, Sind, Gujarat and on the West Coast, where it was normal. Light rain had been received in Burma and moderate rain in North-East India. Very light showers had fallen in the Konkan and Gujarat.

*Friday, September 1<sup>st</sup>.*—Pressure had changed by small amounts showing a downward tendency in Burma, the south and west of the Peninsula and North Bombay, and an upward tendency over the remainder of the country. Temperature had fallen in Gujarat and Rajputana; and was in slight defect in Gujarat and Bihar, and normal in Assam, Bengal, Orissa and Sind. The whole of the Indian region had been practically rainless, with the exception of Burma and Bengal, and the only areas in which rainfall had been moderately heavy were North and East Bengal. A few light showers had fallen in Gujarat.

*Saturday, September 2<sup>nd</sup>.*—The barometer was steady or had risen by small amounts over the whole country. Temperature had risen in Bengal, and had fallen slightly in Assam and Sind; and was in slight defect in Assam and Gujarat, and normal in Bengal and Sind. In all other provinces it was in excess. Rain had again decreased in Bengal, but had increased slightly in parts of Burma. A few light showers had fallen on the Nilgiris, in Mysore and Gujarat.

**Temperature.**—The rain given by the depression in the Central Provinces caused a rapid fall of temperature in Chota Nagpur, the eastern districts of the Central Provinces, the east of Central India and the adjacent districts of the North-Western Provinces. The fall was, however, only temporary, and by the end of the week temperature was again in excess in all the above areas, except the eastern districts of the North-Western Provinces, where showers continued up to Friday. The showers reported from Gujarat on Thursday, Friday and Saturday were very light, but they caused a large fall of temperature. Mean temperatures in Gujarat averaged  $2\frac{1}{2}^{\circ}$  in excess on Wednesday, but on Friday they averaged  $2^{\circ}$  below the normal.

The largest changes in temperature during the week occurred in Gujarat, Berar, Mysore and on the Madras Coast. The most rapid was a fall in the mean temperature of Berar from  $+6.8^{\circ}$  on Sunday to  $+1.8^{\circ}$  on Monday.

The mean temperature of the whole week was normal in Burma, Assam, Bengal, Orissa, Bihar and Sind and was in excess in all the remaining provinces. The largest excess occurred in Rajputana ( $7.3^{\circ}$ ), Berar ( $4.7^{\circ}$ ) and the Punjab ( $4.1^{\circ}$ ). The excess was slight in Chota Nagpur ( $1.2^{\circ}$ ), North-Western Provinces ( $1.8^{\circ}$ ), Gujarat ( $1.3^{\circ}$ ), the Central Provinces ( $1.7^{\circ}$ ) and on the West Coast ( $1.3^{\circ}$ ). In the remaining provinces the excess ranged from  $2.3^{\circ}$  in Mysore to  $3.4^{\circ}$  in the Madras Deccan and South India.

The following table gives the mean temperature variation data for the week :

| PROVINCE.                         | AUGUST 1899. |      |      |      |      | SEPTEMBER 1899. |      | Mean variation of week. |

| Madras Deccan . . . . .           | +2.1         | +3.3 | +2.2 | +1.9 | +3.8 | +4.6            | +5.9 | +3.4                    |
| South India . . . . .             | +3.4         | +2.7 | +2.8 | +3.3 | +3.3 | +4.5            | +4.1 | +3.4                    |
| Mean for whole of India . . . . . | +2.6         | +2.2 | +1.7 | +1.9 | +2.3 | +2.5            | +2.8 | +2.3                    |

The mean temperature for the whole of India was, as last week, in excess throughout the week, but the excess was not so large. It ranged from  $1.7^{\circ}$  on the 29th August to  $2.8^{\circ}$  on the 2nd September. For the whole week the variation from the normal averaged  $+2.3^{\circ}$ .

**Rain**—The chief feature in the rainfall distribution of the past week was the favourable rain given to the east and central divisions of the Central Provinces and the adjacent districts, by the cyclonic storm which crossed the Orissa Coast on Monday. Rain fell over the whole of the Central Provinces, but was heaviest in the east and central divisions, in both of which the week's rainfall exceeded the normal. In the following stations in this area more than 5 inches of rain was received during the week: Lanji (Balaghat) 7.57 inches, Narsingpur 6.60 inches, Dhamtari (Raipur) 5.36 inches and Tirora (Bhandara) 5.21 inches.

Heavy rain was also received in the Jeypore hill tracts on the North Madras Coast, the station of Pottanghi receiving  $8\frac{1}{2}$  inches during the week, 4.30 inches of which fell on one day, the 1st September.

With the exception of Upper Burma, Chota Nagpur and South Bihar, the week's rainfall has been fairly normal or in excess in all divisions of Burma, Assam and Bengal. In the North-Western Provinces it has also been normal or in excess in all but the west, west submontane and hills divisions; and in the

Central Provinces it has been normal in the central and in slight excess in the east division.

With the single exception of the Jeypore hill tracts, the week's rainfall has been in defect in all other parts of the country. Actually or practically no rain has fallen in the South, Central and West Punjab, Khandesh, Sind, Baluchistan Hills, Rajputana, the west division of Central India and the south and central divisions of Madras.

The last three columns of the table at the end show that, with the exception of Upper Burma, where it is in slight defect, the rainfall of the period June 4th to September 2nd is normal or in excess in all the divisions of Burma, Bengal, Assam and the North-Western Provinces.

In all other parts of India rainfall has been in general defect. It is less than 20 per cent. in defect, and therefore practically normal, in only the following divisions: the Punjab Hills and North Punjab, the east division of the Central Provinces and the North Madras Coast. The deficiency exceeds 60 per cent. in Mysore, Berar, the whole of North Bombay, West Rajputana and Madras (Central).

The following were the principal large totals received at individual stations during the week:

|                  |                                 |               |
|------------------|---------------------------------|---------------|
| Assam . . . . .  | Sunamganj (Sylhet) . . . . .    | 17.29 inches. |
|                  | Sylhet . . . . .                | 13.03 "       |
|                  | Cherra Poonjee . . . . .        | 30.31 "       |
| Bengal . . . . . | Denkata (Cooch Behar) . . . . . | 15.55 "       |

W. A. BION,  
for Meteorological Reporter to the  
Government of India.

SIMLA, 7th September, 1899.

T. W. HOLDERNESS,  
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 2nd September.*—The rainfall of the week has been moderate in the Circars with light scattered showers elsewhere, except in parts of the Central districts, where fair rain fell on the 2nd instant. The water-supply is generally deficient and the Cauvery is still low. Except in the Circars sowings have again been retarded. The standing crops are fading in most parts, except where irrigated. Small crops under irrigation and early gingelly have been harvested, the yield being moderate. Pasturage is generally scarce, but fodder is sufficient in most places. Prices have risen generally, except in the extreme South, and sharply in parts of the Deccan and the Central districts, owing partly to the demand for export. Since the close of the week good showers have fallen in many parts of the Deccan and generally in the Central districts, but more rain is urgently wanted everywhere.

**Bombay.**—*For week ending 6th September.*—Rain fell during the week in all districts of the Presidency, except in Sind; but the falls have been insufficient everywhere, except below the Ghât tracts of Kanara, where they were moderate. More rain is urgently wanted to save the remaining early crops and for late sowings. The standing crops are in fairly good condition in Sind, parts of Nasik, and the Ghât tracts above Kanara; but elsewhere they have withered or are withering. Preparations for the late crops are in progress in Sholapur. Crops have been injured by insects in the Tatta taluka, by rats in the Shahbandar taluka and in Karachi, by maggots in one taluka of Hyderabad, and by high winds in one of Thar and Parkar. A deficiency of water continues in parts of Sind. Fodder is insufficient in Kaira, Khandesh, Poona, and parts of Shikarpur, scarce in parts of Sind, Guzerat, and Kathiawar, and is getting dearer in Ahmednagar, Satara, and Belgaum. Agricultural stock is generally in fair condition. Prices have risen in eight districts, fallen in six, and are almost stationary elsewhere. Relief works are about to be opened in Kaira and the Panch Mahals, and some relief is being given in the Sind desert.

**Bengal.**—*For week ending 4th September.*—The rain during the week was moderate in amount, but general in its distribution. The transplantation of winter rice is being rapidly completed and the reports on the crops are generally good. More rain is, however, still required in Puri and Angul and in the Chota Nagpur division. Some slight damage by insects is reported from Cuttack and Puri. Early rice is being harvested and jute is being cut and steeped. The autumn rice harvest in Behar is yielding a poor outturn as was expected. The price of common rice has fallen in some districts, but on the whole it is practically stationary.

**North-Western Provinces and Oudh.**—*For week ending 6th September.*—Rain fell during the week in almost all districts, but its distribution has been very unequal. The falls have been good in two of the Himalayan districts and in the North-Central, Central Submontane, Lower Doab (South), South-Eastern, Eastern Submontane Oudh, and Bundelkhand districts. A heavy fall of nearly eight inches on one day is reported from the Hata tahsil of the Gorakhpur district; but elsewhere the falls have been light and in some cases too light to be of any real benefit, especially in the Western Submontane districts (excepting Bareilly), the Upper Doab, and two of the Central Doab districts. More rain is urgently needed in this area for the standing crops which are suffering from drought. The crops have generally benefited by the recent rainfall, but the break which has set in, accompanied by high west winds, is causing anxiety in the

Western districts. Damage has been caused to the crops, especially rice, by insects in about a dozen districts and by excessive rain in Azamgarh. Harvesting of the early autumn crops and ploughing for the spring crops continue. Prospects are generally fair, except in some of the Western districts, where considerable damage to the crops has been already caused by the drought. Supplies and fodder are sufficient. Prices continue to rise in a few districts, but they are stationary elsewhere.

**Punjab.**—*For week ending 6th September.*—Slight showers fell during the week in the Hissar, Amritsar, and Sialkot districts, but in Rawalpindi the rainfall was satisfactory. No rain is reported from other districts. The autumn sowings are proceeding in Dera Ismail Khan and maize is being sown in parts of the Peshawar tahsil. Land is being prepared for the spring sowings in Lahore. Mooltan and Peshawar are the only districts which have reported the standing crops to be in fair condition, but taken as a whole the irrigated crops are said to be average in the remaining districts. The unirrigated crops are, however, generally much below the average. In Hissar three-fourths of the unirrigated crops have withered, and their prospects in the Delhi, Umballa, Jullundur, Ferozepur, Amritsar, and Sialkot districts are reported to be very poor indeed. The crops in Rawalpindi are also below the average. Rain is still wanted in Shahpur. On the whole the autumn crops of 1899 are reported to be much below the normal. The crops in Lahore and Ferozepur have to some extent been damaged by insects. Cattle are getting out of condition for want of fodder in Hissar, Delhi, Sialkot, and parts of Rawalpindi and Dera Ismail Khan. There is a scarcity of fodder in Hissar, Delhi, Jullundur, Amritsar, Sialkot, Shahpur, and Dera Ismail Khan. The price of wheat has risen in Hissar, Umballa, Lahore, Sialkot, and Rawalpindi, it is stationary in Delhi, Ferozepur, Mooltan, Amritsar, and Shahpur, and has fallen in Jullundur, Peshawar, and Dera Ismail Khan. The price of gram has risen in Hissar, Delhi, and Umballa and of maize in Umballa, Rawalpindi, and Peshawar. Wheat is selling from 12 to 18½, barley 18 to 20, gram 13 to 14½, maize 16 to 20, rice 11 to 12, great millet 11 to 19½, and bulrush-millet 16 seers per rupee.

**Central Provinces.**—*For week ending 5th September.*—Some rain fell at the beginning of the week, but the last five days have been hot and dry. Narsinghpur and Raipur received over 2½ inches each, Balaghat over 1½ inches, and Hoshangabad nearly an inch. In Damoh, Nagpur, Chhindwara, Seoni, and Chanda showers have given a third to half an inch, but elsewhere the week has been practically rainless with heavy dews in Damoh, Jubbulpore, and Betul. Outside Chhattisgarh, where the rice crop can hold out for about a week more, the standing crops have begun to deteriorate. The crops are also withering on light soils and insects are doing increasing damage. *Jowar* is holding out well still, but the smaller millets have suffered greatly, especially in the hilly tracts. Distress is extending in Betul and Hoshangabad and is beginning to show itself in small parts of Jubbulpore and Nagpur and in one tahsil of Nimar. The situation in the Waingunga rice districts has not altered much since last week, but rapid deterioration must follow another week's drought. Rain is urgently needed throughout the Province. The numbers in receipt of relief on account of previous failures are in Saugor, Damoh, and Bilaspur, 5,678, 1,982, and 2,198 persons respectively. Relief measures necessitated by the present drought have been started in parts of Betul and Hoshangabad. Preparation of land for winter sowings has been completed in Narsinghpur and is in progress in Chhindwara and Nagpur. Fodder and water are reported scarce in parts of Nimar, Betul, Chhindwara, the Nagpur country, and Hoshangabad. Cattle are in poor condition in Nagpur. There has been a general and sharp rise in prices during the week in Bilaspur. Though the prices of gram and rice have fallen they are still above the normal. The cheapest prices are—wheat 15½, gram 19, rice 16, and *jowar* 16 seers per rupee; the dearest prices are—wheat 9½, gram 12, rice 8½, and *jowar* 12 ½ seers per rupee. The highest price of the chief staple in any districts is 8½ seers (rice) in Chanda, but *jowar* is selling at 14 seers in that district. The price of *jowar* in Wardha has risen from 18 to 13 seers per rupee.

**Burma.**—*For week ending 2nd September.*—In Lower Burma transplanting is nearly completed, but ploughing continues in Prome, Tharawaddy and Henzada. Prospects are reported to be good. Slight damage has been caused by floods in two townships of the Tharawaddy district. In Upper Burma reaping of early sesamum is nearly completed in Yamethin and Myingyan and is progressing in other districts. Reaping of early paddy continues in Kyaukse and the Northern Shan States and sowing and transplanting of the wet weather paddy crop in most districts. Sowings have been completed in Bhamo and Meitkyina, but transplanting operations have hardly commenced in parts of Pakkoku and are delayed for want of rain in parts of the Mindon township of the Thayetmyo district. Sowing of late sesamum, *jowar* and peas in the uplands continues. The standing crops are in fair condition, but more rain is wanted in parts of the Amarapura township of Mandalay, the Tagoung sub-division of the Ruby Mines district, parts of the Sagaing district and especially in the Pagan sub-division of Myingyan. Prospects have improved in Shwebo. Inundation threatens damage in two townships of Mandalay. The outturn of the early harvest, excepting maize, is poor in Meiktila. The price of paddy has risen in Rangoon and six other districts, and has fallen in Mandalay, Myingyan, Pakkoku and Prome.

**Assam.**—*For week ending 5th September.*—The weather is hot and rainy. Transplanting of late and reaping of early rice and plucking and manufacture of tea are in progress. Prospects of tea are generally good, except in Sylhet, where the weather is too cold. Cutting of jute continues in Goalpara and Sylhet; the early rice and jute crops have been partly damaged by floods in the former district. Prospects of sugarcane are fair. Fodder is scarce in most of the plains districts owing to floods. Prices—common rice—Silchar 14½ to 15, Sylhet 19, Dhubri 17, Gauhati 13, Tezpur 12½, Nowgong 11½, Sibsagar 11, and Dibrugarh 12 seers per rupee.

**Mysore and Coorg.**—*For week ending 5th September.*—**MYSORE:** Rainfall 51 cents. in the Civil and Military station. Good rain also fell in parts of the Kadur district and slight showers elsewhere. The standing crops are still reported to be withering all over the State, except in parts of the Mysore and Hassan districts, where there has been seasonable rain. Prospects and sowing operations in the Mysore district are encouraging. *Ragi* (*Eleusine coracana*) has been sown in parts of the Kolar, Tumkur, Chitaldrug and Mysore districts. Prices have fallen slightly in Kadur and risen in Kolar and Bangalore. Heavy rain has fallen at Bangalore and probably elsewhere since the close of the week under report.

**COORG:** Rainfall—1 inch 46 cents. The transplanting of rice has been retarded in many places and the rice plants have been damaged in parts for want of rain. Cardamom-picking has commenced. Prices of food-grains are rising. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week, ending 6th September.*—**BERAR:** The average rainfall during the week was 34 cents. The weather continues warm and cloudy. The standing crops are in very poor condition and have been utterly destroyed, except in the Wun and Basim districts, where they are in fair condition. More rain is urgently required. Preparation of land is in progress but sowings generally have almost stopped. Weeding continues. A scarcity of fodder and water prevails in all districts. Prices show a tendency to rise.

**HYDERABAD:** Rainfall during the week—43 cents. Agricultural prospects have not been improved generally by the recent rain, though it has saved the withering autumn crops in parts of the Indur, Warangal and Elgandul districts. The condition of the standing crops in the Gulburga division is going from bad to worse. The autumn rice crop is not yet sown except in lands irrigated by wells. Preparations for the spring sowings are in progress, but rain is most urgently needed for the standing crops and future sowings. Cattle are getting weak and emaciated owing to a scarcity of water and pasture. Prices of grain have slightly risen. Prices—wheat 8, coarse rice 8, and *jowari* 17 seers per current sicca rupee.

**Central India.**—*For week ending 6th September.*—The rainfall has been general in Bundelkhand and Baghelkhand, partial in Malwa, and *nil* in other Agencies but the quantity has been insufficient in all Agencies, except the two first named. The condition of the standing crops is good in Bundelkhand and Baghelkhand, fair in Bhopal and bad in other Agencies, especially in Bhopawar. Pasturage has withered up in Malwa and Bhopawar and is bad in Gwalior. Agricultural stock is in good condition in Bundelkhand and Baghelkhand, fair in Bhopal and bad in Bhopawar. Prices are normal in Bhopal and Baghelkhand, and rising in other Agencies.

**Rajputana.**—*For week ending 6th September.*—Rain ranging from a quarter of an inch to half an inch is reported to have fallen at Pertabgarh Bundi, Jaipur, Alwar and Bharatpur. Slight showers also fell in Ajmer and Dholepore but none elsewhere. Agricultural operations are generally at a standstill. The standing crops are withering for want of rain. Prospects are bad. Cattle are suffering for want of fodder. Prices are rising in ten States and are steady elsewhere. 1,191 persons emigrated from Ajmer and Merwara during the week. The total emigration from Ajmer-Merwara to date numbers 9,948. The numbers employed on relief works in the Merwara district were—30,034. On ordinary works 100 and on gratuitous relief 961. Relief works were opened during the week in the Tonk State. Prices—Ajmer 12 and Beawar 11 seers per rupee.

**Kashmir.**—*For week ending 5th September.*—Some rain fell during the week. The weather is now fine and prospects of the autumn crops are excellent. Prices continue below normal. The price of rice is 27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 6th September.*—No rain fell during the week. Prices are rising. Prices—wheat from 14 to 17 and maize 23 to 28 seers per rupee. The condition of the standing crops is fair in irrigated tracts, but in the *Kandhi* tracts the crops are withering. Rain is badly wanted. Fodder is getting scarce.

**Nepal.**—*For week ending 2nd September.*—Rainfall—2·36 inches. There have been some heavy showers of rain at night but the days are generally clear. Upland rice is doing well but lowland rice requires more rain. The price of rice is 8½ seers per rupee.

T. W. HOLDERNESS,  
Secretary to the Government of India.

*Rainfall summary for the past seven days, based on the India Daily Weather Reports.*

The weather has been very settled over India during the past week. Moist winds from the Bay have given light to moderate daily rain over Burma, Assam and North and East Bengal. There has been no monsoon over the Arabian Sea and there has been no heavy rain over those parts of India which are dependent on that current for rainfall. South-westerly winds, however, gave showers to Kathiawar between the 2nd and 5th September. A local shower was received at Ajmer on the latter date and light showers in different parts of Rajputana on the 7th. Thundershowers commenced in Mysore on the 2nd and showery weather subsequently extended over Madras and the Deccan districts and still continues there. Falls of rain exceeding 1 inch in twenty-four hours were reported from Mysore and Bangalore on the 4th, from Cuddapah and Trichinopoly on the 5th, from Chitaldroog, Bangalore, Bijapur, Amraoti and Bellary on the 6th, and from Cuddalore on the 7th. Between the 4th and 6th thunderstorms gave light rain to parts of the Punjab, especially in the Northern districts.

The week's rainfall has been in defect in all Provinces. The seasonal rainfall is in excess in Bengal and Assam, normal in the North-Western Provinces and in defect elsewhere.

SIMLA;  
The 7th September, 1899. }

SUPPLEMENT TO  
**The Gazette of India.**

No. 37.]

SIMLA, SATURDAY, SEPTEMBER 16, 1899.

OFFICIAL PAPERS.

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

EXECUTION OF LEASES OF BUILDING SITES IN CANTONMENTS.

NOS. 1360—1372.

*Extract from the Proceedings of the Government of India in the Home Department (Judicial),—under date Simla, the 15th September, 1899.*

Read again the undermentioned papers on the subject of the execution of deeds, contracts and other instruments on behalf of Her Majesty's Secretary of State for India in Council:

Home Department Resolution No. <sup>1st Judicial</sup><sub>485—501</sub>, dated the 28th March 1895.

Home Department Resolution No. <sup>2nd Judicial</sup><sub>141—152</sub>, dated the 15th February 1897.

Letters to the Governments of Bombay and Burma, Nos. 139 and 140 of the same date.

Letter to the Government of Madras, No. 697, dated the 31st May 1897.

RESOLUTION.

In exercise of the power conferred by the East India Contracts Act, 1870 (33 and 34 Vict., c. 59), and of all other powers enabling him in this behalf, the Governor General in Council is pleased, in supersession of existing orders on the subject, to declare that the undermentioned classes of instruments referred to in

section 2 of the Government of India Act, 1859 (22 and 23 Vict., c. 41), may be executed as follows :

Leases of building sites on Government } By the Principal Staff Officer of the  
lands in cantonments. } Command.

---

ORDER.—Ordered that the above Resolution be communicated to all Local Governments and Administrations and to the Military Department and the Department of Revenue and Agriculture for information.

Ordered, also, that it be published in the Supplement to the *Gazette of India*.

[True Extract.]

A. H. L. FRASER,

*Offg. Secretary to the Government of India.*

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on  
Saturday, September 9th, 1899.

No important changes have occurred in the weather conditions during the past week. The break in the rains has continued and has as before been most marked in North-Western and Central India. Temperature has in consequence been in excess, and the excess has been most marked in the areas in which the drought has been most pronounced. Winds have been unusually feeble, and on the West Coast have been very irregular in direction. In the Bay, calms have prevailed at several of the coast stations: at Diamond Island a calm was reported at 8 A.M. on four successive days—a most unusual occurrence for this season of the year. The daily changes in pressure have generally been small in amount and have not affected the weather to any important extent. A change was observable in the distribution of pressure from Tuesday when pressure became more uniform, especially over the Peninsula and the Bay, baric gradients being slighter. On Tuesday, Wednesday and Thursday the difference in pressure between Cape Comorin and Peshawar was barely one-tenth of an inch. On Friday the gradients were steeper, as pressure had given way rapidly in the North and West Punjab, thus reducing pressure to slightly below the normal in that area. As, however, there had been a simultaneous, though smaller, fall of pressure in the south, gradients were still slighter than usual.

Rain decreased in amount in Bengal and Burma towards the close of the week, and the directions of the winds round the north of the Bay on Saturday showed that a depression was in course of formation off the Circars Coast. The principal feature in the week's rainfall distribution was the determination, by the excess of pressure in the north, of humid winds to the south of the Peninsula, where they gave favourable showers to South India, Mysore and parts of the Deccan. The West Coast districts, however, remained practically rainless, and the winds at the coast stations were principally from abnormal northerly directions. It therefore appears probable that there was an indraught of humid winds from the Arabian Sea in the middle strata of the atmosphere which was not perceptible at the coast stations, and this current probably acquired a sufficient ascensional movement in crossing the Western Ghats to cause precipitation over the high table-lands of the interior.

**Daily Summary.**—*Sunday, September 3rd.*—The barometer had risen slightly to briskly in Northern India, slightly in Burma and the Central Provinces, and had been steady over the southern half of the Peninsula. Temperature had fallen briskly to rapidly in Mysore and South India, and had risen in Orissa, Rajputana and Gujarat. The only provinces in which temperature was not in excess were Assam, where it was in slight defect, and Bengal, Sind and Gujarat, where it was normal. Light to moderate rain had fallen in Burma, Assam, North and East Bengal and North Bihar. Showers had been received in Mysore, Gujarat and South India.

*Monday, September 4th.*—Pressure had fallen slightly in Bengal and had been steady elsewhere. Temperatures continued in general excess. They were in slight defect in Gujarat and were normal in Burma, Assam and Sind. Light to moderate rain had fallen in Burma, Assam and Bengal, but none had fallen in Orissa, Bihar and Chota Nagpur. Showers had been heavier in Mysore and more general in Madras; and a few showers had fallen in the North Punjab, the Upper India Hills, the Central Provinces and Gujarat.

*Tuesday, September 5th.*—The barometer had been steady in the south of the Peninsula and Tenasserim and had risen elsewhere, the rise being brisk to

rapid in the Punjab and brisk in East Bengal and Arakan. A shallow low pressure area was lying close to the hills in Northern India, and pressure was relatively low in Central Burma. The permanent low pressure area in North-Western India had been displaced southwards, and was lying over the South Punjab and Upper Sind. Temperature had fallen in Mysore, the Madras Deccan and on the Madras Coast. It was normal in Mysore, the Madras Coast districts, South India, Burma and Sind; and in slight defect in Assam and Gujarat. Light to moderate rain had fallen in Burma, Assam and North and East Bengal; and showers had been received in the North-West Himalayas, the North Punjab, Madras, Ceylon, Gujarat, the Central Provinces and Rajputana.

*Wednesday, September 6th.*—The barometer had again risen over the greater part of the country, the rise having been slight to brisk in Northern India. The depression close to the hills in Northern India was unchanged. Mean temperatures were in moderate defect in Assam; and were normal in Burma, the Punjab, Sind, Gujarat, Mysore and the Madras Deccan. The excess in the remaining provinces was largest in the Bombay Deccan. Light to moderate rain had fallen in Burma and Assam, and moderately heavy rain in North Bengal and North Bihar. Favourable rain had fallen in Mysore and parts of Madras, and showers had been received in the western districts of the North-Western Provinces, the Punjab, Ceylon, Bombay Deccan and Berar.

*Thursday, September 7th.*—Pressure had given way over the whole of the Indian region, briskly in Central and Lower Burma, North Bengal, West Punjab and parts of the Peninsula and slightly elsewhere. The low pressure area in Northern India was unchanged and another shallow depression was shown in Burma. Temperatures were below the normal in Assam, Upper Burma and the North-West Punjab; and normal in Sind and Mysore. They were in excess in all other provinces, the largest excess occurring in Rajputana and Berar. Very little rain had fallen. Showers had been received in Burma, Assam, North Bengal, Ceylon, Mysore, the Bombay Deccan, Rajputana and Madras.

*Friday, September 8th.*—Another general fall of the barometer had occurred. The fall had been brisk to rapid in the Punjab, brisk in North Bombay, Rajputana and Berar, and brisk to slight in the south of the Peninsula. Temperature was in slight defect in Assam, normal in the West Coast districts and South India and in excess elsewhere. Showers had fallen along the Tenasserim, Burma and Arakan Coasts, in North Bengal, Assam, Ceylon, Mysore, the Konkan, the Deccan and South India.

*Saturday, September 9th.*—The barometer had risen over the greater part of the country, the rise being brisk in the Punjab, along the hills in Northern India, in Central Burma, Tenasserim and South India. Pressure had been steady over the north-east of the Bay. Temperature was in slight to large excess in all provinces, except Burma and Assam, where it was normal. Mean temperatures averaged  $10^{\circ}$  above the normal in Berar and  $8^{\circ}$  in Rajputana. Light to moderate rain had fallen in Tenasserim and Lower and Central Burma, and showers had fallen in Ceylon, on the West Coast, in the Deccan and South India. Conditions were slightly suspicious over the north of the Bay, where winds were irregularly cyclonic in direction.

**Temperature.**—With the exception of Assam and parts of Bengal in the east, and Sind and Gujarat in the west, temperature has been in considerable to large excess over the whole of Northern and Central India. The excess has been most marked and most persistent in Rajputana, the Central Provinces, Berar and the Bombay Deccan. Mean temperatures were most largely in excess in these provinces and in Central India on Saturday, when the excess averaged  $10^{\circ}$  in Berar,  $8^{\circ}$  in Rajputana,  $7^{\circ}$  in Central India and the Central Provinces and  $5\frac{1}{2}^{\circ}$  in the Bombay Deccan.

The mean temperature for the whole week was in slight defect in Assam, normal in Burma, Sind and Gujarat; and in excess in all other provinces, the excess being slight ( $1^{\circ}$  to  $2^{\circ}$ ) in Bengal, the West Coast, Mysore, the Madras Coast and South India; moderate ( $2^{\circ}$  to  $3^{\circ}$ ) in Bihar, the Punjab and the

Madras Deccan; considerable ( $3^{\circ}$  to  $5^{\circ}$ ) in Orissa, Chota Nagpur, the North-Western Provinces, Central India, the Central Provinces and the Bombay Deccan; and large ( $5^{\circ}$  to  $8^{\circ}$ ) in Rajputana and Berar.

The following table gives the mean temperature variation data for the week :

| PROVINCE.                         | SEPTEMBER 1899. |      |      |      |      |      |       | Mean variation of week. |

| Mean for whole of India . . . . . | +2.8            | +2.4 | +2.0 | +1.8 | +2.3 | +2.9 | +3.7  | +2.6                    |

The mean temperature for the whole of India was from  $1.8^{\circ}$  in excess on the 6th to  $3.7^{\circ}$  in excess on the 9th. For the whole week the mean variation from the normal was  $+2.6^{\circ}$ .

**Rain.**—The chief feature in last week's rainfall was the favourable showers received in the Deccan, Mysore and Madras. Rain decreased in Bengal and was in defect in the following divisions:—Eastern, Deltaic and Central Bengal, Orissa, Chota Nagpur and Bihar. Amounts equal to or exceeding the normal were received in all divisions of Burma, except Tenasserim, where rain was two inches in defect; and rain in excess of the normal was received over the whole of Assam. From Bihar westwards the whole of Northern and Central India received little or no rain, the only division in this tract of country, in which the usual amount of rain was received, being the North Punjab. In the Peninsula either normal or excessive rain was received in the divisions of the Bombay Deccan, Mysore and the whole of Madras, with the exception of the Jeypore hill tracts, but rainfall was below the normal in Malabar, Coorg, the Konkan and Khandesh.

The break in the rains has been most pronounced over the greater part of Northern and Central India, and rain in only small amounts has been received on the West Coast.

Actually or practically no rain has been received in fifteen out of twenty-two divisions in the North-Western Provinces, the Punjab, North Bombay, Rajputana and Central India.

The last three columns of the table at the end show that, with the exception of Upper Burma and the west submontane division of the North-Western

Provinces, the rainfall of the period June 4th to September 9th has been normal or in excess in all the divisions of Burma, Bengal, Assam and the North-Western Provinces. In all the remaining provinces of India rainfall has been generally in defect, the only divisions in which it has been practically normal being the hills and north divisions of the Punjab, the east division of the Central Provinces and the East Coast (North). The deficiency has exceeded 75 per cent. in Gujarat, Kathiawar, Sind, Baluchistan Hills and West Rajputana.

The following were the principal large totals received at individual stations during the week:

|                |                             |               |

T. W. HOLDERNESS,  
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 9th September.*—The rainfall of the week was heavy in the greater part of the Deccan and the Central districts and moderate in other parts of this area and in the Southern districts, but was light in the Carnatic and West Coast districts. The water-supply has improved on account of the recent rain, especially in the Cauvery which has risen to a moderate extent. In the Deccan, the Central, and parts of the Southern districts sowings are proceeding actively and will probably soon overtake arrears; but on the West Coast and parts of the Carnatic and the Circars more rain is much wanted for sowings and the standing crops. Where good rain has fallen the standing crops have been saved and are reviving. Small early harvests are yielding very moderate outturns. Pasturage is improving in many places, and though fodder is growing scarce, it is generally sufficient. Prices are stationary or slightly easier in the Deccan, but are dearer elsewhere and have risen sharply in parts of the Circars.

**Bombay.**—*For week ending 13th September.*—Rain fell during the week in all districts of the Presidency Proper, but none in Sind. There were slight falls also in Guzerat, Kathiawar and parts of the Deccan and moderate falls in the Konkan. The rain has been beneficial to the crops in three districts of the Deccan, two of the Konkan, and two of the Karnatak, but more is urgently wanted in all districts to save the withering crops and start agricultural operations afresh. Preparations for the late crops are in progress in Kaira and Surat and in two districts of the Deccan and three of the Karnatak. The river has fallen in Sind and the water-supply in some canals is deficient. Fodder is insufficient in two districts of Guzerat and three of the Deccan and scarce in parts of Kathiawar, Hyderabad, the Panch Mahals, and Broach. The condition of agricultural stock is good, except in parts of Hyderabad, Ahmedabad, the Panch Mahals, and Poona. Prices have fallen in four districts, are almost stationary in thirteen, and have risen slightly elsewhere. The daily average number on test and relief works for the previous week was as follows:—Ahmedabad 4,100; the Panch Mahals 892; and Kaira 2,684—total 7,676.

*Supplementary Report.*—Good rain is reported in the Karnatak, the Kolhapur Agency, and all districts of the Deccan, except Khandesh. This will benefit the autumn crops where alive and enable spring sowings to be started. It will also improve the water-supply and ensure an early supply of green grass. The situation has been much relieved for the present in the Karnatak, Kolhapur, Poona, Satara, and the greater part of Sholapur and Ahmednagar. More rain is required to make the spring sowings general and to remove anxiety. Test works are in progress in four talukas of Ahmednagar and one of Satara. Fair rain is also reported from Colaba and Ratnagiri and a certain amount also, but not enough, from North Guzerat where relief works are in progress.

**Bengal.**—*For week ending 11th September.*—Good general rain fell during the week in North and East Bengal. Prospects of the winter rice crop continue generally good, except in Angul and Puri, where the rainfall is still very deficient. More rain is also required in the Chota Nagpur division and the west of the Burdwan division. The harvesting of the autumn crops and jute is going on and the preparation of land for the spring crops has begun. Sugarcane is generally doing well. The fodder-supply is sufficient and cattle are generally reported to be in good condition. The price of common rice has risen in some districts.

**North-Western Provinces and Oudh.**—*For week ending 13th September.*—Reports from the Meerut division, from the Western districts of Agra, and from many other districts have not been received owing to the block on the telegraph lines. From reporting districts it appears that there has been no rain or practically none anywhere. Rain is much needed—especially in Bijnor and Moradabad, where the standing crops are suffering seriously. The damage done is less towards the East, and no serious damage appears yet to have been done in Eastern Oudh. The early autumn crops are being harvested and ploughing for the spring crops is going on. The damage from insects is decreasing. Prices are rising owing to the break in the rains and to export.

**Punjab.**—*For week ending 13th September.*—The rainfall in the Rawalpindi district was again satisfactory, but only fair in the Bhiwani tahsil. Moderate showers fell in the Lahore, Bhakkar, Bhera, Kulachi, Kharkpur, and Fatehabad tahsils. The rainfall in the Dera Ismail Khan, Khushab, Ajnala, Sialkot, Hansi, and Sirsa tahsils was normal. The spring sowings have commenced in Mooltan. The recent rain in the Dera Ismail Khan district will be beneficial for the autumn sowings and pasturage. The canal crops are in good condition everywhere, except in the Fazilka tahsil, where  $\frac{2}{3}$ ths of the crop is likely to fail. In the absence of rain the well-irrigated crops in Lahore are said to be below the average. The prospects of the standing crops are reported to be fair only in Dera Ismail Khan, Peshawar, and Mooltan and more or less gloomy elsewhere. In Hissar only a two-anna crop is expected if rain falls within a week. In Delhi the unirrigated crops are said to be in an almost hopeless condition, and they have also suffered considerably for want of rain in Amballa, Jullundur, Ferozepore, Lahore, Amritsar, Sialkot, and Shahpur. The maize crop is being harvested in Amballa and the rice crop in Amritsar. The former crop in Lahore is reported to have been damaged by insects. Cattle are getting out of condition in Hissar, Delhi, Amritsar, Sialkot, Shahpur, and parts of Rawalpindi and Dera Ismail Khan. Fodder is said to be scarce in Hissar, Delhi, Jullundur, and parts of Ferozepore, Mooltan, Amritsar, Sialkot, Shahpur, and Dera Ismail Khan. The sugarcane and maize crops in Sialkot are being used as fodder. The average number of famine workers on test works in the Hissar district is about 16,000. Test relief works are also about to be commenced in Ferozepore. The prices of important food staples have risen in almost all districts. The rise in the prices of wheat, gram, maize, and barley in the Jullundur, Peshawar, Rawalpindi, and Dera Ismail Khan districts has been more than three seers in the rupee. Wheat is selling from  $10\frac{1}{2}$  to 15, barley 14 to 16, gram 10 to 13, maize  $13\frac{1}{4}$  to  $17\frac{1}{4}$ , rice 11 to 12, great millet 11 to 18, and bulrush-millet 16 seers per rupee.

**Central Provinces.**—*For week ending 12th September.*—The weather has been hot and occasionally cloudy over the greater part of the Provinces. Showers have fallen in most districts, but the amounts reported are very small. In Wardha and Nagpur the falls amounted to nearly  $\frac{1}{4}$ ths of an inch; in Mandla, Nimar, Raipur, and Balaghat to about half an inch; but elsewhere the falls have been insufficient. The condition of the standing crops is generally worse than reported last week, and only immediate and good rain can save the rice crops which are deteriorating fast. In parts of Bilaspur rice has not taken root after the completion of thinning operations, in Balaghat the transplanted rice is past recovery in many villages, and broadcast sowings are withering in Seoni. The prospects of the heavy rains are almost hopeless, and the damage to transplanted rice in Bhandara and Chhanda is estimated at 10 and 12 annas respectively. Small millets have suffered seriously in hilly tracts. *Jowar* is doing well in Chhanda and Bhandara, but has begun to suffer elsewhere and urgently needs rain everywhere. Rust is reported to have attacked the crop in Betul and Hoshangabad, and insects are still doing damage to cotton, *sil*, and the smaller millets. In parts of Raipur the damage done by grasshoppers is reported to be serious. Agricultural operations have been suspended or retarded in most districts: employment is getting scarce in consequence, and distress is spreading—especially in Balaghat and the Nerbudda division. The numbers in receipt of village relief on account of previous failures are 2,239 in Bilaspur. (Reports from Saugor and Damoh have not been received.) Relief measures necessitated by the present drought have been started in Balaghat, Betul, Hoshangabad, the Harsud tahsil of Nimar, and parts of Nagpur, Bhandara, and Jubbulpur. Fodder and water are reported scarce in parts of Nimar, Betul, Chhindwara, Hoshangabad, and the Nagpur country; and cattle are reported to be in poor condition in the last named district in consequence. Prices have risen rapidly: the rise is general and is most marked in Betul. The cheapest prices are: wheat 13½, gram 18, rice 15, and *jowar* 15 seers per rupee. The dearest prices are: wheat 9, gram 9, rice 5—in Betul—and *jowar* 10 seers per rupee. The highest price of the chief staple in any district is 8¾ seers (rice) in Chhindwara, but *jowar* is selling at 15 seers in that district. The price of *jowar* in Betul has risen at a bound from 15 to 10 seers. News has since been received of good rain in Jubbulpur, Wardha, Bhandara, Nagpur, and Chhatisgarh.

**Burma.**—*For week ending 9th September.*—In Lower Burma transplanting has been completed in all but eight districts. The prospects of the crops are good. Slight distress is reported to prevail in the Yelamaing township of the Amherst district owing to paddy stocks having run short on account of over-exportation at harvest time and the difficulty of communication during the rains. In Upper Burma reaping of early sesamum has been completed in Yamethin, but continues elsewhere. The early paddy crop is being reaped in Myitkyina, Kyaukse, and the Northern Shan States. Sowing and transplanting of wet-weather paddy are approaching completion, but are delayed on account of floods in parts of Bhamo. The standing crops are in fair condition, but more rain is wanted in Minbu, two townships of the Mandalay district, and the areas previously reported. Floods threaten damage to the paddy crop in parts of the Upper Chindwin, Mandalay, and Thayetmyo. Insects are reported to have attacked the *jowar* crop in the Pagan township of the Myingyan district. The price of paddy has risen in Amherst, Mandalay, and seven other districts, but has fallen in Shwebo.

**Assam.**—*For week ending 12th September.*—The weather is hot and rainy. Transplantation of late and reaping of early rice and manufacture of tea are in progress. Prospects of tea are generally good, except in Sylhet, where the weather is still unfavourable. The late rice crop has been damaged by floods in Darrang and by floods and insects in Nowgong. Cutting of jute is almost finished in Sylhet, but continues in Goalpara. Prospects of the sugarcane crop are indifferent. Fodder is scarce in most districts owing to floods. Prices—common rice—Silchar 14½ to 15, Sylhet 22½, Dhubri 16, Gauhati 14½, Tezpur 12½, Nowgong 10½, and Sibsagar and Dibrugarh 12 seers per rupee.

**Mysore and Coorg.**—*For week ending 12th September.*—**MYSORE:** Rainfall—7 inches 5 cents in the Civil and Military station. Good rain also fell throughout the State, except in parts of Kadur. Prospects are improving in consequence. The standing crops are in good condition. *Ragi* (*Eleusine coracana*) has been sown in parts of the Kolar, Hassan, Mysore, and Chitaldrug districts. Prices have risen slightly in Bangalore and Kolar and have fallen in Mysore and Chitaldrug.

**COORG:** Rainfall—2 inches 65 cents. The recent rain has proved beneficial and the transplanting of rice has been resumed in parts. Prices of food-grains are stationary. Water and fodder for cattle are insufficient.

**Berar and Hyderabad.**—*For week ending 13th September.*—**BERAR:** The average rainfall during the week was 39 cents. The weather continues warm and cloudy. Crop prospects are very poor, except in two districts, where they are reported to be fair. Preparation of land continues and sowings are in progress in parts of two districts. The fodder and water-supplies are inadequate. Prices are fluctuating.

**HYDERABAD:** Rainfall during the week—61 cents. Prospects have improved, but the standing crops are very badly in need of more rain in Raichur; they have, however, been saved from withering in the Bidar and Warangal divisions. Preparations for the spring sowings are going on. Cattle are getting weak and lean on account of insufficient pasturage. Prices of grain have risen slightly. Prices—wheat 8, coarse rice 8, and *jowari* 16½ seers per current sicca rupee.

**Central India.**—*For week ending 13th September.*—Some rain fell during the week in Malwa and Bhopawar, but none in Gwalior or Bhopal. The quantity was insufficient in all four Agencies. The standing crops have been partially damaged in Gwalior, Bhopal, and Malwa and almost destroyed in Bhopawar for want of moisture. The condition of agricultural stock is fair in Bhopal, but indifferent to bad elsewhere. Pasturage is insufficient and prices of food-grains are rising. (Reports from Bundelkhand and Baghelkhand not yet received.)

*Supplementary Report.*—An inch of rain is reported to have fallen at Indore on the 13th instant and falls have also been recorded at other places.

**Rajputana.**—*For week ending 13th September.*—Good rain fell at Abu (3·82 inches) and local thundershowers ranging from ½ inch to over ½ inch at Serohi, Deoli, Ajmer-Merwara, Kisangarh, Karauli, Dholepore, and Bharatpur. Slight local falls are also reported from Mewar, Shahpura, Alwar, and Kotah. No general rain is reported to have fallen during the week. Agricultural operations

have been generally relinquished. The unirrigated crops have for the most part withered up, but the irrigated crops are fair in parts. Cattle are badly off and, owing to fodder being scarce, withered crops are being utilized for the purpose. Prices have risen in ten States, but are steady elsewhere. 1,655 persons emigrated from Ajmer and Merwara during the week. The numbers employed on relief works in the Merwara district and the Beawar tahsil were 20,063 and in Bikaner 1,151. (Figures for the Todgurh tahsil have not been received.) On ordinary works—in Merwara 150, and on gratuitous relief—Merwara villages 107 and Bikaner 193. Prices—Ajmer and Beawar  $12\frac{1}{2}$  seers per rupee. Prospects are bad. Cotton crops have either been lost or are suffering. (Marwar report not received.) Rapid emigration is reported from Western Rajputana. The condition of Jaisalmer is very bad.

**Kashmir.**—*For week ending 12th September.*—The weather is fine. Prospects of the autumn crop are excellent. Prices continue below normal. The price of rice is 27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 13th September.*—No rain fell during the week. Prices continue to rise. Wheat is selling from 13 to 16 and maize 22 to 28 seers per rupee. The condition of the standing crops is fair in irrigated areas, but the crops are withering in the *Kandhi* tracts. Prospects are not favourable and rain is badly wanted. Fodder is getting scarce.

**Nepal.**—*For week ending 9th September.*—Rainfall—0·14 of an inch. There has been a break in the weather which is now warm and dry. Upland rice has been harvested, but lowland rice requires more rain. The price of rice is 9 seers per rupee.

The total numbers in receipt of relief during the preceding and present weeks are as follows :

| Name of Province.           | PRECEDING WEEK. |                    |        | PRESENT WEEK.        |                    |          | Increase or Decrease. |

| Sind and Rajputana . . . . .               | 0'06  | 0'57                     | —0'51                       | 4'88  | 13'64                    | —8'76      |
| Madras . . . . .                           | 1'32  | 1'05                     | +0'27                       | 7'81  | 13'90                    | —6'09      |

The showery weather noticed over the Peninsula last week has continued and extended during the week under review, during which fair rain has been received at nearly all the Peninsular stations. Amounts exceeding 1 inch in twenty-four hours were recorded at Poona and Raichur on the 8th; at Belgaum, Malegaon, Mangalore, Ahmedabad, Bellary, Salem, and Cuddalore on the 10th; at Masulipatam, Vizagapatam, and Kurnool on the 11th; at Sholapur, Bijapur, Ratnagiri, Marmagao, and Karwar on the 12th; at Ratnagiri, Bijapur, Ahmednagar, Mangalore, and Sholapur on the 13th; and at Karwar, Ratnagiri, and Sholapur on the 14th.

During the first two days of the week, Central and Northern India were without rain, but on the 10th a storm appeared over the Bay. Rain commenced around the north of the Bay on this date, and extended to the greater part of Bengal and Chota Nagpur on the 11th, to the east of the Central Provinces and the east of the North Western Provinces on the 12th, to most parts of the Central Provinces on the 13th, and most parts of the North-Western Provinces and parts of the Punjab and Rajputana on the 14th. At the close of the week therefore rain was falling generally and in light to moderate amounts over Burma, Assam, Bengal, the North-Western Provinces, the east of the Punjab and of Rajputana, the Central Provinces, Central India, and the Peninsula.

The week's rainfall has been in excess of the normal in Madras, Malabar, and Mysore and Bombay, normal in Burma, and less than usual in the remaining Provinces. The seasonal rainfall is in defect in all Provinces, except Bengal and Assam, but over the Peninsula the deficiency is less than it was last week.

SIMLA;

SUPPLEMENT TO

# The Gazette of India.

---

No. 38.} CALCUTTA, SATURDAY, SEPTEMBER 23, 1899.

---

## OFFICIAL PAPERS.

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully or make known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

### Weather Review of India for the Week ending at 8 a.m. on Saturday, September 16th, 1899.

A shallow storm formed off the Circars and Orissa Coasts on Sunday, and by Monday morning had intensified slightly and was crossing the coast between Vizagapatam and Gopalpore. It was a very feeble disturbance, but it caused strong winds in its south-westerly quadrant. At Diamond Island winds had risen from 8 to 20 miles an hour, and winds of the strength of a gale were reported from stations on the North Madras Coast. The storm had given light to moderate rain in Chota Nagpur, Orissa and the North Madras Coast districts. False Point, Balasore, Vizagapatam and Masulipatam had received amounts ranging from one to two inches. The depression was almost stationary during the next twenty-four hours and was unchanged in character. Winds had risen at the head of the Bay and continued strong in Ganjam. The storm had given only light showers to the North Madras Coast, the east of the Central Provinces, Chota Nagpur and Baghelkhand, none of the amounts reported exceeding one inch. The depression then commenced to advance more rapidly and by Wednesday morning had travelled at the rate of about 10 miles an hour in a north-westerly direction into the Central Provinces, where it was central to the east of Jubbulpore. The rain it gave was not heavy, but it had been general over the whole of the Central Provinces and Berar, and much needed rain had also fallen in the Bombay Deccan. Pressure began giving way to the north of the depression, and during the next twenty-four hours the storm advanced in a northerly direction into the North-Western Provinces, being central near Cawnpore on Thursday morning. Rain had increased in the Central Provinces and Berar, and had extended over the whole of Central India and the North-Western Provinces. Pachmarhi and Cawnpore had received three inches; and Jubbulpore, Sutna, Nowgong and Hoshangabad two. As the storm passed into the North-Western Provinces rain decreased in the Central Provinces, and only light showers—only one of which exceeded half an inch—were reported from that area on Friday morning. The storm had recurved to the east, but had moved very slowly, as it was central near Benares. Good rain had been received in the North Western Provinces—especially in the eastern districts. Benares had received two inches and Bareilly, Allahabad, Lucknow, Bahraich and Mussooree amounts exceeding one inch. The storm continued moving eastwards, and on Saturday was central near Gaya, but showed signs of filling up. Moderately heavy rain had fallen in Bengal and light showers in the east of the North-Western Provinces. Dinajpur had received nearly five inches, Dhubri three and Silchar two.

The storm was of feeble intensity throughout, but it gave much needed and well distributed rain to the central parts of the country and also to the southern districts of the Bombay Deccan and the greater part of the North-Western Provinces. Fair rain has also been received during the week in the southern districts of Madras and on the North Madras Coast.

The rain given by the storm caused a large fall of temperature in the North-Western Provinces and the central districts, but at the commencement of the week temperature was in general excess over the greater part of the country, the excess being most marked in the Punjab, Rajputana, Berar, Central India and the Central Provinces. Temperatures continued in large excess in Rajputana throughout the week and in considerable excess in Gujarat.

**Daily Summary.**—*Sunday, September 10th.*—Pressure had fallen briskly over the west of the Bay, and a shallow depression had formed off the Circars and Orissa Coasts. Temperature was in excess in all provinces, except Burma, Sind, the West Coast districts and South India, where they were normal.

Mean temperatures for the whole of India averaged  $3.7^{\circ}$  in excess. Light rain had fallen in Burma, but there had been practically none in Bengal. Rain was more general and heavier on the West Coast, and showers had fallen in Gujarat, the Deccan and South India.

*Monday, September 11th.*—The barometer had fallen slightly to briskly over the northern half of the Peninsula, and the depression had intensified slightly and was crossing the coast between Vizagapatam and Gopalpore. Temperatures were normal in Burma, Assam, Bengal, Orissa, Sind, the West Coast districts, the Madras Deccan, the Madras Coast districts and South India. Light to moderate rain had fallen in Burma and Bengal, and showers had been received on the West Coast and in the Deccan.

*Tuesday, September 12th.*—Pressure had risen slightly in Burma, had been steady in North-Eastern India and had fallen slightly to briskly elsewhere. The depression had moved very slowly in a westerly or north-westerly direction, but was in almost the same position it had occupied the day before. Temperature had fallen in most provinces and was in defect in Assam, Bengal, Chota Nagpur, Mysore, the Madras Deccan and the Madras Coast; and normal in Burma, Orissa, South India and on the West Coast. Light to moderate rain had been received in Burma, Assam, Bengal and Chota Nagpur; and moderately heavy rain in the Konkan and southern districts of the Bombay Deccan. Showers had been received in the Mussoorie hills, Malabar, Mysore, east of the Central Provinces, Baghelkhand, West Rajputana and Madras.

*Wednesday, September 13th.*—The depression had advanced in a north-westerly direction into the Central Provinces and was central to the east of Jubbulpore. The permanent low pressure area in North-Western India had been transferred southwards and lay over Sind and West Rajputana. Temperature was below the normal in Assam, Bengal, Chota Nagpur, the Madras Deccan and on the West Coast and was normal in Orissa, Bihar, Mysore and on the Madras Coast. Light rain had fallen in the Central Provinces and Berar; and light to moderate rain in Burma, Bengal, parts of the Bombay Deccan and on the West Coast. Light showers had been received in the west of the North-Western Provinces and in North Madras.

*Thursday, September 14th.*—Pressure had given way briskly to slightly in the North-Western Provinces, and the storm had advanced in a northerly direction and was central near Cawnpore. Mean temperatures were in slight to considerable defect in Assam and Bengal; and were normal in Burma, Bihar, the North-Western Provinces, the Punjab, the West Coast districts and the Deccan. Light rain had fallen in Burma, Bengal, Assam, North Madras and on the West Coast and light to moderate general rain in the North-Western and Central Provinces and Central India.

*Friday, September 15th.*—The barometer had fallen slightly to briskly in North-Eastern India and in the Punjab. The depression had advanced in an easterly direction and was central near Benares. Day temperatures were in large defect in the east of the North-Western Provinces, and mean temperatures were in slight to considerable defect in Assam, Bihar, the North-Western Provinces and the Madras Deccan. They were in excess in Chota Nagpur, North-Western India, Berar, the Bombay Deccan and South India. Light to moderate rain had been received in Burma, Bengal and parts of Madras; and moderately heavy rain in the eastern and central districts of the North-Western Provinces.

*Saturday, September 16th.*—The depression had continued to move eastwards and was central near Gaya. Temperature was in defect in Assam, Bihar and on the Madras Coast; and was normal in Bengal, Chota Nagpur, the North-Western Provinces, Mysore, the Madras Deccan and South India. Light to moderate rain had fallen in North-Eastern India, Tenasserim and Lower Burma, and a few light showers had been reported from Upper Burma, the West Coast, the central parts of the country and Madras.

**Temperature.**—Excessive temperatures were registered in all but a few provinces at the beginning of the week, the mean temperature for the whole of

India being as much as  $3.7^{\circ}$  above the normal on Sunday; but the rain given by the depression in the North-Western Provinces and central parts of the country caused a large reduction of temperature, which was most marked in Berar. On the 10th, 11th and 12th September mean temperatures in Berar ranged from  $10^{\circ}$  to  $12^{\circ}$  above the normal. On the 14th the excess in this province was on an average only  $1.5^{\circ}$ . In the Central Provinces and Central India the fall in temperature averaged  $6^{\circ}$  and  $7^{\circ}$  respectively and in the North-Western Provinces  $7\frac{1}{2}^{\circ}$ . Temperature was excessive throughout the week in Rajputana, the mean temperature for the week being  $8.7^{\circ}$  above the normal. The smallest variations from the normal occurred in Burma and on the West Coast.

The mean temperature of the week was  $2^{\circ}$  in defect in Assam and actually or practically normal in Burma, Bengal, Bihar, the West Coast districts, Mysore, Madras Deccan, South India and on the Madras Coast. The excess in the remaining provinces ranged from  $8.7^{\circ}$  in Rajputana to  $1.0^{\circ}$  in Orissa and Chota Nagpur.

The following table gives the mean temperature variation data for the week:

| PROVINCE.                         | SEPTEMBER 1899. |       |       |      |      |      |      | Mean variation of week. |

| Bombay Deccan . . . . .           | +3.7            | +3.8  | +2.9  | +1.1 | +0.5 | +1.5 | +3.0 | +2.4                    |
| Mysore . . . . .                  | +1.3            | -1.4  | -1.7  | -0.2 | +0.8 | +0.1 | -0.2 | -0.2                    |
| Madras Coast . . . . .            | +3.3            | -0.3  | -2.2  | +0.4 | +1.9 | +0.1 | -2.0 | +0.2                    |
| Madras Deccan . . . . .           | +2.4            | -0.3  | -4.1  | -1.6 | -0.2 | -1.6 | -0.5 | -0.8                    |
| South India . . . . .             | +0.3            | +0.1  | -0.4  | +1.2 | +2.1 | +1.1 | -0.2 | +0.6                    |
| Mean for whole of India . . . . . | +3.7            | +3.0  | +2.0  | +1.6 | +1.1 | +0.8 | +1.1 | +1.9                    |

The mean temperature for the whole of India was practically normal on the 15th and in excess on all other days, the excess being largest on the 10th, when it amounted to nearly four degrees. For the whole week the variation from the normal was  $+1.9^{\circ}$ .

The following gives the maximum temperatures, which varied most largely from the normal, on each day of the week:

| Date.                    | Station.           | Actual maximum. | Variation from normal. |
|--------------------------|--------------------|-----------------|------------------------|
| September 10th . . . . . | Akola . . . . .    | 104.2°          | +17.4°                 |
| " 11th . . . . .         | Akola . . . . .    | 101.8°          | +14.7°                 |
| " 12th . . . . .         | Khandwa . . . . .  | 101.2°          | +14.7°                 |
| " 13th . . . . .         | Khandwa . . . . .  | 104.7°          | +18.0°                 |
| " 14th . . . . .         | Neemuch . . . . .  | 101.0°          | +14.4°                 |
| " 15th . . . . .         | Deesa . . . . .    | 105.0°          | +13.5°                 |
| " 16th . . . . .         | Cawnpore . . . . . | 79.2°           | -13.0°                 |
| " . . . . .              | Sambhar . . . . .  | 102.5°          | +11.8°                 |

**Rain.**—Last week's rainfall has been normal or in excess in Lower, Central and Upper Burma, but it has been in large defect in Tenasserim and in slight defect in Arakan. In Bengal and Assam rain has also been either normal or in excess in all divisions, except Central Bengal, the Bengal hills and Chota Nagpur. Over the remainder of Northern and Central India rainfall has been in general defect, with the exception of the following divisions of the North-Western and Central Provinces and Central India:—North and South Oudh, the east, central and east-submontane divisions of the North-Western Provinces, Berar, the east and central divisions of the Central Provinces and the east division of Central India.

In the Peninsula good rain has fallen, and the amounts received are in all cases either normal or in excess of the normal, except in two divisions of Madras, *viz.*, Madras South-Central and Madras South.

Generally speaking, the rainfall of the week has hence been normal or in excess of the normal over nearly the whole of North-Eastern India, the Central Provinces, Berar, the east of Central India and the Peninsula.

No rain has fallen in Sind and on the Baluchistan hills, and practically none in the divisions of South, Central, North and West Punjab.

The last three columns of the table at the end show that, with the exception of Upper Burma and the west submontane division of the North-Western Provinces, the rainfall of the period, June 4th to September 16th, has been either normal or in excess in Burma, Bengal, Assam and the North-Western Provinces. Over the whole of the remainder of the Indian region rainfall has been in defect, with the exception of North Punjab, Central Provinces East and East Coast North, where it has been practically normal, the deficiency amounting to less than 20 per cent. of the normal rainfall.

The following were the principal large totals received at individual stations during the week:

|                  |                                    |               |

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 16th September.*—The rainfall of the week was heavy in South Canara, the Circars and the Deccan : seasonable rain also fell elsewhere, but the showers were much scattered in the Southern and parts of the Central districts. The water-supply is good in the Northern half of the Presidency, but moderate or poor in the Southern half and in Malabar. Sowings are proceeding actively in the Deccan and parts of the Circars and to some extent elsewhere. The standing crops have improved and are generally in fair condition, but need more rain in the Southern half of the Presidency and in Malabar. Small harvests of the early crops are yielding very moderate outturns. Pasturage has generally improved, and fodder, though scarce in parts, is sufficient. Prices have fallen considerably in the Deccan, are somewhat easier in the Central districts and are generally stationary elsewhere, except in the Circars, where they have risen slightly. Prospects have greatly improved, but more rain is needed in the Carnatic, the Southern and Central districts and in Malabar. Good rain is reported to have fallen in parts of the Carnatic and the Central districts since the close of the week.

**Bombay.**—*For week ending 20th September.*—Rain fell during the week in all parts of the Presidency, except in Kathiawar and Sind. The falls were slight in Guzerat and Thana, but excellent throughout the Deccan, the Karnatak Colaba, Ratnagiri, and Kanara where the rain has proved beneficial to the crops. The immediate urgency of rain is now confined to Guzerat and Thana and parts of Colaba, Nasik, and Poona. The standing crops are in poor condition in Thana and four districts of Guzerat, where they are withering for want of moisture. The sowing of the spring crops has commenced in the Deccan and the Karnatak. Fodder is insufficient in Kathiawar, Baroda, Khandesh and parts of Sind and Guzerat. The river is low in Sind and the water-supply from canals continues to be deficient. The condition of agricultural stock is good, except in Kathiawar, Baroda, Ahmedabad, the Panch Mahals, and parts of Sind. Prices have fallen in five districts, are stationary in eleven and have risen slightly elsewhere. The daily average numbers on relief were as follows:—*For week ending 9th September*—on test works:—Ahmedabad 5,100; Kaira 3,649—total 8,749. *For week ending 16th September*—on test works:—Ahmedabad 3,200; Kaira 4,210; Panch Mahals 100; Broach 7,000; and Ahmednagar 67. On relief works:—Ahmedabad 7,600—total 22,177.

**Bengal.**—*For week ending 19th September.*—The general rain during the week has been very beneficial to the winter rice crops in all the divisions of the Presidency, except in Orissa and Chota Nagpur, where the falls are reported to have been good. Should the *hathiya* rains be seasonable the crop in Bihar will be very satisfactory. The reports from Orissa and Chota Nagpur are better, but more rain is still required there and in the west of the Burdwan division. The harvesting of the autumn crops has almost been completed and the cutting and steeping of jute are still proceeding. No important change is reported in the price of common rice. Fodder is everywhere sufficient.

**North-Western Provinces and Oudh.**—*For week ending 20th September.*—General rain fell during the week, and except in the Western districts the falls have been heavy and have greatly benefited the crops. More rain is, however, badly wanted in the Bijnor and Budaun districts of Rohilkhand and in the Agra and Muttra districts of the Agra division. Rain is also wanted in the Meerut division and in the districts of Garhwal and Jhansi. The standing crops have materially improved and they are now in good or fair condition, except in the Bijnor, Muttra and Agra districts, where they are suffering badly from drought and to a less extent in the Bulandshahr and Aligarh districts. Harvesting of the early autumn crops is in progress and ploughing for the spring crops is being actively pursued. Supplies and fodder continue to be sufficient. Prices are still high and are rising in several places, but in a few districts they show a tendency to fall.

**Punjab.**—*For week ending 20th September.*—The rainfall in Jullundur was fair, in Ferozepur moderate and normal in Hissar, Delhi, Umballa, Sialkot, and Shahpur. Harvesting of maize and great millet in Umballa and of rice in Amritsar is going on. Ploughings for the coming spring crop are in progress in Umballa, Lahore and Dera Ismail Khan. The spring sowings have commenced in Hissar and Multan. Turnip, rape and gram are being sown in parts of Sialkot. The canal crops are generally in fair to average condition, except in the Fazilka tahsil of the Ferozepore district, where  $\frac{2}{3}$ ths of the crops are expected to fail. The well-irrigated crops are reported to be below the average in Delhi, Jullundur and Lahore. Crops on unirrigated areas have withered in Hissar, Delhi, Jullundur, and parts of Shahpur and are suffering in Ferozepur and Sialkot from prolonged drought. Prospects of the standing crops are said to be average in Dera Ismail Khan, below the average in Rawalpindi, and almost hopeless in Ferozepur. In Hissar only a half-anna crop is expected. The recent rain has slightly benefited sugarcane and cotton in Umballa. The condition of the standing crops is reported to be good in Peshawar and Dera Ismail Khan. Water in the Bara stream and the Multan canals is insufficient and rain is badly wanted in Amritsar and Shahpur. The indigo and rice crops have been damaged for want of moisture in parts of Multan, and maize and great millet by insects in Lahore. Cattle are getting weak and out of condition, owing to an insufficiency of fodder and overwork in Hissar, Delhi, Lahore, Sialkot, Shahpur and parts of Dera Ismail Khan. Cattle in Lahore and Dera Ismail Khan are being taken to places where pasturage and fodder are available. Fodder is said to be scarce in Hissar, Delhi, Jullundur, Ferozepur, Mooltan, Amritsar, Sialkot, Shahpur, and parts of Lahore and Dera Ismail Khan. The average number of famine workers on test works in the Hissar district is about 25,000 against 16,000 for the previous week. Test works have also been opened in Ferozepur where 500 persons are employed. People are emigrating into Ferozepur from Bikanir, Jodhpur and the Sirsa villages. The prices of important food staples continue high in almost all districts. The price of gram has risen only in Umballa and Jullundur, and of maize in Umballa, Amritsar, and Rawalpindi. A fall in the price of the latter staple is, however, reported from Lahore and Peshawar. The price of rice has also risen in Sialkot. Wheat is selling from 10 to 14, barley 15 to 16, gram 10 to 13, maize  $11\frac{1}{2}$  to 16, rice 10 to 11, great millet 14 to 16, and bulrush-millet 10 to 16 seers per rupee.

**Central Provinces.**—*For week ending 19th September.*—There was general but unevenly distributed rain throughout the Provinces during the early

part of the week, while the latter part has been generally clear. Jubbulpur and Bhandara each received a little over 3 inches, Mandla  $2\frac{1}{2}$  inches, Wardha and Hoshangabad 2 inches each, Saugor and Damoh  $1\frac{1}{2}$  inches, Seoni and Nagpur 1 inch each and Narsingpur, Chanda and Balaghat about  $\frac{1}{4}$ ths of an inch. Elsewhere the falls have been from half an inch to 9 cents. At the head-quarters of the Betul district 30 cents were recorded, but from  $1\frac{1}{2}$  to 2 inches fell in the north and west of the district. Similarly at Raipur itself only 9 cents were received while from 2 to  $3\frac{1}{2}$  inches fell in the other tahsils and good rain is also reported in the north-western Zamindaries of this district. In Hoshangabad the falls at outlying tahsils were more than double the fall at head-quarters, ranging from 4 to  $6\frac{1}{2}$  inches. Where good rain has been received the autumn crops have been much benefited and elsewhere the light falls have temporarily checked further deterioration. More rain is, however, required both for these crops and for the spring sowings which have begun in a few places. The prospects of the rice crop have slightly improved in Chhattisgarh, but are not yet finally assured. The transplanted rice crop in the Waingunga districts remains much the same and the utmost to be hoped for is a quarter to a third of the crop. Owing to the further rain broadcast rice is in better condition, but has deteriorated in Balaghat. Caterpillars continue to do damage to the crops in parts of the Hoshangabad, Bhandara, Wardha and Nagpur districts, and grasshoppers in the Raipur district. Distress continues to spread in Betul and Balaghat. The numbers in receipt of village relief on account of previous failures in Saugor and Bilaspur were 5,624 and 2,446 persons respectively. (The numbers on relief in Damoh have not been reported.) Relief measures necessitated by the present drought have been given in Balaghat, Betul, Hoshangabad, the Harsud tahsil of Nimar, and parts of Nagpur, Bhandara and Jubbulpur. Famine relief is being organized in the rice tracts of Seoni and will soon be required in the rice tracts of Chanda. In Jubbulpur 183 persons are in receipt of village relief; in Hoshangabad 366 persons are in receipt of gratuitous relief; and 586 persons have also been fed at kitchens in that district. Relief kitchens will shortly be opened in Saugor. A scarcity of fodder and water continues in parts of Nimar, Betul, Chhindwara and the Nagpur country. Prices have risen in Saugor, Jubbulpur, Nimar and Chhindwara and have slightly fallen in Mandla, Seoni, and Betul. Exports from Betul have ceased and some *jowar* has been imported with the result that the price of this staple has fallen from 10 to 13 seers. The cheapest prices are: wheat 15, gram 19, rice  $13\frac{1}{2}$ , and *jowar* 17 seers per rupee. The dearest prices are: wheat  $9\frac{1}{2}$ , gram 10, rice 6 (in Betul), and *jowar*  $11\frac{1}{2}$  seers per rupee. The highest price of the chief staple in any district is  $8\frac{1}{2}$  seers (rice) in Chanda, but *jowar* is selling at 15 seers in this district. (No report received from Sambalpur.)

**Burma.**—*For week ending 16th September.*—In Lower Burma transplanting continues in six districts and has been completed in the others. Prospects are good. In Upper Burma reaping of early sesamum is nearing completion, whilst that of hill paddy in the Shwegu township of the Bhamo district and of early lowland paddy in the districts previously reported continues. Sowing and transplanting of the main wet weather paddy crops are approaching completion. Sowing of late sesamum is nearly completed in Myingyan and that of other upland crops is in progress. In the dry zone districts prospects of the standing crops are fair. The rise in the Irrawaddy and Chindwin rivers has done slight damage to low-lying tracts in five districts. Insects have also done harm in

parts. More rain is wanted in the Salin township of Minbu and the Tagaung subdivision of the Ruby Mines district. The recent rain has improved prospects elsewhere. Partial remission of *thathameda* will probably be necessary in parts of the Tauntha township of Myingyan. The price of paddy has risen sharply in Thongwa and slightly in 5 other districts and has fallen slightly in Rangoon and Pakòkku.

**Assam.**—*For week ending 19th September.*—The weather is hot and rainy. Transplanting of late and reaping of early rice and manufacture of tea are in progress. Prospects of tea are generally good. The late rice crop has been damaged by floods in Darrang, by floods and insects in Nowgong and by insects in parts of the Lakhimpur, Cachar, and Sibsagar districts. Cutting of jute is almost finished in Sylhet, but continues in Goalpara. Prospects of the sugarcane crop are indifferent. Fodder is scarce in most of the plains districts owing to floods. Prices—common rice—Silchar 14½ to 15, Sylhet 22½, Dhubri 16, Gauhati 14, Tezpur 12½, Nowgong 11, Sibsagar and Dibrugarh 12 seers per rupee.

**Mysore and Coorg.**—*For week ending 19th September.*—**MYSORE :** Rainfall—1 inch 94 cents in the Civil and Military station. Good rain also fell in other parts of the State. The standing crops are in good condition. Prospects are favourable. Prices have fallen slightly in four districts. *Ragi* (*Eleusine coracana*) has been sown in parts of Bangalore, Kolar, Tumkur, Mysore, Kadur, Chitaldrug and Shimoga.

**COORG :** Rainfall—3 inches 75 cents. The rain has proved favourable and the transplantation of rice which had been impeded has recommenced. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 20th September.*—**BERAR :** The average rainfall during the week was 1 inch 28 cents. The weather is warm and cloudy. The condition of the standing crops is reported to be good in Wun, fair in parts of Basim, but unsatisfactory elsewhere. Land is being prepared for the winter crops. Sowing of *bajra* is in progress in places. Resowing of the *jowar* crop which was started in the Akote taluq, has been suspended for want of moisture. Weeding operations continue in 5 districts. Fodder and water continue scarce. Prices are fairly steady. Test works have been opened in the Akola and Buldana districts; the number of famine workers in Akola being 1,688 and in Buldana 473.

**HYDERABAD :** Rainfall during the week—1 inch 84 cents. Agricultural prospects have improved and the spring sowings have commenced in parts. Prices are falling. Prices—wheat 8, coarse rice 8½, and *jowari* 16½ seers per current sicca rupee.

**Central India.**—*For week ending 20th September.*—Good rain fell in all the Agencies during the week, except in Malwa which only benefited partially. More rain is needed in Gwalior, Bhopal, Malwa and Bhopawar. The condition of the standing crops is bad in Gwalior, Bhopawar, and Malwa; but fair in Bhopal, Baghelkhand and Bundelkhand. The condition of agricultural stock is deteriorating in Bhopawar, is bad in Malwa, indifferent in Gwalior but fairly good elsewhere. Pasturage is insufficient in four Agencies. Prices of food-grains are steady in Bhopal and Baghelkhand and rising elsewhere.

**Rajputana.**—*For week ending 20th September.*—Local showers ranging from a few cents to 1 inch are reported from most States except Abu, Bharatpur

and Jaisalmir. Agricultural operations have been generally suspended. The standing crops are in fair condition where irrigation has been possible. Cattle are in a bad plight, and withered crops are being used for fodder. Prices are rising in eleven States and are steady elsewhere. The number of persons who emigrated from Ajmer-Merwara, Marwar and Jaisalmir during the week was 1,087; 13,541 and 1,743 respectively. The numbers employed on relief works were:—in the Merwara district, 36,980; Bikanir, 1,801; and Marwar, 8,477. Ordinary works have been opened in many parts to afford employment to distressed persons. The number of persons on ordinary works in Merwara was 150, and in receipt of gratuitous relief, Merwara villages 1,198 and Bikanir 343. Test relief works have been opened at Bharatpur. Prices—Ajmer 12, Beawar 12½, Marwar 8½ and Bharatpur 12 seers per rupee. Prospects are bad. Emigration from Western Rajputana continues; but the reports from Haraoti, Malwa and Guzerat, where Western Rajputana emigrants mostly gravitate, are discouraging.

**Kashmir.**—*For week ending 19th September.*—The weather is fine. Prospects of the autumn crops are excellent. Prices continue below normal. The price of rice is 27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 20th September.*—No rain fell during the week. Prices continue to rise. Wheat is selling from 10½ to 14 and maize 18 to 25 seers per rupee. The condition of the standing crops is fair in irrigated areas, but they have withered in the *Kandhi* tracts. Owing to the rains holding off the spring sowings are being interfered with. Prospects are not favourable and rain is badly wanted. Fodder is scarce.

**Nepal.**—*For week ending 16th September.*—Rainfall—0·47 of an inch. The weather has been bright and clear. Upland rice has been harvested: outturn is about the average. Lowland rice requires more rain. The price of rice is 9 seers per rupee.

The total numbers in receipt of relief during the preceding and present weeks are as follows:

| Name of Province.           | PRECEDING WEEK. |                    |         | PRESENT WEEK. |                    |          | Increase or Decrease. |

There has been a gradual diminution in the rainfall over India during the week under review. The storm which was traced to the North-Western Provinces during last week continued to give rain to the North-Western and Central Provinces on Friday, but by Saturday morning the depression had drifted into Bihar and rain ceased over those two areas, and has not recommenced. The storm travelled eastward through Bengal and gave rain to Bengal and Assam until Monday the 18th, when the fall practically ceased in these Provinces also. In North-West India, including the Punjab, Rajputana, the west of Central India and North Bombay, there has been no rain throughout the week.

In the Peninsula there have been showers on every day of the week, but both the amount and extent of the rainfall have diminished as the week advanced. Falls exceeding 1 inch in twenty-four hours were reported from Masulipatam, Vizagapatam and Cuddalore on the 15th, from Vizagapatam on the 16th; from Bijapur, Bangalore, Salem, Trichinopoly and Cuddapah on the 17th; from Mangalore, Mysore, Bangalore, Karwar, Madras, Bellary, Kurnool and Salem on the 18th; from Bangalore and Madras on the 19th, and from Cuddalore and Salem on the 21st. Today there are signs of the presence of a small depression over the north of the Bay.

The week's rainfall has been more than usual in Burma, Bengal and Assam, Malabar and Mysore and Madras and less than usual elsewhere. In the Punjab no rain whatever fell and in Gujarat, Central India, Sind and Rajputana only an insignificant quantity.

The seasonal rainfall is in excess in Bengal and Assam and in defect in all other Provinces, though the deficiency in the Peninsula is less than it was last week.

SUPPLEMENT TO  
**The Gazette of India.**

---

No. 39. CALCUTTA, SATURDAY, SEPTEMBER 30, 1899.

---

**OFFICIAL PAPERS.**

---

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully or more known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

---

GOVERNMENT OF INDIA.  
DEPARTMENT OF REVENUE AND AGRICULTURE.

IMPORTS OF COTTON, WHEAT, LINSEED, INDIGO, JUTE, TEA, AND RICE.

Quantity (in hundredweight) of COTTON imported by rail and river and by sea into Calcutta, the City of Bombay, and Karachi, in July 1899, and from 1st January to 31st July 1899, and in the corresponding periods of 1897 and 1898.

Director-General of Statistics.

T. W. HOLDERNESS,  
Secretary to the Government of India.

Calcutta, the 29th September 1899.

GOVERNMENT OF INDIA.  
HOME DEPARTMENT.

RESULTS OF THE MEASURES ADOPTED FOR EXTERMINATING WILD ANIMALS  
AND POISONOUS SNAKES DURING THE YEAR 1898.

NOS. 2214—2227.

*Extract from the Proceedings of the Government of India in the Home Department (Public),—under date Simla, the 29th September, 1899.*

Read—

Home Department Resolution Nos. 1941—55, dated the 7th October 1898, reviewing the reports on the results of the measures adopted for exterminating wild animals and poisonous snakes in British India during the year 1897.

Read also the following communications from Local Governments and Administrations submitting returns for the year 1898:

From the Government of Madras, No. 272-A., dated the 25th April 1899, and enclosures.

From the Government of Bombay, No. 2873, dated the 6th July 1899, and enclosure.

From the Government of Bombay, No. 3114, dated the 21st July 1899, and enclosures.

From the Government of Bengal, No. 70-J.D., dated the 6th May 1899, and enclosure.

From the Government of the North-Western Provinces and Oudh, No. 648, dated the 19th May 1899, and enclosures.

From the Government of the Punjab, No. 405, dated the 26th April 1899, and enclosures.

From the Government of Burma, No. 258, dated the 13th April 1899, and enclosures.

From the Chief Commissioner of the Central Provinces, No. 5148, dated the 11th July 1899, and enclosures.

From the Chief Commissioner of Assam, No. <sup>350-Miscellaneous</sup><sub>2158</sub>-G., dated the 30th March 1899, and enclosure.

From the Chief Commissioner of Coorg, No. 467, dated the 4th March 1899, and enclosures.

From the Resident, Hyderabad, No. 102, dated the 8th April 1899, and enclosures.

From the Chief Commissioner of Ajmer-Merwara, No. 316—165, dated the 13th April 1899, and enclosure.

From the Resident, Mysore, No. 835, dated the 24th February 1899, and enclosure.

RESOLUTION.

The four statements appended to this Resolution contain the figures returned from the various Provinces for the year 1898 regarding the numbers of human beings and cattle killed by wild animals and snakes, the numbers of wild animals and snakes destroyed with the amounts of the rewards paid for their destruction, and the number of licenses issued free of charge in Form XI under the Indian Arms Act, 1878, for the destruction of wild animals or the protection of crops. The figures for the year under report are compared with the corresponding figures for the four preceding years.

2. The following table shows the *loss of human life* by wild animals and snakes reported during the last five years:

| Province.                         | 1894.            |            | 1895.            |            | 1896.            |            | 1897.            |            | 1898.            |            |

\* Revised figure.

From these figures it appears that during the year under review the total mortality among human beings caused by wild animals was less, and that caused by snakes was greater, than in the preceding year. In 1897 there was a considerable increase of deaths from wild animals which was attributed to the drought causing large numbers of people to go into the jungles in search of food and bringing down the animals to the more open parts for water. The variation in the figures for snake-bites is not so easily explained, but in some Provinces it is said that the more accurate registration of vital statistics generally is accountable for the higher figures now shown. As in other years, the heaviest mortality in 1898 from wild animals is returned in Bengal, the North-Western Provinces and Oudh, and the Central Provinces; these three Provinces together report more than four-fifths of the deaths from this cause throughout British India. Bengal and the North-Western Provinces and Oudh continue to show the highest figures in the mortality caused by snakes, and their returns under this head amount to very nearly three-fourths of the total of all the Provinces.

3. Nine hundred and twenty-seven deaths of human beings were ascribed to tigers throughout British India in 1898, and of these 85, 76 and 47, respectively—or nearly one-fourth of the total—are reported from the districts of Ranchi, Singhbhum, and Gaya in Bengal. The Governor General in Council desires His Honour the Lieutenant-Governor to devise some means to secure the destruction of man-eating tigers in the districts mentioned.

Four hundred and sixty-two deaths of human beings from wolves are reported for all the Provinces in 1898; of these 279 come from the North-Western Provinces and Oudh. In one district—Moradabad—in the Provinces the 115 deaths returned from this cause are attributed to the existence of only a few man-eating wolves, and there was a marked diminution of the mortality where one of these animals was killed. In the Rae Bareilly District a wolf hunt, resulting in the slaughter of two wolves, is said to have stopped the destruction of human life, which was causing a panic there. It therefore appears to His Excellency in Council that special measures are required to exterminate these pests in some districts in the North-Western Provinces and Oudh, and the attention of His Honour the Lieutenant-Governor and Chief Commissioner is invited to the matter.

As regards the loss of human life from snake-bites, the increase of deaths reported from the Gorakhpur Division—1,051 in 1898 as compared with 870 in 1897—which is unexplained requires attention on the part of the local authorities.

4. The number of *cattle reported to have been killed* by wild animals and snakes in 1898 is compared with the figures for the four previous years in the following statement:

| Province.                        | 1894.            |            | 1895.            |            | 1896.            |            | 1897.            |            | 1898.            |            |

| TOTAL ...                        | 91,919           | 4,877      | 93,978           | 6,129      | 81,559           | 7,143      | 70,613           | 7,504      | 83,007           | 8,743      |

The number of cattle returned as killed by wild animals still continues highest in Bengal; Assam comes next in the heavy tale of such mortality, followed by the Central Provinces and Madras. But the figures given are probably very much below the facts.

5. There was again an increase in the number of *wild animals destroyed*, though the amount, Rs. 94,383, of the rewards paid for their destruction was less than that, Rs. 1,14,625, paid during the year 1897.

The number of *snakes destroyed* during the year under review is reported at 109,383 as compared with 105,227 in 1897, and the amount of the rewards paid for their destruction was Rs. 4,133 against Rs. 4,868.

6. The number of *licenses issued free of cost* in Form XI under the Indian Arms Act, 1878, for the destruction of wild animals or the protection of crops was 10,770 in 1898 against 10,405 in 1897. The total number of licenses of this nature in force in 1898, including the licenses which were valid from previous years, amounted to 51,467 as compared with 57,039 in 1897. In Madras the number of licenses in Form XI granted during the year was 665 as compared with 883 in the previous year; and the total number of such licenses in force in that Presidency was 5,285 against 7,436 in 1897. The reduction is reported to have occurred mainly in Ganjam, Cuddapah, and South Canara; it is ascribed by the Collector of Ganjam to want of energy among the *shikaris* engaged in the destruction of wild animals, by the Collector of Cuddapah to the fact that people prefer to take out licenses in Form VIII which covers all purposes including self-protection, and by the Collector of South Canara to the stricter enforcement of the rules regarding the issue of such licenses. In Bombay the number of licenses in Form XI issued last year was 661 against 1,519 in the previous year, and the total number of licenses in force in that Presidency was 8,495, against 9,200 in 1897. In the Thana District 181 licenses were cancelled, chiefly on account of the countenance shown by some of the licensees to dacoits, and the number of fresh licenses granted in the Ratnagiri District fell from 320 to 4. In Bengal the number of licenses in Form XI granted during the year was 497 against 302 in 1897, and the total number in force in that Province was 1,806 as compared with 2,188 in the preceding year. The reduction in the licenses in force in Bengal is reported to have occurred mainly in the 24-Parganas and Khulna Districts of the Presidency Division. The North-Western Provinces and Oudh figures for licenses in Form XI granted and in force are, respectively, 2,174 and 10,927 against 1,955 and 11,389, respectively, in 1897. The Punjab figures under the same heads are 1,807 and 7,603 against 1,215 and 9,355 in the previous year. The decrease in the number of licenses in force in the Punjab is reported to be due to a more correct classification of licenses issued.

ORDER.—Ordered that a copy of this Resolution be forwarded to Local Governments\* and Administrations, and that it be published in the *Gazette of India* for general information; also that a copy be forwarded to the Director General of Statistics.

\* (Including the Chief Commissioner of Ajmer-Merwara and the Resident in Mysore.)

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

### Weather Review of India for the Week ending at 8 a.m. on Saturday, September 23rd, 1899.

The depression lying over Bihar at the end of the previous week had practically filled up by Sunday, the 17th September; only a shallow residual depression being shown near Patna, which disappeared by Monday morning. Simultaneously with the filling up of this depression another commenced forming in the Bay, indicated on Monday by irregular winds round the north of the Bay and a falling barometer on the Burma coasts. The barometer continued to fall on Tuesday, but on Wednesday pressure changes over the Bay were very small, and the depression developed very slowly on Wednesday and Thursday. On Friday, however, it intensified considerably; a decided cyclonic circulation had been established in the winds round the north of the Bay, the velocity of the wind at Diamond Island had increased to 36 miles an hour, and 3 inches of rain had fallen at Saugor Island. From the directions of the winds recorded at the coast stations, the centre of the storm on Friday morning appeared to be about midway between False Point and Akyab. It advanced in a northerly direction during the next twenty-four hours, and on Saturday was lying over the Sunderbunds, central a little to the east of Saugor Island. It was a moderately severe cyclonic storm, pressure in its central area being 250 inch below the normal. Baric gradients were steep to the south of the depression, and strong winds and squally weather prevailed at the head of the Bay. Very heavy rain had fallen in Orissa and Lower Bengal. Balasore had received 7·46 inches, Saugor Island 6·87 inches, Calcutta 4·30 inches and Jessore 3·87 inches.

Favourable rain has continued during the week in Malabar, Mysore, the Konkan, the Deccan and Madras; but, with the exception of a fall of two inches at Akola on Monday, practically no rain has fallen in North-West India, Central India, Berar and the Central Provinces.

Temperature has been normal or in slight defect generally in North-East India, Sind, on the West and Madras coasts and in the south of the Peninsula; and in excess in all other parts of the country. The excess has been largest in the region extending northwards from Berar to the North Punjab, where the excess in mean temperatures at individual stations ranged up to 10° above the normal.

**Daily Summary.**—*Sunday, September 17th.*—Pressure had risen slightly in Bengal and North-West India, and the depression lying over Gaya on Saturday morning had practically filled up. Mean temperatures were in slight to moderate defect in Assam, Bengal and Bihar, and were normal in Sind, Mysore, the Madras Coast and South India. The excess in the remaining provinces was greatest in Rajputana and Bihar. Very little rain had fallen in Burma, and light rain, with a few heavy showers, had fallen in Bengal. Light to moderate rain had been received in the west coast districts and Madras.

*Monday, September 18th.*—Pressure had given way slightly over Burma and the south-east of the Bay, and was uniform over North-East India, Burma and the north of the Bay. Temperatures were normal in Bengal, Sind and the Madras Deccan, and below the normal in Assam, Bihar, Mysore, South India and on the West and Madras Coasts. Moderate showers of rain had fallen on the Burma Coasts and in Orissa, Assam, North Bengal and Bihar, and light to moderate rain had been received in Madras and the West Coast districts.

*Tuesday, September 19th.*—The barometer had fallen generally over the whole of the Indian region, the fall being brisk over the north of the Bay and the greater part of Bengal and Burma. A depression was in course of formation in the Bay. Temperature was in defect in Assam; and normal in Bengal, Bihar, Sind and on the West Coast. It was either normal or in defect in the south of the Peninsula and in excess in all other provinces. Moderately heavy rain had fallen in Tenasserim; and showers in Burma, Assam, the Mussoorie hill districts and the Peninsula.

*Wednesday, September 20th.*—Pressure had changed by small amounts over the whole country. The depression in the Bay had not concentrated, and a shallow depression was shown lying over Bihar. Mean temperatures averaged  $3^{\circ}$  in defect on the Madras Coast; and were normal in the remaining districts of Madras and in Mysore, Burma, Assam, Bihar, Sind and Gujarat. They were in excess in all other parts of the country. Heavy rain had fallen in Tenasserim and light to moderate rain over the remainder of Burma. A few showers were reported from Bengal, Assam, the West Coast and parts of Madras.

*Thursday, September 21st.*—The barometer had been steady, with a tendency to fall over the north of the Bay; and the depression in the Bay was apparently concentrating, but very slowly. Temperature was in slight defect in Mysore and on the Madras Coast; and was normal in Burma, Assam, Sind, the West Coast districts, the Madras Deccan and South India. It was in excess in all other provinces. Light to moderate rain had fallen in Burma; and showers had been received in Bengal, the West Coast districts, Mysore and Madras.

*Friday, September 22nd.*—Pressure had given way slightly to briskly over Bengal and the north of the Bay, and had risen generally elsewhere. The depression in the Bay had developed considerably, and was apparently central midway between False Point and Akyab. Temperature was in moderate to considerable defect in Mysore, the Madras Deccan and on the Madras Coast, and in slight defect in Burma. It was in excess in all other provinces, except Assam, Sind, the West Coast districts, the Bombay Deccan and South India, where it was practically normal. Light rain had fallen in Burma and East and Lower Bengal; and showers had been received on the West Coast and in parts of Madras.

*Saturday, September 23rd.*—Pressure had risen slightly to briskly over the centre of the Bay; and had given way briskly to rapidly in Lower Bengal and over the head of the Bay. The depression in the Bay had advanced in a northerly direction and was lying over the Sunderbunds, central to the east of Saugor Island. Pressure was about a quarter of an inch in defect in its central area. Strong winds and squally weather prevailed at the head of the Bay. Mean temperatures averaged  $3^{\circ}$  in defect in Orissa; and were normal in Sind, the Deccan, South India and on the West and Madras Coasts. The excess in the remaining provinces was largest in Berar, Bihar and the Punjab. The storm had given heavy rain to Orissa and Lower Bengal. Light rain had fallen in Burma and East Bengal; and showers had been received in Assam, North Bengal, Chota Nagpur and on the West Coast.

**Temperature.**—Excessive temperature has prevailed over the greater part of the country, but the excess has not been as large as during the previous two weeks. The mean temperature of the week has been in slight defect in Mysore, South India and on the Madras Coast; and practically normal in Burma, Assam, Bengal, Bihar, Sind, the West Coast districts and the Madras Deccan. The largest excess in the remaining provinces has occurred this week in the Punjab and Berar, in both of which provinces the mean temperature of the week was  $5.4^{\circ}$  above the normal. Temperature has been falling in Rajputana. It was  $6.1^{\circ}$  in excess on Sunday and only  $1.7^{\circ}$  in excess on Saturday. The mean temperature of the week in Rajputana was  $4.4^{\circ}$  above the normal, as compared with  $8.7^{\circ}$  during the previous week. The heavy rain given by the storm from the Bay caused a very rapid fall of temperature in Orissa, from  $+ 3.4^{\circ}$  on Friday to  $- 3.0^{\circ}$  on Saturday.

The following table gives the mean temperature variation data for the week :

| PROVINCE.                         | SEPTEMBER 1899. |      |      |      |      |      |      | Mean variation of week. |

| West Coast . . . . .              | +1'0            | -1'4 | -0'2 | +1'1 | +0'4 | +0'4 | +0'1 | +0'2                    |
| Bombay Deccan . . . . .           | +3'6            | +3'3 | +2'4 | +1'8 | +2'1 | +0'1 | +0'6 | +2'0                    |
| Mysore . . . . .                  | -0'7            | -2'2 | -0'9 | +0'4 | -1'4 | -4'5 | -3'0 | -1'8                    |
| Madras Coast . . . . .            | +0'3            | -1'5 | -1'2 | -2'9 | -1'3 | -3'0 | +0'2 | -1'3                    |
| Madras Deccan . . . . .           | +1'3            | -0'5 | -0'3 | -0'5 | -0'8 | -2'7 | +1'0 | -0'4                    |
| South India . . . . .             | -0'8            | -2'7 | -1'1 | -0'6 | -0'8 | -0'7 | -0'3 | -1'0                    |
| Mean for whole of India . . . . . | +1'7            | +1'3 | +1'5 | +1'6 | +1'5 | +1'3 | +1'2 | +1'4                    |

The mean temperature for the whole of India was in slight excess on every day of the week. The changes were small, as the variation for the normal ranged from  $+1'7^{\circ}$  on Sunday to  $+1'2^{\circ}$  on Saturday, a difference of only half a degree. For the whole week the variation from the normal was  $+1'4^{\circ}$ .

The following table gives the highest maximum temperature recorded each day, for the preceding twenty-four hours :

|                          |        |                |
|--------------------------|--------|----------------|
| September 17th . . . . . | 107'5° | at Montgomery. |
| " 18th . . . . .         | 107'5° | " Do.          |
| " 19th . . . . .         | 109'0° | " Do.          |
| " 20th . . . . .         | 108'9° | " Jacobabad.   |
| " 21st . . . . .         | 107'9° | " Do.          |
| " 22nd . . . . .         | 107'7° | " Sialkot.     |
| " 23rd . . . . .         | 106'4° | " Jacobabad.   |

**Rain.**—Good rain has fallen in the south of the Peninsula, and nearly the whole of Madras has received rain equal to or exceeding the normal quantity for the week. Very little rain has fallen in North-West India and the central districts. Actually or practically no rain has fallen in Oudh, the central and west divisions of the North-Western Provinces, the whole of the Punjab, the Central Provinces, Gujarat, Kathiawar, Sind, Baluchistan, Central India and Rajputana. The week's rainfall has been normal or in excess in Burma and Bengal, with the exception of the following divisions : Central and Upper Burma, East Bengal, Bengal Hills and the Surma Valley in Assam. In the Peninsula, rainfall has been normal or in excess in Malabar, Mysore, Coorg, the Bombay Deccan and the whole of Madras, with the exception of the East Coast (North).

The last three columns of the table at the end show that, with the exception of Upper Burma, the rainfall of the period June 4th to September 23rd has been practically normal or in excess in all the divisions of Burma and Bengal. In the

North-Western Provinces the only divisions which have had deficient rainfall are the west and west submontane divisions. In the Punjab all divisions show a deficiency, with the exception of the North Punjab. In the central parts of the country, North Bombay and the whole of the Peninsula, the only divisions that have received practically normal rainfall, are the eastern division of the Central Provinces, East Coast (North) and Madras (Central).

The following were the principal large totals received at individual stations during the week :

|                  |   |               |
|------------------|---|---------------|
| Burma . . . . .  | Kyaikto (Tenasserim) . . . . .          | 18.32 inches. |
| Bengal . . . . . | Diamond Harbour (24-Perganas) . . . . . | 11.45 "       |
|                  | Churaman (Dinajpur) . . . . .           | 10.53 "       |
|                  | Dinhata (Cooch Behar) . . . . .         | 10.12 "       |
|                  | Bhagalpur . . . . .                     | 11.78 "       |

W. A. BION,  
for Meteorological Reporter to the  
Government of India.

SIMLA, 28th September, 1899.

T. W. HOLDERNESS,  
Secretary to the Government of India.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 23rd September.*—Seasonable and heavy rain fell during the week almost throughout the Presidency, except in the extreme South and parts of the Circars and the West Coast, where the falls were rather light. The water-supply has generally improved, but is still inadequate in the extreme South and in Malabar. Sowings are proceeding actively, except in Madurā and Tinnevely, and excluding these two districts, the standing crops generally are thriving. Harvests of early sowings are coming in, but the yield is indifferent. Pasturage is generally sufficient and cattle are in normal condition. Prices are generally easier, but that of *chulam* (*Sorghum vulgare*) has risen in several districts, owing to the demand for export. General prospects continue favourable, though more rain is needed in several districts.

**Bombay.**—*For week ending 27th September.*—Rain fell during the week in all parts of the Presidency, except in Kathiawar, Sind and Kaira. The falls were light in Ahmedabad, Surat, Broach, Thana, Khandesh, Ahmednagar, Nasik and Poona; but excellent in other districts of the Deccan, the Konkan and the Karnatak, where the rain has benefited the crops. More rain is urgently required throughout Guzerat and Kathiawar, and in Khandesh, Poona and Nasik. Inundation very low in Sind and the standing crops are in poor condition in parts. In four districts of Guzerat and in Khandesh the crops are withering for want of rain. Sowing of the spring crops is in progress in the Karnatak and five districts of the Deccan. Fodder is insufficient in Kathiawar, Khandesh, Guzerat and parts of Sind. The condition of agricultural stock is good, except in Ahmedabad, Kathiawar, and parts of Sind. Prices have fallen in one district are stationary in eight districts and are rising elsewhere. The daily average numbers on relief were as follows:—on test works—Ahmedabad 1,500, Kaira 5,087, Broach 4,105, Khandesh 3,101, Panch Mahals 443, Ahmednagar 184—total 14,420. On relief works—Ahmedabad 10,131 (including 515 dependants), Panch Mahals 3,200, Broach 2,666, and Khandesh 652 (dependants)—total 16,649. On village relief—Ahmedabad 6. Grand total 31,075.

**Bengal.**—*For week ending 25th September.*—General rain fell during the week, and in parts the falls were heavy accompanied by cyclonic winds. The rain has greatly benefited the winter rice and other standing crops, but more is still required for the highlands in Crissa and Chota Nagpur. The autumn harvest has almost been completed and ploughing for the spring crops has begun. Prices of common rice continue steady with a tendency to fall in some districts. Cattle are generally in good condition and fodder is everywhere abundant.

**North-Western Provinces and Oudh.**—*For week ending 27th September.*—No rain fell during the week, except scattered showers in some of the Submontane, Oudh and Eastern districts, and at two places only were falls of one inch recorded. Rain is greatly needed, especially in the more westerly districts. The standing crops which had been benefited by the recent rainfall in the Western, Submontane and Upper and Central Doab districts and in Budaun, are now suffering from high westerly winds which have done much damage. Harvesting of the autumn crops is in progress and the preparation of fields for spring sowings is being actively carried on in several districts. The sowing of gram has commenced. Prospects are on the whole fair, except in the Western districts, where they are becoming worse. Supplies and fodder are available, though both are dear in some places. Prices are still high and are as a rule rising.

**Punjab.**—*For week ending 27th September.*—Slight rain fell in parts of the Hissar, Ferozepur and Rawalpindi districts. The maize and great millet

crops are being cut in Umballa. Harvesting of rice is in progress in Lahore and Amritsar and picking of cotton in Lahore, Sialkot and Gujrat. Ploughings for and sowings of the spring crops are in progress on irrigated lands in Hissar, Karnal, Umballa, Mooltan and Dera Ismail Khan. There will be no gram sowings in Amritsar if rain holds off in September. In Lahore, rape and fodder are being sown in place of gram. The standing crops on unirrigated areas are reported to have totally failed or withered up in Hissar, Delhi, Karnal, Jullundur and Sialkot, and are suffering in Ferozepur and Amritsar owing to prolonged drought. The crops on irrigated areas are reported to be fair in Hissar and parts of Peshawar and Dera Ismail Khan, average or below average in Ferozepur, Mooltan, Lahore, Sialkot, Karnal, Umballa and Jullundur and bad in Delhi, and Shahpur. A two to four-anna crop is expected in Umballa, and an eight-anna crop in Sialkot. Canals are nearly dry in the Mooltan district and tanks are without water in Karnal where the supply is scarce. Rain is badly wanted to improve the condition of the standing crops and for spring sowings in Umballa, Lahore, Amritsar and Peshawar. Westerly winds are causing damage to irrigated crops in Karnal, and insects to great millet and rape in Ferozepur and to great millet and maize in Lahore. The rice crop has also been damaged by the early cessation of the Sutlej inundation canals and the insufficiency of water in the Bari-Doab canal in Lahore. Agricultural stock are getting out of condition from overwork and want of fodder in the Hissar, Delhi, Lahore, Sialkot, Shahpur, and parts of the Dera Ismail Khan districts, and cattle are being taken from parts of Lahore, Sialkot and Dera Ismail Khan to other places where fodder is procurable. Fodder is reported to be scarce in all districts except Umballa and Rawalpindi. In the former district the stock of fodder is estimated to last for two months. The average number of famine workers on test works was—in Hissar 49,000 against 25,000 and in Ferozepur 2,230 against 500 for the previous week. Test works have also been opened in Karnal where 1,940 persons were employed. The position is becoming acute in Delhi, where test works will be opened shortly. Immigration into Ferozepur from Bikaner, Sirsa and other places continues. Prices of staple food grains continue high throughout the Province. The price of wheat continues to rise in Mooltan, Sialkot, Shahpur, Peshawar and Dera Ismail Khan, but has fallen slightly in Hissar, Umballa and Jullundur. The price of gram is rising in Ferozepur and that of maize in Ferozepur and Peshawar. Wheat is selling from 10½ to 13, barley 15 to 16, gram 10 to 13½, maize 10½ to 16, great millet 10 to 15½, and bulrush-millet 10 to 16 seers per rupee.

**Central Provinces.**—*For week ending 26th September.*—The weather has been generally clear and hot but occasionally cloudy during the latter part of the week. With the exception of falls of 2 and 6 cents respectively in Bilaspur and Sambalpur and of 31 cents at Drug in Raipur, the week has been rainless. The agricultural outlook is very gloomy. The autumn crops, other than rice, may yet with early rain give fair outturns in most districts, but in Betul, Chhindwara, Nimar and Wardha, their condition is now very bad indeed. Damage caused by insects, which was temporarily stopped by the rain of the previous week, is again reported and crops on light soils are fast drying up. Of the transplanted rice crops in the Waingunga districts barely a fourth is still alive and most of this will perish with another week's drought. The broadcast rice crops in these districts may yield from 6 to 8 anna outturns if rain falls soon. The Chhattisgarh rice crop has greatly deteriorated and is reported to be withering on light soils. The condition of the crop generally is critical and even in Sambalpur the crop is suffering and the outlook is unpromising. Spring sowings have commenced in places but are retarded for want of rain. Want of employment and high prices, the result of the gloomy outlook, are causing increasing distress, and have necessitated village relief in Balaghat, Betul, Hoshangabad, the Harsud tahsil of Nimar and parts of Nagpur, Bhandara, Jubbulpur, Narsinghpur, Chhanda and Saugor. In Mandla harvesting of light crops and ploughing for winter sowings have afforded some employment to labourers. The numbers in receipt of village relief on account of previous failures in Saugor and Bilaspur were 5,150 and 3,042 persons respectively. In Betul 3,884 persons were employed on village relief and 764 on test works. (The numbers relieved in other districts have not yet been

reported). A scarcity of fodder and water continues in parts of Nimar, Betul, Chhindwara, Narsinghpur, Saugor and the Nagpur country. There has been a general and sharp rise in prices: the rise being most marked in the case of *jowar*. The cheapest prices are: wheat 13, gram 17, rice 14, and *jowar* 14 seers per rupee. The dearest prices are: wheat 8 (in Nimar), gram 10 (in Nimar), rice 7½ (in Betul) and *jowar* 9½ (in Nimar) seers per rupee. The highest price of the chief staple in any district is 8 seers (rice) in Chhanda, and *jowar* is selling at 11 seers in that district as against 14 seers last week.

**Burma.**—*For week ending 23rd September.*—In Lower Burma transplanting still continues in parts. Prospects are good. Damage has been caused by insects in the Kyauktan township of the Hanthawaddy district and by floods in parts of Tharawaddy, Henzada, and Toungoo. In Upper Burma sowing and transplanting of wet weather paddy and sowing of late sesamum, maize, peas and other crops on uplands still continue. In most districts reaping of early sesamum is nearing completion. Reaping of early paddy has been completed in Kyaukse and reaping of hill paddy has commenced in Katha. Prospects of the standing crops remain good to fair. Favourable rain has fallen in all districts, except in the Pagan township of Myingyan where more rain is needed. The rise in the Irrawaddy and Chindwin rivers has done slight damage to low-lying tracts in five districts, and insects have also done harm in parts. The price of paddy has fallen in Thayetmyo, risen in Pakókku and is practically stationary elsewhere.

**Assam.**—*For week ending 26th September.*—The weather is hot. Transplanting of late and reaping of early rice are nearly completed and the manufacture of tea is in progress. Prospects of tea generally are good. The late rice crop has been damaged by insects in Darrang, Sibsagar and Lakhimpur. Cutting of jute is finished in Sylhet, but still continues in Goalpara. Prospects of sugarcane are indifferent. Fodder is scarce in places on account of floods. Prices—common rice—Silchar 14½ to 15, Sylhet 22½, Dhubri 16, Gauhati 14, Tezpur 12½, Nowgong 11, Sibsagar 12 and Dibrugarh 11½ seers per rupee.

**Mysore and Coorg.**—*For week ending 26th September.*—**MYSORE:** Rainfall—4 inches 28 cents in the Civil and Military station. Good rain also fell in other parts of the State. The standing crops are in good condition. Prices have slightly fallen in five districts. *Ragi* (*Eleusine coracana*) has been sown in parts of Kolar, Tumkur, Chitaldrug and Kadur.

**COORG:** Rainfall—1 inch 30 cents. The rice plants are doing fairly well and the *Ragi* (*Eleusine coracana*) and coffee crops are maturing. Cardamom-picking continues. Prices of food-grains are stationary, and water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 27th September.*—**BERAR:** The average rainfall during the week was 18 cents. The weather is warm and cloudy. Owing to the absence of rain, the *jowar* and cotton crops have suffered very much throughout the Province and in parts they are hopelessly destroyed. Breaking up of land for the winter crops continues, except in the Wun district where it has stopped for want of moisture. Sowings are in progress in three districts. A scarcity of fodder and water continues. The price of *jowar* has risen considerably in the Akola and Basim districts and is due to large exports. Prices are also steadily rising in other places. The number of persons employed on test works were—Akola 2,879 and Buldana 1,076.

**HYDERABAD:** Rainfall during the week—60 cents. Agricultural prospects continue to improve in the Gulburga division and the standing crops have been much benefited by the recent rainfall in some districts of the Bidar and Warangal divisions. More rain is badly wanted in one or two talukas of Aurungabad. Harvesting of the autumn crops has commenced and spring sowings have begun in parts. Grain is being largely exported from Yadgiri, Raichur, Gulburga and Seram to the Bombay Presidency and is causing a rise in prices. Prices—wheat 8½, coarse rice 8, and *jowari* 16 seers per current sicca rupee.

**Central India.**—*For week ending 27th September.*—Slight rain fell during the week in Bhopal and Malwa but none in Bhopawar and Baghelkhand. The rainfall is still insufficient in the three first named Agencies. The condition of agricultural stock is fair in Bhopal, good in Baghelkhand, and bad in Malwa and Bhopawar. Pasturage is good in Baghelkhand but scarce in the other three Agencies. Prices of food-grains are below normal in Baghelkhand and are rising elsewhere. (Reports from Gwalior and Bundelkhand not received.)

**Rajputana.**—*For week ending 27th September.*—Local showers are reported to have fallen in four States. Agricultural operations have been generally suspended. The standing crops are in fair condition where irrigation has been possible. The condition of cattle is bad and withered crops are being used as fodder. Prices are rising in seven States and are steady elsewhere. The number of persons who emigrated from Marwar, Ajmer-Merwara and Jaisalmer during the week was 13,600, 1,121 and 1,300 respectively. The numbers employed on relief works were: in the Ajmer-Merwara district 42,142; Bikaner 2,164; and Marwar 9,441. The number on ordinary works in Merwara was 150 and in receipt of gratuitous relief—Merwara 1,237; Marwar 2,442 and Bikaner 198. A large number of persons are also employed on ordinary works which have been opened throughout the States to relieve distress. Prices—Ajmer 11½, Beawar 11½, Marwar 8½ and Bharatpur 12 seers per rupee. Prospects are bad.

**Kashmir.**—*For week ending 25th September.*—The weather is fine. Prospects of the autumn crops are excellent. Prices continue below normal. The price of rice is 27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 26th September.*—No rain fell during the week. Prices continue to rise. Wheat is selling from 11 to 12 and maize 16 to 18 seers per rupee. The condition of the standing crops is fair on irrigated areas, but they have withered in the *Kandhi* tracts. Owing to the rains holding off the spring sowings have been greatly retarded. Rain is badly wanted. Fodder is scarce and cattle are starving in the affected tracts. Prospects of the standing crops are unfavourable.

**Nepal.**—*For week ending 23rd September.*—Rainfall—1·30 inches. The weather is fine. The lowland crops are doing well but would improve with more rain. The price of rice is 9 seers per rupee.

The total numbers in receipt of relief during the preceding and present weeks are as follows :

| Name of Province.           | PRECEDING WEEK. |                    |         | PRESENT WEEK. |                    |         | Increase or Decrease. |

The diminution in the amount and extent of the rainfall over the Peninsula, which had commenced last week, has been maintained during the week under review and from the 24th up to the present date there has been practically no rain over the whole of the Peninsula, the Central Provinces and Central India. In North-West India including the Punjab, the North-Western Provinces, Rajputana and North Bombay, there has been no change, fine weather with generally high temperatures and low humidities having prevailed steadily throughout the week.

On the other hand in North-East India there has been heavy rain. The storm over the Bay, the first indications of which were given last Thursday, developed into a moderately severe cyclonic storm. It crossed the Sunderbuns on Saturday morning travelling northwards. It gave very heavy rain to the coast districts of Orissa and Bengal on Friday, heavy rain to the whole of Bengal and part of Bihar on Saturday, and an excessively heavy downpour to the Darjeeling Hills on Sunday. On Monday morning the sky cleared and the storm filled up. In Burma there have been light to moderate showers throughout the week.

The week's rainfall has been more than usual in Bengal and Assam and less than usual in the other Provinces. In the North-Western Provinces, the Punjab, Berar and Central Provinces, Gujarat and Central India, and Sind and Rajputana there has been no rain; in Madras and Malabar and Mysore an average of  $\frac{1}{2}$  of an inch; in Bombay an average of nearly  $\frac{1}{2}$  an inch and in Bengal and Assam and Burma an average of about three inches.

The seasonal excess in Bengal and Assam and the seasonal deficiency in all the other Provinces have both increased.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

*Simla, the 29th September, 1899.*

Read—

Customs Circular No. XV of 1899.

Ordered, that the Circular be published for general information in the Supplement to the *Gazette of India*.

J. F. FINLAY,

*Secretary to the Government of India.*

Customs Circular No. XV of 1899.

RESOLUTION—By the Government of India, Finance and Commerce Department, No. 3664-S.R., dated the 10th August 1899.

In a letter, dated the 12th March 1898, copy of which was received with the despatch from the Secretary of State. No. 61 (Revenue), dated the 24th March 1898, the Manchester Chamber of Commerce suggested that cut piece goods should be marked conspicuously on the outer fold of each piece with the words "cut piece," and they expressed the hope that this method of marking would be considered satisfactory.

2. The Governments of Madras, Bombay, and Bengal were consulted as to the sufficiency or otherwise of the stamping of the words "cut piece," in addition to the aggregate length, on the outer fold of each piece. All these Governments agree in the proposal of the Manchester Chamber of Commerce that the words "cut piece" should be marked on the outer fold, with the aggregate length; but they suggest that the number of cut pieces should also be specified.

3. As a single piece of 40 yards is, in the market, more valuable than two pieces which make up that length, and, similarly, two pieces making up 40 yards are more valuable than six pieces making up the same length, purchasers ought to know the number of cut pieces. The Governor General in Council, therefore, directs that, in the case of cut piece goods, the words "cut piece" and the aggregate length, and the number of cut pieces, shall be marked on the outer fold of the piece, thus: "(3) cut pieces, (40) yards," or "(40) yards in (3) cut pieces."

4. The Local Governments will, however, not enforce this method of marking until sufficient time has been given to enable shippers of such goods to comply with the direction.

(a) Includes Godhra-Rutlam-Nagda and Bhatinda-Ferozepore standard gauge.  
(b) Includes Jammu and Kashmir and Hyderabad-Shadipalli rys.  
(c) Includes Beswada-Madras ry.  
(d) Closed for traffic.

(e) From 3rd July to 16th September 1899.  
(f) From 1st April to 28th June 1899.  
(g) From 15th June to 16th September 1899.  
(h) From 1st June to 17th September 1899.

C. F. SYKES,

for Offg. Under Secy. to the Govt. of India.

SINLA, the 26th September, 1899.

Printed and published for the GOVERNMENT OF INDIA at the GOVERNMENT CENTRAL PRINTING OFFICE, Simla.

SUPPLEMENT TO  
**The Gazette of India.**

---

No. 40. } CALCUTTA, SATURDAY, OCTOBER 7, 1899.

---

**OFFICIAL PAPERS.**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully or want be known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*
